Answer:

Explanation:

Enter show health command.	1	Open SSH client.
Confirm health status.	2	Open session to RMC.
Open SSH client.	3	Enter show health command.
Open session to RMC.	4	Confirm health status.

1	Open SSH client.
2	Open session to RMC.
3	Enter show health command.
4	Confirm health status.

* Open SSH client: Begin by opening an SSH client on your computer. This client will be used to establish a secure connection to the Rack Management Controller (RMC).

* Open session to RMC: Use the SSH client to open a session to the RMC. The RMC is the central management component for the HPE Superdome Flex system.

* Enter show health command: Once connected to the RMC, enter the show health command. This command will provide detailed information about the health status of various components within the Superdome Flex system.

* Confirm health status: Review the output of the show health command to confirm the health status of the Superdome Flex components. This step ensures that all components are functioning correctly and identifies any potential issues.
