NEW QUESTION # 72

You want to make sure that a particular forwarding house is entered as the ordering party in a freight order based on the ID of the consignee. What do you have to define in Customizing for the freight order type?

- A. Organizational unit determination condition
- **B. Partner determination profile**
- C. Shipper/consignee determination
- D. Creation strategy

Answer: B

Explanation:

In SAP S/4HANA Transportation Management, the partner determination profile is used to define how business partners, such as the ordering party, are determined for a freight order based on specific criteria, such as the consignee's ID. According to the SAP documentation, the partner determination profile is customized for the freight order type to automatically assign partners (e.g., a forwarding house as the ordering party) based on predefined rules or conditions. This ensures that the correct forwarding house is

selected based on the consignee's ID.

The other options are incorrect:

* Shipper/consignee determination (A) is not a standard configuration object in SAP TM; partner determination handles these roles.

* Organizational unit determination condition (B) is used for determining organizational units, not business partners like the ordering party.

* Creation strategy (D) relates to how freight orders are created (e.g., automatic or manual), not partner assignment.
