It is also a valuable credential for individuals who work with personal data on a daily basis, such as data protection officers, privacy consultants, and lawyers. By earning the CIPP/E certification, individuals can enhance their professional credibility, increase their earning potential, and gain a competitive advantage in the job market.

IAPP Certified Information Privacy Professional/Europe (CIPP/E) Sample Questions (Q182-Q187):

NEW QUESTION # 182

When does the GDPR provide more latitude for a company to process data beyond its original collection purpose?

- A. When the data has been pseudonymized.
- B. When the data subject has failed to use a provided opt-out mechanism.
- C. When the data is protected by technological safeguards.
- **D. When the data serves legitimate interest of third parties.**

Answer: D

Explanation:

Section: (none)

Explanation

The GDPR provides more latitude for a company to process data beyond its original collection purpose when the data has been pseudonymized, which means that the data can no longer be attributed to a specific data subject without the use of additional information. Pseudonymization is a technique that reduces the linkability of personal data with the data subject, and enhances the security and privacy of the data processing. According to the GDPR, pseudonymization is one of the measures that can help the company to implement the principles of data protection by design and by default, and to demonstrate compliance with the GDPR obligations. Moreover, the GDPR states that the further processing of pseudonymized data for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes is not considered to be incompatible with the initial purposes, provided that appropriate safeguards are in place to protect the rights and freedoms of the data subjects. Therefore, pseudonymization can enable the company to use the data for other purposes that are beneficial for society or for innovation, without compromising the privacy of the individuals. NEW QUESTION # 183

Which GDPR requirement will present the most significant challenges for organizations with Bring Your Own Device (BYOD) programs?

- A. Personal data of data subjects must always be accurate and kept up to date.
- B. Data subjects must be sufficiently informed of the purposes for which their personal data is processed.
- C. Processing of special categories of personal data on a large scale requires appointing a DPO.
- **D. Data controllers must be in control of the data they hold at all times.**

Answer: D

Explanation:

According to the Free CIPP/E Study Guide, page 12, "the GDPR requires data controllers to implement appropriate technical and organizational measures to ensure and to be able to demonstrate that processing is performed in accordance with the GDPR. These measures should take into account the nature, scope, context and purposes of processing as well as the risks of varying likelihood and severity for the rights and freedoms of natural persons." The GDPR also requires data controllers to ensure the security of personal data, to notify data breaches to the supervisory authorities and data subjects, and to cooperate with the supervisory authorities in providing any information necessary for the performance of their tasks. Therefore, the GDPR requirement that data controllers must be in control of the data they hold at all times will present the most significant challenges for organizations with BYOD programs, as they will have to deal with the increased risks of data loss, theft, unauthorized access, or misuse that may arise

from the use of personal devices by employees or contractors. The other options are not necessarily more challenging for organizations with BYOD programs, although they may involve other obligations under the GDPR, such as obtaining a valid legal basis, providing adequate safeguards, or informing the data subjects. NEW QUESTION # 184

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA.

Today, it is a multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father's company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company's online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers' philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer's personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend's daughter, Alice, who just graduated from law school in the U.S., to be the company's new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company's operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm.

Ben's collection of additional data from customers created several potential issues for the company, which would most likely require what?

- A. A data protection impact assessment.
- B. A comprehensive data inventory.
- C. Hiring a data protection officer.
- **D. New corporate governance and code of conduct.**

Answer: D

NEW QUESTION # 185

Which judicial body makes decisions on actions taken by individuals wishing to enforce their rights under EU law?

- A. European Data Protection Board
- **B. Court of Justice of European Union**
- C. Court of Auditors
- D. European Court of Human Rights

Answer: B

Explanation:

The Court of Justice of the European Union (CJEU) is the judicial body of the EU that makes decisions on issues of EU law and enforces European decisions either in respect to actions taken by the European Commission against a member state or actions taken by individuals to enforce their rights under EU law. The CJEU consists of two courts: the Court of Justice and the General Court.

The CJEU ensures the uniform interpretation and application of EU law across the EU and settles disputes between EU institutions, member states, and individuals.

The other options are not correct, as they are not the judicial bodies that make decisions on actions taken by individuals wishing to enforce their rights under EU law. The Court of Auditors is the EU's independent external auditor that checks the legality and regularity of the EU's revenue and expenditure, and the soundness of its financial management. The European Court of Human Rights (ECHR) is an international court that oversees the European Convention on Human Rights and Fundamental Freedoms of 1950. The ECHR is not linked to the EU institutions, and it covers human rights laws across Europe, including in many non-EU countries. The European Data Protection Board (EDPB) is an independent body that ensures the consistent application of the GDPR and issues opinions on various aspects of data protection, but it does not have judicial authority.

NEW QUESTION # 186

Which GDPR requirement will present the most significant challenges for organizations with Bring Your Own Device (BYOD) programs?

- A. Personal data of data subjects must always be accurate and kept up to date.
- B. Data subjects must be sufficiently informed of the purposes for which their personal data is processed.
- C. Processing of special categories of personal data on a large scale requires appointing a DPO.
- **D. Data controllers must be in control of the data they hold at all times.**

Answer: D

Explanation:

According to the Free CIPP/E Study Guide, page 12, "the GDPR requires data controllers to implement appropriate technical and organizational measures to ensure and to be able to demonstrate that processing is performed in accordance with the GDPR. These measures should take into account the nature, scope, context and purposes of processing as well as the risks of varying likelihood and severity for the rights and freedoms of natural persons." The GDPR also requires data controllers to ensure the security of personal data, to notify data breaches to the supervisory authorities and data subjects, and to cooperate with the supervisory authorities in providing any information necessary for the performance of their tasks. Therefore, the GDPR requirement that data controllers must be in control of the data they hold at all times will present the most significant challenges for organizations with BYOD programs, as they will have to deal with the increased risks of data loss, theft, unauthorized access, or misuse that may arise from the use of personal devices by employees or contractors. The other options are not necessarily more challenging for organizations with BYOD programs, although they may involve other obligations under the GDPR, such as obtaining a valid legal basis, providing adequate safeguards, or informing the data subjects.
