## **LEED-Green-Associate New Exam Materials - Valid Test LEED-Green-Associate Tips**

With the improvement of people's living standards, there are more and more highly educated people. To defeat other people in the more and more fierce competition, one must demonstrate his extraordinary strength. Today, getting LEED-Green-Associate certification has become a trend, and LEED-Green-Associate exam dump is the best weapon to help you pass certification. In order to gain the trust of new customers, LEED-Green-Associate practice materials provide 100% pass rate guarantee for all purchasers. We have full confidence that you can successfully pass the exam as long as you practice according to the content provided by LEED-Green-Associate exam dump. Of course, if you fail to pass the exam, we will give you a 100% full refund.

## **USGBC LEED Green Associate Exam Sample Questions (Q63-Q68):**

### **NEW QUESTION # 63**

Which strategy is an example of permanent entryway systems used to reduce dust, dirt and contaminants brought into a facility?

- A. Placing grilles, grates or mats at all major entrances
- B. Installing outdoor air monitoring equipment
- C. Conducting a thermal comfort survey
- D. Providing sensors at all entrances

**Answer: A**

Explanation:

Placing grilles, grates or mats at all major entrances is an example of permanent entryway systems used to reduce dust, dirt and contaminants brought into a facility. Permanent entryway systems are designed to capture dirt and particulates from people's shoes and prevent them from entering the indoor environment. This improves the indoor air quality and reduces the need for cleaning and maintenance. The LEED Green Associate Candidate Handbook states that one of the strategies for achieving indoor environmental quality is to "use permanent entryway systems (grilles, grates, mats) to reduce particulate matter being brought into buildings at regular entryways" [1, p. 16]. Reference: LEED Green Associate Candidate Handbook, [Indoor Environmental Quality | U.S. Green Building Council]

### **NEW QUESTION # 64**

What is the percentage rule when making a decision on the rating system that is most appropriate to use for a project?

- A. 40/60 rule
- B. 30/70 rule
- C. 50/50 rule
- D. 60/40 rule

**Answer: A**

Explanation:

The percentage rule is a method to determine the most appropriate LEED rating system for a project when several rating systems may be applicable<sup>1</sup>. To use this rule, first assign a rating system to each square foot or square meter of the building, and then choose the most appropriate rating system based on the resulting percentages<sup>1</sup>. The entire gross floor area of a LEED project must be

certified under a single rating system and is subject to all prerequisites and attempted credits in that rating system<sup>1</sup>. The percentage rule states that if one rating system covers more than 60% of the gross floor area, that rating system should be used<sup>1</sup>. If no rating system covers more than 60% of the gross floor area, but one covers more than 40%, then that rating system should be used<sup>1</sup>. If no rating system covers more than 40% of the gross floor area, then the project team can choose any applicable rating system<sup>1</sup>. Therefore, the answer is B. 40/60 rule.

#### NEW QUESTION # 65

According to the Indoor Environmental Quality credit category, which of the following is considered an unoccupied space?

- A. Restroom
- **B. Mechanical and electrical rooms**
- C. Corridor
- D. School classroom

**Answer: B**

#### NEW QUESTION # 66

Which of the following is the reason Regional Priority credits are awarded?

- A. To encourage exemplary performance
- **B. To address local environmental issues**
- C. To promote innovation in building design
- D. To help meet economic goals

**Answer: B**

Explanation:

Regional Priority credits are awarded to encourage projects to address local environmental issues that are of particular importance or concern for the region where the project is located. These issues may include water scarcity, air quality, habitat protection, or human health. Regional Priority credits are not new LEED credits, but rather existing credits that have been identified by regional councils or chapters of USGBC as having higher priority or relevance for their areas. Projects can earn up to four bonus points by achieving Regional Priority credits. References: LEED v4 BD+C Reference Guide, Introduction, page 13; LEED v4 Impact Category and Point Allocation Process Overview<sup>1</sup>

#### NEW QUESTION # 67

Which of the following benefits could result from achieving LEED certification for a building?

- **A. Qualification for tax rebates**
- B. Preferred public parking
- C. Increased waste to landfills
- D. Dedicated public transportation infrastructure

**Answer: A**

Explanation:

LEED certification can provide financial benefits for a building, such as qualification for tax rebates, zoning allowances, and other incentives from local and state governments. These incentives can help offset the initial costs of green building and encourage more projects to pursue LEED. References: LEED v4 Green Associate Candidate Handbook, LEED v4 BD+C Reference Guide

#### NEW QUESTION # 68

.....

When some candidates trying to overcome an exam, they will all first think of choosing a good study material to prepare for their exam. The LEED Green Associate Exam prep torrent has a variety of self-learning and self-assessment functions to test learning

outcome, which will help you increase confidence to pass exam. Last but not least, our website platform has no viruses and you can download LEED-Green-Associate Test Guide at ease. If you encounter difficulties in installation or use of LEED-Green-Associate exam torrent, we will provide you with remote assistance from a dedicated expert to help you and provide 365 days of free updates that you do not have to worry about what you missed.
