If this option is enabled, the "Transfer Assets to Oracle Fusion Assets" process will place asset lines with complete definition into which queue in Oracle Fusion Assets?

- A. Post
- B. Posted
- C. New
- **D. Hold**

Answer: D

Explanation:

If the Require Complete Asset Definition option is enabled on a project type, the "Transfer Assets to Oracle Fusion Assets" process will place asset lines with complete definition into the Hold queue in Oracle Fusion Assets. Asset lines with incomplete definition will be placed into the Error queue in Oracle Fusion Assets. This queue holds the asset lines that have errors or missing information that need to be corrected before they can be transferred to the Hold queue. Asset Cost Allocation Methods

The asset cost allocation method determines how indirect or common costs incurred on a project are allocated to multiple assets.

You can specify an asset cost allocation method to enable Oracle Fusion Project Costing to automatically allocate unassigned asset lines and common costs across multiple assets. Unassigned asset lines typically occur when more than one asset is assigned to an asset grouping level.

Projects and project templates inherit a default asset cost allocation method from the associated project type.

You can override the default at the project level. If you use capital events to allocate costs, then you can also override the asset cost allocation method at the event level Asset Cost Allocation Methods The following table describes the available asset cost allocation methods.
