

# CCAAK Certification Exam & CCAAK Detail Explanation

DOWNLOAD the newest VCE4Plus CCAAK PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=190ET2XHEU8cbRnWO3xhkbymclPnUjaav>

Studies show that some new members of the workforce are looking for more opportunity to get promoted but get stuck in an awkward situation, because they have to make use of their fragment time and energy to concentrate on CCAAK exam preparation. Our CCAAK exam materials embrace much knowledge and provide relevant exam bank available for your reference, which matches your learning habits and produces a rich harvest of the exam knowledge. You can not only benefit from our CCAAK Exam Questions, but also you can obtain the CCAAK certification.

## Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Kafka Connect: This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Troubleshooting: This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.</li></ul>

## Confluent CCAAK Detail Explanation - New CCAAK Dumps Pdf

You must believe that you have extraordinary ability to work and have an international certificate to prove your inner strength. You will definitely be the best one among your colleagues. The help you provide with our CCAAK Learning Materials is definitely what you really need. And if you study with our CCAAK exam braindumps, you will know your dream clearly. Join CCAAK study guide and you will be the best person!

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q20-Q25):

### NEW QUESTION # 20

Your organization has a mission-critical Kafka cluster that must be highly available. A Disaster Recovery (DR) cluster has been set up using Replicator, and data is continuously being replicated from source cluster to the DR cluster. However, you notice that the message on offset 1002 on source cluster does not seem to match with offset 1002 on the destination DR cluster.

Which statement is correct?

- A. The message on DR cluster got over-written accidentally by another application.
- B. The offsets for the messages on the source, destination cluster may not match.
- C. The message was updated on source cluster, but the update did not flow into destination DR cluster and errored.
- D. The DR cluster is lagging behind updates; once the DR cluster catches up, the messages will match.

### Answer: B

Explanation:

When using Confluent Replicator (or MirrorMaker), offsets are not preserved between the source and destination Kafka clusters. Messages are replicated based on content, but they are assigned new offsets in the DR (destination) cluster. Therefore, offset 1002 on the source and offset 1002 on the DR cluster likely refer to different messages, which is expected behavior.

### NEW QUESTION # 21

Which use cases would benefit most from continuous event stream processing? (Choose three.)

- A. Log monitoring/application fault detection
- B. Fraud detection
- C. Historical dashboards
- D. Context-aware product recommendations for e-commerce
- E. End-of-day financial settlement processing

### Answer: A,B,D

Explanation:

Real-time analysis of transactions helps detect suspicious activity instantly.

Context-aware product recommendations for e-commerce requires real-time user behavior tracking to serve personalized recommendations.

Log monitoring/application fault detection needs immediate processing to alert on system issues or failures.

### NEW QUESTION # 22

In certain scenarios, it is necessary to weigh the trade-off between latency and throughput. One method to increase throughput is to configure batching of messages.

In addition to batch.size, what other producer property can be used to accomplish this?

- A. compression
- B. linger.ms
- C. delivery.timeout.ms
- D. sendbufferbytes

## Answer: B

Explanation:

The linger.ms property sets the maximum time the producer will wait before sending a batch, even if the batch isn't full. By increasing linger.ms, you allow more records to accumulate in the batch.

## NEW QUESTION # 23

Which property in broker configuration specifies that a broker belongs to a particular rack?

Which property in broker configuration specifies that a broker belongs to a particular rack?

- A. client.rack
- **B. broker.rack**
- C. kafka.rack
- D. zookeeper.rack

## Answer: B

Explanation:

The broker.rack property is used in a Kafka broker's configuration to specify the rack or availability zone the broker belongs to. This is important for rack-aware replica placement, allowing Kafka to distribute replicas across different racks for fault tolerance.

## NEW QUESTION # 24

Multiple clients are sharing a Kafka cluster.

As an administrator, how would you ensure that Kafka resources are distributed fairly to all clients?

- A. ACLs
- B. Consumer Groups
- **C. Quotas**
- D. Rebalancing

## Answer: C

Explanation:

Kafka quotas allow administrators to control and limit the rate of data production and consumption per client (producer/consumer), ensuring fair use of broker resources among multiple clients.

## NEW QUESTION # 25

.....

After cracking the Confluent Certified Administrator for Apache Kafka (CCAAK) exam you will receive the credential badge. It will pave your way toward well-paying jobs or promotions in any reputed tech company. At VCE4Plus have customizable Confluent Certified Administrator for Apache Kafka (CCAAK) practice exams for the students to review and improve their preparation. The Confluent Certified Administrator for Apache Kafka (CCAAK) practice test material product of VCE4Plus are created by experts with the dedication to help customers crack the Confluent Certified Administrator for Apache Kafka (CCAAK) exam on the first attempt.
