Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 2	• This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.

Topic 3	• Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response. • Data Protection Services
Topic 4	• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 5	• Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.

Your success is 100% ensured to pass the ZDTA exam and acquire the dreaming certification which will enable you to reach for more opportunities to higher incomes or better enterprises.

Zscaler Digital Transformation Administrator Sample Questions (Q119-Q124):

NEW QUESTION # 119

Is SCIM required for ZIA?

- A. Maybe
- B. Yes
- **C. No**
- D. Depends

Answer: C

Explanation:

SCIM is optional for ZIA user provisioning - you can onboard users via manual CSV import, SAML attributes, or other identity integrations without implementing SCIM.

NEW QUESTION # 120

Can URL Filtering make use of Cloud Browser Isolation?

- A. No. Cloud Browser Isolation is only a feature of Advanced Threat Defense.
- B. No. Cloud Browser Isolation is a separate platform.
- **C. Yes. Isolate is a possible Action for URL Filtering.**
- D. Yes. After blocking access to a site, the user can manually switch on isolation.

Answer: C

Explanation:

Yes, URL Filtering can make use of Cloud Browser Isolation. Specifically, "Isolate" is an available action in URL Filtering policies that enables users to access potentially risky or untrusted websites in an isolated environment, preventing any malicious content from reaching the user's device.

The study guide explains that integrating Cloud Browser Isolation into URL Filtering enhances security by isolating risky browsing activities directly from policy enforcement points.

NEW QUESTION # 121

What are common delivery mechanisms for malware?

- A. Malware downloads from web pages
- B. Spam, exploit kits, USB drives, video streaming
- C. Personal emails, company documents, OneDrive
- D. Phishing, Exploit Kits, Watering Holes, Pre-existing Compromise

Answer: D

Explanation:

Phishing campaigns, exploit kits, watering#hole sites, and leveraging an existing compromise are all widely observed vectors for delivering malware, as they effectively trick users or exploit vulnerabilities to gain initial footholds.

NEW QUESTION # 122

How do Access Policies relate to the Application Segments and Application Segment Groups?

- A. When a condition is met, an Access Policy can allow access to Application Segments Groups and block access to Application Segment.
- B. When a condition is met, an Access Policy can allow access to Application Segments and block access to Application Segment Groups.
- C. When a condition is met, an Access Policy can either allow or block access to Application Segments OR Application Segment Groups.
- D. When a condition is met, an Access Policy can either allow or block access to Application Segments and Application Segment Groups.

Answer: D

Explanation:

Access Policies apply the same allow-or-block decision to both individual Application Segments and to Application Segment Groups when their rule conditions are met.

NEW QUESTION # 123

Which SaaS platform is supported by Zscaler's SaaS Security Posture Management (SSPM)?

- A. Dropbox
- B. Google Workspace
- C. Webex Teams
- D. Amazon S3

Answer: A

Explanation:

Zscaler's SaaS Security Posture Management natively supports platforms such as Microsoft 365, Google Workspace, Slack, Salesforce, and Atlassian, so among the options listed, Google Workspace is the supported platform.

NEW QUESTION # 124

.....

When preparing for the ZDTA exam, a good source of information is what candidates need most, and the price of the materials is

one of the important factors to be considered when a candidate choosing.
