## Pass Guaranteed Quiz 2026 Latest APMG-International ISO-IEC-27001-Foundation: ISO/IEC 27001 (2022) Foundation Exam Relevant Answers

How can you pass your exam and get your certificate in a short time? Our ISO-IEC-27001-Foundation exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our ISO/IEC 27001 (2022) Foundation Exam exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our ISO-IEC-27001-Foundation Test Quiz, you will find it is very easy for you to pass your exam in a short time. You just need to spend 20-30 hours on studying; you will have more free time to do other things.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q49-Q54):

#### NEW QUESTION # 49

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Producing a risk assessment report
- **B. Ensuring information security objectives are established**
- C. Communicating feedback from interested parties to the organization
- D. Implementing the actions from internal audits

**Answer: B**

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

\* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

\* "ensuring the integration of the ISMS requirements into the organization's processes;"

\* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

#### NEW QUESTION # 50

Which statement describes a requirement for information security objectives?

- A. They shall all be measurable
- B. They shall be reviewed at least annually
- C. They shall be contractually transferred to third parties
- **D. They shall be consistent with the information security policy**

**Answer: D**

Explanation:

Clause 6.2 (Information security objectives) requires that objectives:

- \* "be consistent with the information security policy"
- \* "be measurable (if practicable)"
- \* "take into account applicable information security requirements"
- \* "be monitored, communicated, and updated as appropriate."

From this, option A is correct since consistency with policy is an explicit requirement. Option B is incorrect because the standard allows objectives to be measurable "if practicable" (not mandatory for all). Option C is incorrect-objectives are not transferred contractually to third parties, though third-party agreements may include security requirements. Option D is incorrect because the standard requires regular review "as appropriate," not a fixed annual cycle.

Thus, the verified requirement is A: They shall be consistent with the information security policy.

### NEW QUESTION # 51

Which statement about the conduct of audits is true?

- A. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- **B. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- C. Third party audits are conducted by a customer of the organization
- D. During Stage 1 of a certification audit, evidence is collected by observing activities

**Answer: B**

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

### NEW QUESTION # 52

Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO/IEC 27001?

- A. To ensure that employees and contractors are competent
- **B. To evaluate information security performance**
- C. To monitor the use of information assets
- D. To track the use of outsourced processes

**Answer: B**

Explanation:

Clause 9.1 requires:

"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.

Thus, the verified purpose is A: To evaluate information security performance.

### NEW QUESTION # 53

To whom does the scope of the Terms and conditions of employment control apply?

- A. Contractors only
- B. Personnel and the organization
- C. Employees only
- D. All employees, contractors and third-party users

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

### NEW QUESTION # 54

.....

Candidates who don't find actual ISO-IEC-27001-Foundation Questions remain unsuccessful in the APMG-International ISO-IEC-27001-Foundation test and lose their resources.
