ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q172-Q177):

NEW QUESTION # 172

In regard to stakeholder requirements, which of the following sentences is true?

- A. They set what the users desire from their perspective.
- B. They set what the system shall do.
- C. They set business goals and objectives of an organization.
- D. They set required domain properties.

Answer: A

Explanation:

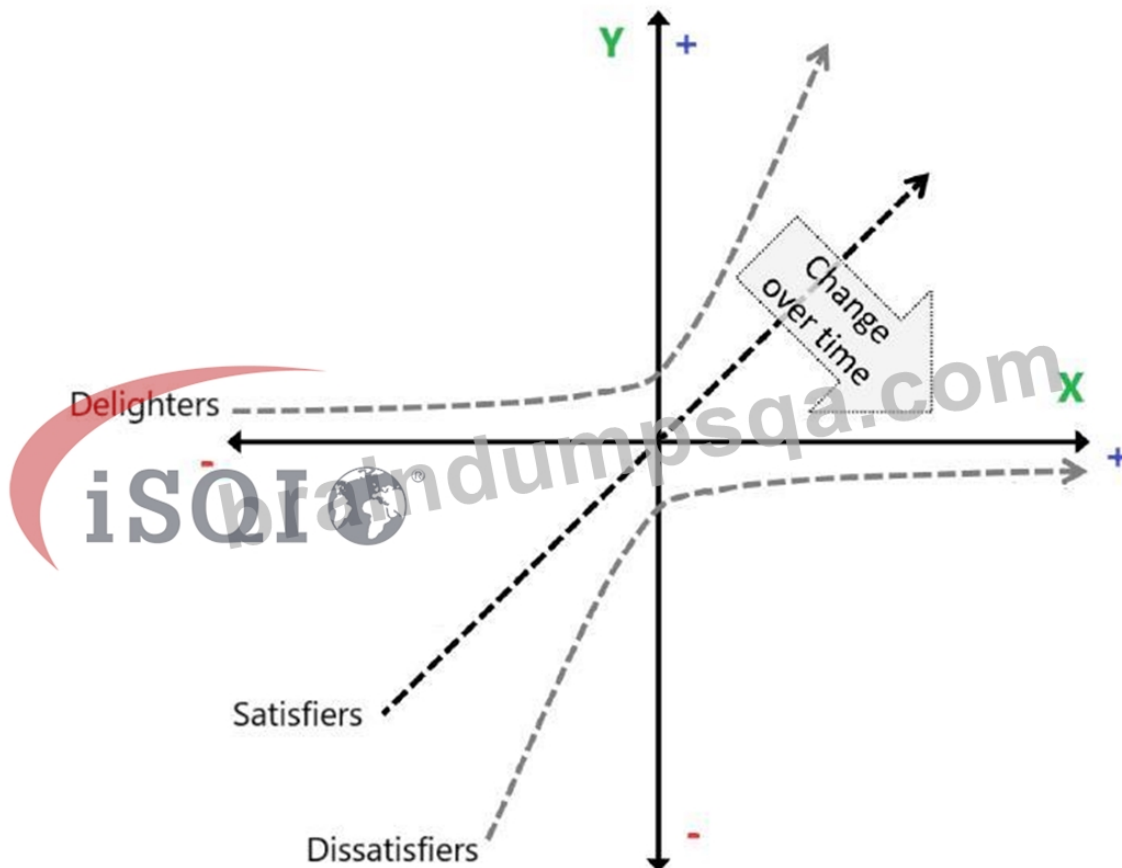

Comprehensive and Detailed Explanation From Exact Extract:

The CPRE materials distinguish several abstraction levels: business, stakeholder (including user), system and domain requirements. Business requirements express organizational goals. Stakeholder requirements describe what stakeholders, including users, want from their point of view, often in their language and context. User requirements are a subset of stakeholder requirements. System requirements refine these into what the system must do or how it must behave, while domain requirements describe properties and rules of the domain itself.

Therefore the statement that stakeholder requirements set what users desire from their perspective is the best fit among the options.

NEW QUESTION # 173

Consider the following representation of the Kano model (diagram).

Which option best describes what the axes Y and X represent?

- A. Y = Implementation of requirements; X = Happiness of stakeholders
- B. Y = Happiness of stakeholders; X = Implementation of requirements
- C. Y = Customer satisfaction; X = Specified requirements
- D. Y = Customer satisfaction; X = Implementation of requirements

Answer: D

NEW QUESTION # 174

Select the two typically lowest abstraction levels among the following options.

- A. Stakeholder
- B. User
- C. Component
- D. System
- E. Business

Answer: C,D

NEW QUESTION # 175

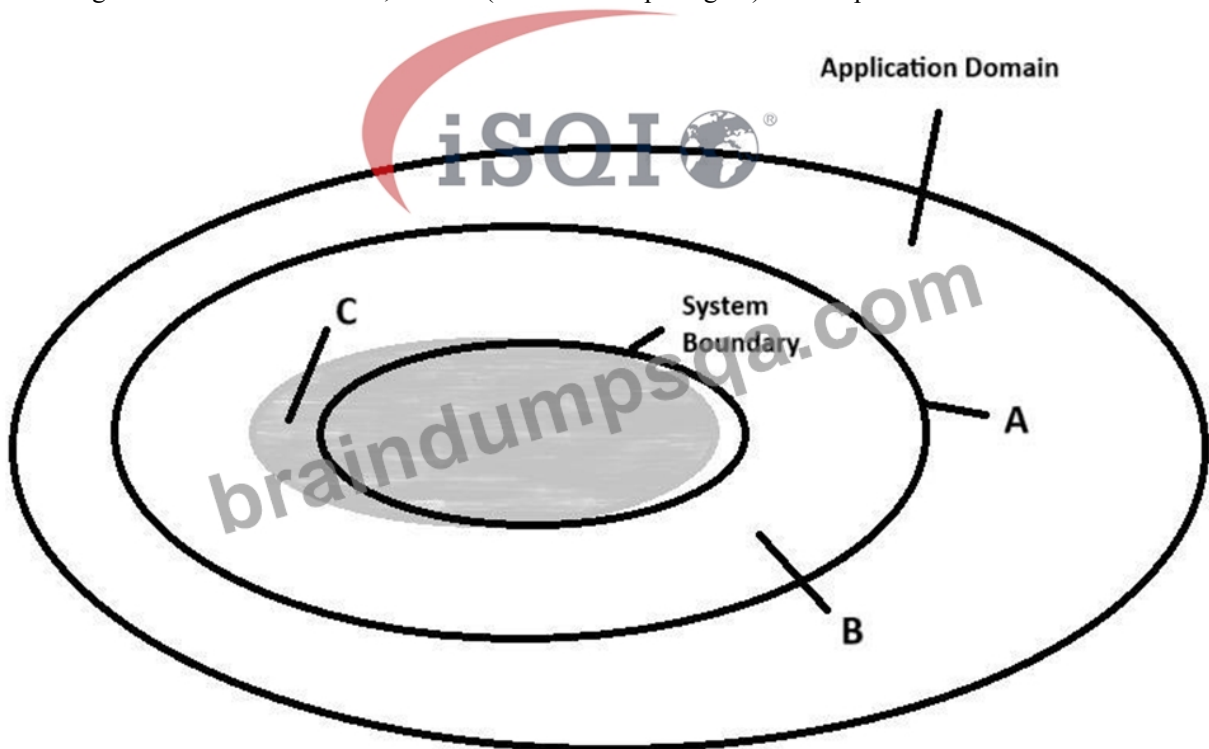

A linear, explorative and customer-specific RE process is called:

- A. All the other options are wrong
- B. Product-Oriented RE Process
- C. Contractual RE Process
- D. Participatory RE Process

Answer: A

NEW QUESTION # 176

Look at the figure of nested ovals labeled A, B and C (context and scope diagram). Which option best matches these labels?

- A. A - Context boundary; B - Context; C - Scope of the system
- B. A - Context boundary; B - Context; C - System

- C. A - Environment; B - Context boundary; C - System scope
- D. A - Environment; B - Context boundary; C - Scope of the system

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In the CPRE context figure, the outer oval represents the application domain; the inner grey region denotes the scope of the system (things that can be designed), and an intermediate ring indicates the system context.

The line separating relevant from irrelevant parts of the environment is the context boundary. Label A is on this boundary. Label B points to the context area between boundary and system, and label C points to the grey scope region. Thus, the correct mapping is A - context boundary, B - context, C - system scope.
