C_S4EWM_2023 Pass4sure Dumps Pdf | C_S4EWM_2023 Real Testing Environment

The advent of our SAP C_S4EWM_2023 study guide with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Rather than insulating from the requirements of the SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management C_S4EWM_2023 Real Exam, our C_S4EWM_2023 practice materials closely co-related with it.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q18-Q23):

NEW QUESTION # 18

To which object do you assign the replenishment method?

- A. Document category
- **B. Storage type**
- C. Document type
- D. Warehouse process type

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Replenishment in SAP EWM moves stock from reserve to picking areas. Option A ("Storage type") is correct because the replenishment method (e.g., automatic, planned) is assigned to a storage type in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Replenishment > Define Replenishment Control per Storage Type. This determines how replenishment is triggered for that area. Options B, C, and D (document-related or process type) are not directly linked to replenishment method assignment.

NEW QUESTION # 19

What is required to perform explicit counting using the Quality Inspection Engine? Note: There are 2 correct answers to this question.

- **A. Inspection rule**
- **B. Work center**
- C. QM integration
- D. Sampling procedure

Answer: A,B

Explanation:

To perform explicit counting using the Quality Inspection Engine (QIE) in SAP Extended Warehouse Management (EWM) on SAP S/4HANA Cloud, Private Edition, the following elements are required:

* Inspection Rule (A)

* An inspection rule defines the criteria for triggering a quality inspection within the warehouse.

* It is essential to configure the inspection rule in EWM to specify the characteristics of the inspection, such as document type, item category, and relevance to counting.

* This rule acts as the basis for initiating explicit counting as part of quality management integration.

- * Work Center (C)
 - * A work center in EWM is the physical or logical location where quality inspection activities occur.
 - * For explicit counting, the work center must be configured to handle QIE tasks.
 - * It serves as the location where warehouse staff can access and perform counting tasks, such as verifying quantities of materials against quality requirements.
- Additional Considerations:
- * QM Integration (B): While quality management (QM) integration ensures alignment with quality standards, it is not a mandatory requirement for explicit counting in QIE but can enhance the overall quality process.
 - * Sampling Procedure (D): Sampling procedures are used to define how samples are drawn for inspection but are not specifically required for explicit counting in this context.
- References from SAP S/4HANA Cloud Private Edition, EWM Documentation:
- * SAP Help Portal: EWM Quality Inspection Integration
 - * SAP Best Practices for EWM: Configuration Guide for Quality Inspection Engine
 - * SAP Learning Hub: Extended Warehouse Management Quality Processes
- These references provide detailed insights into configuring and utilizing the QIE for explicit counting in SAP EWM.

NEW QUESTION # 20

Which of the following are supported with advanced production integration? Note: There are 2 correct answers to this question.

- A. Process orders
- B. Production orders
- C. Repetitive manufacturing
- D. Kanban

Answer: A,B

NEW QUESTION # 21

What do you need to configure before you can create warehouse tasks for an outbound delivery order or an inbound delivery?
Note: There are 2 correct answers to this question.

- A. Putaway control indicator or stock removal control indicator
- B. Warehouse process type determination
- C. Warehouse order creation rules
- D. Warehouse process types

Answer: B,D

Explanation:

Pre-Configuration for Creating Warehouse Tasks

- * Warehouse Process Types (D): Define the processes (e.g., putaway, picking) and are a prerequisite for executing tasks.
- * Warehouse Process Type Determination (C): Determines which process type is applied based on specific conditions like document type or storage type.

Excluded Options

- * Warehouse Order Creation Rules (A): Relevant for creating warehouse orders but not for tasks.
 - * Putaway Control/Stock Removal Indicators (B): Influences stock placement/removal but does not directly enable task creation.
- SAP S/4HANA Cloud Private Edition Reference
- * Refer to Warehouse Task Creation Configuration in SAP EWM guides.

NEW QUESTION # 22

What is the purpose of the custodian in the warehouse setup?

- A. The custodian replaces the previously used Supply Chain Unit
- B. The custodian has the legal possession of the stock
- C. The custodian is used for the determination of the putaway strategy
- D. The custodian processes stock without transfer of title

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The custodian in SAP EWM manages stock ownership without title transfer, often in consignment scenarios.

Option C ("The custodian processes stock without transfer of title") is correct, as defined in the stock attributes and configured in SPRO: SCM Extended Warehouse Management > Master Data > Define Custodian. Options A (putaway strategy), B (Supply Chain Unit), and D (legal possession) are incorrect as they misalign with the custodian's role, which is operational rather than strategic or legal.

NEW QUESTION # 23

.....

The trick to the success is simply to be organized, efficient, and to stay positive about it. If you remain an optimistic mind all the time when you are preparing for the C_S4EWM_2023 exam, we deeply believe that it will be very easy for you to successfully pass the exam, and get the related certification in the near future. Of course, we also know that how to keep an optimistic mind is a question that is very difficult for a lot of people to answer. Because the C_S4EWM_2023 Exam is so difficult for a lot of people that many people have a failure to pass the exam. As is known to us, where there is a will, there is a way. We believe you will get wonderful results with the help of our C_S4EWM_2023 exam questions.
