

Fast Download Microsoft Valid SC-401 Exam Simulator Are Leading Materials & Hot SC-401: Administering Information Security in Microsoft 365

What's more, part of that PassLeaderVCE SC-401 dumps now are free: <https://drive.google.com/open?id=1FIDw5PIEHCaxK6Q2K6mNF3Za758xmQ7h>

Our SC-401 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening in the world. As the questions of exams of our exam torrent are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our SC-401 Practice Test can serve as a conducive tool for you make up for those hot points you have ignored. Apart from the advantage of free renewal in one year, our exam prep offers you constant discounts so that you can save a large amount of money concerning buying our SC-401 training materials.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 2	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 3	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 4	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

Newest Valid SC-401 Exam Simulator - Win Your Microsoft Certificate with Top Score

On the basis of the current social background and development prospect, the SC-401 certifications have gradually become accepted prerequisites to stand out the most in the workplace. As far as we know, in the advanced development of electronic technology, lifelong learning has become more accessible, which means everyone has opportunities to achieve their own value and life dream. Our SC-401 Exam Materials are pleased to serve you as such an exam tool. You will have a better future with our SC-401 study braindumps!

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q87-Q92):

NEW QUESTION # 87

You have a Microsoft 365 E5 tenant.

You have sensitivity labels as shown in the Sensitivity Labels exhibit. (Click the Sensitivity Labels tab.)

Name	Order	Scope
Public	0 - lowest	File, Email
General	1	File, Email
Confidential	2	File, Email
Internal	3	File, Email
External	4 - highest	File, Email

The Confidential/External sensitivity label is configured to encrypt files and emails when applied to content. The sensitivity labels are published as shown in the Published exhibit. (Click the Published tab.)

Sensitivity Policy1

[Edit policy](#) [Delete policy](#)

Name
Sensitivity Policy1

Description

Published labels
Public
General
Confidential
Confidential/Internal
Confidential/External

Published to
All

Policy settings
Users must provide justification to remove a label or lower its classification

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
The Internal sensitivity label inherits all the settings from the Confidential label.	☐	☐
Users must provide justification if they change the label of content from Confidential/Internal to Confidential/External.	☐	☐
Content that has the Confidential/External label applied will retain the encryption settings if the sensitivity label is removed from the label policy.	☐	☐

Answer:

Explanation:
Answer Area

Statements	Yes	No
The Internal sensitivity label inherits all the settings from the Confidential label.	☐	☒
Users must provide justification if they change the label of content from Confidential/Internal to Confidential/External.	☐	☒
Content that has the Confidential/External label applied will retain the encryption settings if the sensitivity label is removed from the label policy.	☒	☐

Explanation:

Statements	Yes	No
The Internal sensitivity label inherits all the settings from the Confidential label.	☐	☒
Users must provide justification if they change the label of content from Confidential/Internal to Confidential/External.	☐	☒
Content that has the Confidential/External label applied will retain the encryption settings if the sensitivity label is removed from the label policy.	☒	☐

Step 1 - Review what's configured

Labels: Public, General, Confidential, Internal, External.

Also shown in policy: Confidential/Internal and Confidential/External.

Policy setting: Users must provide justification to remove a label or lower its classification.

Confidential/External # encrypts content when applied.

Step 2 - Analyze each statement

Statement 1: The Internal sensitivity label inherits all the settings from the Confidential label.

Sub-labels (e.g., Confidential/Internal, Confidential/External) do not inherit settings from the parent.

They are independent labels grouped under a parent for organization, but each sub-label must have its own protection settings defined.

Answer: No

Statement 2: Users must provide justification if they change the label of content from Confidential/Internal to Confidential/External.

The policy requires justification only when removing a label or downgrading classification (lowering).

Changing between two sub-labels of the same parent (Confidential/Internal # Confidential/External) is considered a lateral move (not a downgrade).

Answer: No

Statement 3: Content that has the Confidential/External label applied will retain the encryption settings if the sensitivity label is removed from the label policy.

If a label is removed from a published policy, content already labeled retains its protection settings (such as encryption).

The label metadata stays applied to the file/email, even if unpublished.

Answer: Yes

Reference: What happens when you delete or edit a sensitivity label

NEW QUESTION # 88

You have a Microsoft 365 subscription. Auditing is enabled.

A user named User1 is a member of a dynamic security group named Group1.
 You discover that User1 is no longer a member of Group1.
 You need to search the audit log to identify why User1 was removed from Group1.
 Which two activities should you use in the search? To answer, select the appropriate activities in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

Search Results

Activities: Date IP address User Activity Item

Show results for all activities

Clear all to show results for all activities

Search

NEW QUESTION # 89

You have a Microsoft 365 E5 subscription that contains a trainable classifier named Trainable1.
 You plan to create the items shown in the following table.

Name	Type
Label1	Sensitivity label
Label2	Retention label
Policy1	Retention label policy
DLP1	Data loss prevention (DLP) policy

Which items can use Trainable 1?

- A. Label1 and Label2 only
- B. Label1 and Policy1 only
- C. Label2, Policy1, and DLP1 only
- D. Label1, Label2, Policy1, and DLP1
- E. Label2 only

Answer: C

Explanation:

A trainable classifier in Microsoft Purview is used to automatically identify and classify unstructured data based on content patterns. The classifier can be used in:

1. Retention Labels (Label2) # Supported

Trainable classifiers can be linked to retention labels to automatically classify and apply retention policies to documents.

2. Retention Label Policies (Policy1) # Supported

Retention label policies define how and where retention labels are applied, including automatically using trainable classifiers.

3. Data Loss Prevention (DLP) Policies (DLP1) # Supported

Trainable classifiers can be used in DLP policies to detect and protect sensitive content automatically.

NEW QUESTION # 90

You have a Microsoft SharePoint Online site named Site1 that contains the files shown in the following table.

Name	Number of IP addresses in the file
File1	2
File2	3

You have a data loss prevention (DLP) policy named DLP1 that has the advanced DLP rules shown in the following table.

Name	Content contains	Policy tip	If match, stop processing	Priority
Rule1	1 or more IP addresses	Tip1	No	0
Rule2	3 or more IP addresses	Tip2	Yes	1
Rule3	2 or more IP addresses	Tip3	No	2

You apply DLP1 to Site1.

Which policy tips will appear for File2?

- A. Tip1 and Tip2 only
- B. Tip2 only
- C. Tip3 only
- D. Tip1 only

Answer: B

NEW QUESTION # 91

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Cloud Apps.

You plan to deploy a Defender for Cloud Apps file policy that will be triggered when the following conditions are met:

*A file is shared externally.

*A file is labeled as internal only.

Which filter should you use for each condition? To answer, drag the appropriate filters to the correct conditions. Each filter may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Filters	Answer Area	Filter
Access level	When a file is shared externally.	
Collaborators	When a file is labelled as Internal only.	
Matched policy		
Sensitivity label		

Answer:

Explanation:

Filters	Answer Area	Filter
Access level	When a file is shared externally.	Access level
Collaborators	When a file is labelled as Internal only.	Sensitivity label
Matched policy		
Sensitivity label		

NEW QUESTION # 92

.....

A good learning platform should not only have abundant learning resources, but the most intrinsic things are very important, and the most intuitive things to users are also indispensable. Imagine, if you're using a SC-401 practice materials, always appear this or that grammar, spelling errors, such as this will not only greatly affect your mood, but also restricted your learning efficiency. Therefore, good typesetting is essential for a product, especially education products, and the SC-401 test material can avoid these risks very well.
