最新的 Salesforce Consultant Media-Cloud-Consultant 免費考試真題 (Q91-Q96):

問題 #91

Cloud kicks is using the google ad manager platform and there is an issue occurring at some point in the transmission of data between the system when an insertion document is being created. What can a consultant do to gather information about the data being passed between the system?

- A. create a report against the process exception object and resend the insertion Order. if the error continues to occur, consult the report created by the consultant
- B. review the payloads found on the orchestration plan item records
- C. create a list view for the process exception object to show records that match the criteria and consult the results
- D. start a trace flag under the debug logs, send the payload again, and search for errors

答案: D

解題說明:

To gather information about the data being passed between systems, particularly when an issue occurs during the transmission of data for an insertion order, a consultant can start a trace flag under the debug logs, resend the payload, and search for errors (A). This method allows for real-time monitoring and logging of system processes, helping to identify and diagnose the exact point of failure or error in the data transmission.

問題 #92

What happens when a required placement is unavailable in the ad server during the check availability process with google Ad manager?]

- A. a yellow check mark appears if partial quantity is available and red if none is available
- B. the check availability action returns the available quantity for manual adjustment
- C. the check availability action updates the quantity to the available quantity
- D. a red check mark appears in the availability column

答案: A

解題說明:

During the check availability process with Google Ad Manager, if a required placement is unavailable, a yellow check mark appears if partial quantity is available, and a red check mark if none is available (C). This visual indicator helps users quickly understand the availability status of placements and make informed decisions about adjusting campaign plans or exploring alternative options.

問題 #93

When a media plan is submitted to the ad servers, there is an error related to missing creative or a [...] related to a change in the program schedule. How can this error or notification be made visible on media cloud?

- A. through data present on media cloud'
- B. through campaign analytics report
- C. through einstein for ad server
- D. through real-time integration to ad server

答案: D

解題說明:

When a media plan is submitted to the ad servers and there's an error related to missing creative or a notification related to a change in the program schedule, this information can be made visible on Media Cloud through real-time integration to the ad server (B). Real-time integration ensures that any errors or updates from the ad server are immediately reflected in Media Cloud, allowing for

prompt action and resolution.

問題 #94

A media publisher is using advertising sales management to manage their b2b ad sales business using google ad manager. A consultant added a new placement on an existing media plan. When adding the new placement, the media plan remains in an inactive state in GAM. What should the consultant do to clear the inactive state after adding the new placement?

- A. delete and add the placement again in ASM
- B. delete and create the media campaign again in asm
- C. override creative settings in GAM
- **D. add the creatives to the line items in GAM**

答案： D

解題說明：

When a new placement is added to an existing media plan in Advertising Sales Management (ASM) and the plan remains in an inactive state in Google Ad Manager (GAM), the consultant should ensure that the creatives are added to the corresponding line items in GAM. This action is necessary because GAM requires creatives to be associated with line items for them to become active and for the ads to be served. Adding the creatives completes the setup process in GAM and changes the status from inactive to active, allowing the media plan to be executed as intended. References: <https://help.salesforce.com/>

問題 #95

Which standard media cloud advertising sales management component gathers live and campaign performance data?

- A. CRM analytics
- B. salesforce dashboards
- **C. marketing cloud intelligence**
- D. tableau

答案： C

解題說明：

The standard Media Cloud Advertising Sales Management component that gathers live and campaign performance data is Marketing Cloud Intelligence. This tool provides advanced analytics capabilities, allowing users to track and analyze the performance of advertising campaigns across various channels and platforms in real-time. Marketing Cloud Intelligence enables data-driven decision-making by offering insights into campaign effectiveness and audience engagement.

問題 #96

.....

為什麼Fast2test Salesforce的Media-Cloud-Consultant考試培訓資料與別的培訓資料相比，它更受廣大考生的歡迎呢，第一，這是共鳴的問題，我們必須真正瞭解考生的需求，而且要比任何網站都要全面到位。第二，專注，為了做好我們決定完成的事情，必須放棄所有不重要的機會。第三，人們的確會用表面來判斷一個東西的好壞，我們或許擁有最優秀最高品質的產品，但如果以粗製濫造的方式展示出來，自然會被列為粗製濫造的產品，如果以既有創意又很專業的方式呈現，那麼我們將得到最高的效果。Fast2test Salesforce的Media-Cloud-Consultant考試培訓資料就是這樣成功的培訓資料，舍它其誰？
