The Best CIS-SPM Cert Guide & Leader in Qualification Exams & Authorized ServiceNow Certified Implementation Specialist - Strategic Portfolio Management

How do you arrange the day? Many people may have different ways and focus of study in the different time intervals, but we will find that in real life, can take quite a long time to learn CIS-SPM learning questions to be extremely difficult. You may be taken up with all kind of affairs, so you have little time for studying on our CIS-SPM Exam Braindumps. But we can claim that our CIS-SPM practice engine is high-effective, as long as you study for 20 to 30 hours, you will be able to pass the exam.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q30-Q35):

NEW QUESTION # 30

Using the Request type field on a resource plan, which options can be used to request a resource?

Choose 3 answers

- A. Hours
- B. Day
- C. Person Days
- D. FTE
- E. Month

Answer: A,C,D

Explanation:

Explanation

Using the Request type field on a resource plan, you can request a resource by specifying the amount of FTE, person days, or hours that you need for a task or a project. FTE stands for full-time equivalent and represents the percentage of a standard work week that a resource can perform. Person days are the number of days that a resource works on a task or a project. Hours are the number of hours that a resource works on a task or a project. You can find more information about the Request type field in the Product Documentation for ServiceNow.

NEW QUESTION # 31

What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. im_module
- B. im_idea_core

- C. dmn_demand
- D. im_category

Answer: D

Explanation:

According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is im_category. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The dmn_demand table stores the demand records that are created from the approved ideas. The im_module table stores the idea modules that are used to group ideas by different criteria. The im_idea_core table stores the core fields of the idea records.

NEW QUESTION # 32

A project expense line is cost associated with a specific source, except for:

- A. Resource.
- B. Software.
- C. Fixed Assets.
- D. Program

Answer: D

Explanation:

Explanation

According to the Project Expense Lines document, a project expense line is cost associated with a specific source, such as fixed assets, resource, or software. The program field on the project expense line form is not a source of cost, but a reference to the program that the project belongs to. Therefore, the correct answer is B.

Program. The other options are not correct, as they are sources of cost for a project expense line.

NEW QUESTION # 33

Which of the following can be used to calculate planned cost when creating a resource plan?

Choose 2 answers

- A. Rate card
- B. Project rate
- C. Default rate
- D. Demand rate

Answer: A,B

Explanation:

Explanation

According to the ServiceNow documentation¹, a rate card is a table that defines the hourly cost of labor for different roles or resources. A project rate is a fixed rate that is applied to all resources assigned to a project, regardless of their roles or individual rates. Both of these can be used to calculate the planned cost of a resource plan by multiplying the hours allocated to each resource by the corresponding rate. The other options are incorrect because:

A: Demand rate: A demand rate is a rate that is applied to a demand, not a resource plan. It is used to estimate the cost of fulfilling a demand before it is converted into a project².

C: Default rate: A default rate is a rate that is applied to a resource when no other rate is specified. It is not a valid option for calculating the planned cost of a resource plan, as it is only used as a fallback option³.

NEW QUESTION # 34

Which of these items should implementers create/configure first during an SPM implementation?

- A. Lenses
- B. Demand management
- C. Dashboards
- D. Business units

Answer: D

NEW QUESTION # 35

.....
