

# CWAP-405 Valid Test Pdf, CWAP-405 Reliable Test Pattern

BTW, DOWNLOAD part of Fast2test CWAP-405 dumps from Cloud Storage: <https://drive.google.com/open?id=1Zg9PNs4tS5zQC7F-idXYBy368wY9axG6>

It is known to us that the error correction is very important for these people who are preparing for the CWAP-405 exam in the review stage. It is very useful and helpful for a lot of people to learn from their mistakes, because many people will make mistakes in the same way, and it is very bad for these people to improve their accuracy. If you want to correct your mistakes when you are preparing for the CWAP-405 Exam, the study materials from our company will be the best choice for you.

The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The CWAP-405 quiz guide through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The CWAP-405 prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the CWAP-405 qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's CWAP-405 exam. CWAP-405 test material will improve the ability to accurately forecast the topic and proposition trend this year.

## First-Grade CWAP-405 Valid Test Pdf | Easy To Study and Pass Exam at first attempt & Top CWNP Certified Wireless Analysis Professional

All of our considerate designs have a strong practicability. We are still researching on adding more useful buttons on our CWAP-405 test answers. The aim of our design is to improve your learning and all of the functions of our products are completely real. Then the learning plan of the CWAP-405 Exam Torrent can be arranged reasonably. You need to pay great attention to the questions that you make lots of mistakes. If you are interested in our products, click to purchase and all of the functions. Try to believe us and give our CWAP-405 exam guides a chance to certify.

## CWNP Certified Wireless Analysis Professional Sample Questions (Q59-Q64):

### NEW QUESTION # 59

You are using a laptop-based protocol analyzer to scan all channels and determine the basic configuration of the WLAN Basic Service Set in your facility. You are scanning all channels. All configured with default settings.

What can you change to cause the scan to run faster while still APs are capturing beacon frames on all the channels?

- A. Configure the scan time for channels to 300-500 ms
- **B. Configure the RBW to more than 120 kHz**
- C. Configure the scan time for channels to <100 ms
- D. Configure the fragmentation threshold to 1500 bytes

**Answer: B**

### NEW QUESTION # 60

You are responsible for troubleshooting and analysis of the WLAN in your organization that supports more than 700 client STAs. Forty APs are deployed and they are all dual-band APs and are controller-based. You must troubleshoot the wired side in some scenarios using a protocol analyzer.

Which one of the following problems would warrant wired-side analysis in most situations?

- A. DHCP problems
- B. High 802.11 retry rates
- C. High 802.11 CRC rates
- **D. WMM QoS issues**

**Answer: D**

### NEW QUESTION # 61

What interframe space would be expected between a CTS and a Data frame?

- **A. SIFS**
- B. DIFS
- C. PIFS
- D. AIFS

**Answer: A**

Explanation:

The interframe space that would be expected between a CTS (Clear to Send) and a Data frame is SIFS (Short Interframe Space). A SIFS is the shortest interframe space that is used for high-priority transmissions, such as ACKs (Acknowledgements), CTSs, or data frames that are part of a fragmentation or aggregation process. A SIFS is a fixed value that depends on the PHY type and channel width. A CTS and a Data frame are part of a virtual carrier sense mechanism called RTS/CTS (Request to Send/Clear to Send), which is used to avoid collisions and hidden node problems in wireless transmissions. When a STA (station) wants to send a data frame, it first sends an RTS frame to the intended receiver, indicating the duration of the transmission. The receiver then responds with a CTS frame, also indicating the duration of the transmission. The other STAs in the vicinity hear either the RTS or the CTS frame and update their NAV (Network Allocation Vector) timers accordingly, deferring their access to the medium until the transmission is over. The sender then sends the data frame after waiting for a SIFS, followed by an ACK frame from the receiver after another SIFS. The other options are not correct, as they are not used between a CTS and a Data frame. A PIFS (PCF Interframe Space) is used for medium access by the PCF (Point Coordination Function), which is an optional and rarely implemented polling-based mechanism that provides contention-free service for time-sensitive traffic. An AIFS (Arbitration Interframe Space) is used for medium access by different ACs (Access Categories), which are logical queues that correspond to different QoS (Quality of Service) levels for different types of traffic. An AIFS is a variable interframe space that depends on the AIFSN (Arbitration Interframe Space Number) value of each AC. A DIFS (Distributed Interframe Space) is used for medium access by the DCF (Distributed Coordination Function), which is the default and mandatory contention-based mechanism that provides best-effort service for normal traffic. ### NEW QUESTION # 62

Given a protocol analyzer can decrypt WPA2-PSK data packets providing the PSK and SSID are configured in the analyzer software. When performing packet capture (in a non-FT environment) which frames are required in order for PSK frame decryption to be possible?

- A. Authentication
- B. Probe Response
- C. 4-Way Handshake
- D. Reassociation

**Answer: C**

Explanation:

The 4-way handshake is the process that establishes the pairwise transient key (PTK) between the client and the AP in WPA2-PSK. The PTK is derived from the PSK, the SSID, and some random numbers exchanged in the handshake frames. The PTK is used to encrypt and decrypt the data frames between the client and the AP. Therefore, in order to decrypt WPA2-PSK data packets, a protocol analyzer needs to capture the 4-way handshake frames and have the PSK and SSID configured in the analyzer software.<sup>12</sup> References:

### NEW QUESTION # 63

ABC Company requires the ability to identify and quickly locate rogue devices. ABC has chosen an overlay WIPS solution with Wi-Fi sensors that use dipole antennas to perform this task. No other sensors are included. Use your knowledge of location tracking techniques to answer the question.

Which one of the following location methods is not available in the described system?

- A. Trilateration of RSSI measurements
- B. GPS Positioning
- C. RF Fingerprinting
- D. Time Difference of Arrival (TDoA)

**Answer: C**

### NEW QUESTION # 64

.....

The CWAP-405 exam dumps are designed efficiently and pointedly, so that users can check their learning effects in a timely manner after completing a section. Good practice on the success rate of CWAP-405 quiz guide is not fully indicate that you have mastered knowledge is skilled, therefore, the CWAP-405 test material let the user consolidate learning content as many times as possible, although the practice seems very boring, but it can achieve the result of good consolidate knowledge. More importantly, you can pass the CWAP-405 exam and get the dreaming CWAP-405 certification.
