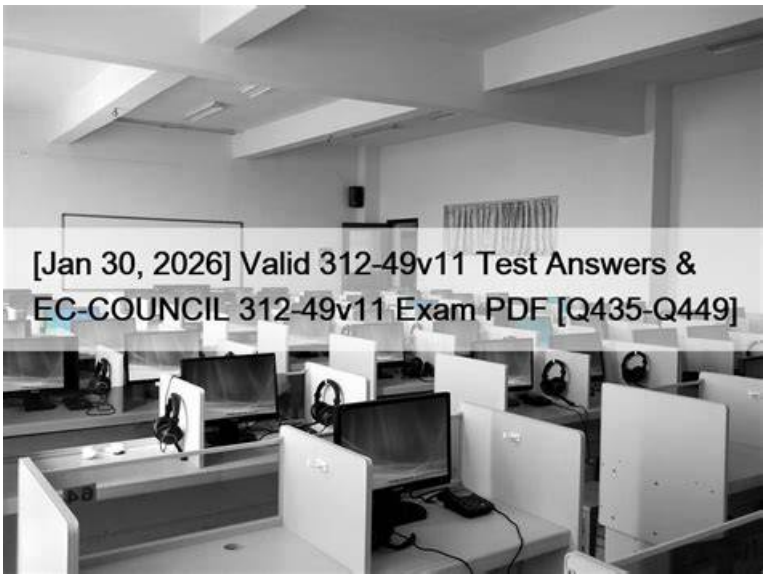
Free 312-49v11 Sample | 312-49v11 Latest Test Simulations



What's more, part of that TrainingQuiz 312-49v11 dumps now are free: https://drive.google.com/open?id=1qgVPrD_Cgdlh1sU1G3JDoj1lPRzIBUFL

The 312-49v11 exam dumps are the ideal study material for quick and complete 312-49v11 exam preparation. The real and top-notch EC-COUNCIL 312-49v11 exam questions are being offered in three different formats. These formats are EC-COUNCIL 312-49v11 PDF Dumps Files, desktop practice test software, and web-based practice test software.

EC-COUNCIL 312-49v11 Exam Syllabus Topics:

Topic	Details
Topic 1	• IoT Forensics: This domain addresses IoT device investigation including architecture, OWASP IoT threats, forensic processes, wearable and smart device analysis, hardware-level techniques (JTAG, chip-off), and drone data extraction.
Topic 2	• Dark Web Forensics: This domain addresses dark web investigation focusing on Tor browser artifact identification, memory dump analysis, and extracting evidence of dark web activities.
Topic 3	• Cloud Forensics: This domain covers cloud platform forensics (AWS, Azure, Google Cloud) including data storage, logging, forensic acquisition of virtual machines, and investigation of cloud security incidents.
Topic 4	• Linux and Mac Forensics: This domain addresses forensic methodologies for Linux and macOS systems including data collection, memory forensics, log analysis, APFS examination, and platform-specific investigation tools.
Topic 5	• Investigating Web Attacks: This domain covers web application forensics including IIS and Apache log analysis, OWASP Top 10 risks, and investigation of attacks like XSS, SQL injection, path traversal, command injection, and brute-force attempts.
Topic 6	• Defeating Anti-Forensics Techniques: This domain teaches methods to overcome evidence hiding techniques including data recovery, file carving, partition recovery, password cracking, steganography detection, encryption handling, and program unpacking.
Topic 7	• Network Forensics: This domain covers network incident investigation through traffic and log analysis, event correlation, indicators of compromise identification, SIEM usage, and wireless network attack detection and examination.

Topic 8	• Windows Forensics: This domain covers Windows-specific investigation techniques including volatile and non-volatile data collection, memory and registry analysis, web browser forensics, metadata examination, and analysis of Windows artifacts like ShellBags, LNK files, and event logs.
Topic 9	• Malware Forensics: This domain addresses malware investigation including controlled lab setup, static analysis, system and network behavior analysis, suspicious document examination, and ransomware investigation techniques.
Topic 10	• Mobile Forensics: This domain covers Android and iOS forensics including device architecture, forensics processes, cellular data investigation, file system acquisition, lock bypassing, rooting • jailbreaking, and mobile application analysis.
Topic 11	• Data Acquisition and Duplication: This domain addresses live and dead acquisition techniques, eDiscovery methodologies, data acquisition formats, validation procedures, write protection, and forensic image preparation for examination.
Topic 12	• Email and Social Media Forensics: This domain addresses email crime investigation including message analysis, U.S. email laws, social media activity tracking, footage extraction, and social network graph analysis.

EC-COUNCIL 312-49v11 Latest Test Simulations & New 312-49v11 Exam Pdf

Choosing TrainingQuiz's 312-49v11 exam training materials is the best shortcut to success. It will help you to pass 312-49v11 exam successfully. Everyone is likely to succeed, the key lies in choice. Under the joint efforts of everyone for many years, the passing rate of TrainingQuiz's EC-COUNCIL 312-49v11 Certification Exam has reached as high as 100%. Choosing TrainingQuiz is to be with success.

EC-COUNCIL Computer Hacking Forensic Investigator (CHFI-v11) Sample Questions (Q603-Q608):

NEW QUESTION # 603
During a targeted intrusion at a financial firm in Seattle, Washington, a forensic analyst must determine which log source can best help identify the initial inbound connection used by the attacker. The analyst has access to multiple network device logs, some showing packet rejections, others displaying decoy interactions, DHCP lease history, and intrusion alerts. Which log type should the analyst prioritize to trace the first connection attempt to the organization ' s internal host?

- A. IDS logs
- B. Firewall logs
- C. Honeypot logs
- D. DHCP logs

Answer: B

Explanation:
The correct answer is D because firewall logs are the most direct source for identifying initial inbound connection attempts to internal hosts. They typically record source and destination IP addresses, ports, protocols, allow or deny decisions, and timestamps for traffic crossing the network boundary. That makes them especially useful for tracing the first connection attempt made against the organization's internal systems. IDS logs are valuable for detecting suspicious patterns or known signatures, but they are not always the clearest source for establishing the earliest boundary-crossing connection itself. DHCP logs track IP address assignments, which helps with host attribution after the fact, and honeypot logs capture interactions with decoy systems rather than the real internal host mentioned in the question. CHFI v11 includes analysis of firewall, IDS, honeypot, router, and DHCP logs under network forensics, so this question is testing whether the examiner can match the investigative goal to the right source. When the objective is to identify the first inbound connection to an internal host, firewall logs should be prioritized.

NEW QUESTION # 604
During an insider threat investigation at a software company in Boston, forensic analysts suspect that a malicious utility was repeatedly executed to exfiltrate sensitive source code. They use Win Prefetch View to analyze Prefetch files from the compromised workstation. Which specific detail displayed by this tool helps investigators confirm the most recent execution of the utility?

- A. File Size
- B. Process EXE
- C. Last Run Time
- D. Run Counter

Answer: C

Explanation:
Last Run Time shows the most recent execution timestamp recorded in the Prefetch artifact for the program. This helps investigators confirm when the suspected utility was last run on the workstation.

NEW QUESTION # 605
What file is processed at the end of a Windows XP boot to initialize the logon dialog box?

- A. NTOSKRNL.EXE
- B. LSASS.EXE
- C. NTDETECT.COM
- D. NTLDR

Answer: B

NEW QUESTION # 606
Donald made an OS disk snapshot of a compromised Azure VM under a resource group being used by the affected company as a part of forensic analysis process. He then created a vhd file out of the snapshot and stored it in a file share and as a page blob as backup in a storage account under different region. What Is the next thing he should do as a security measure?

- A. Recommend changing the access policies followed by the company
- B. Delete the snapshot from the source resource group
- C. Create another VM by using the snapshot
- D. Delete the OS disk of the affected VM altogether

Answer: D

NEW QUESTION # 607
Damaged portions of a disk on which no read/Write operation can be performed is known as _____.

- A. Empty sector
- B. Bad sector
- C. Unused sector
- D. Lost sector

Answer: B

NEW QUESTION # 608
.....

Our company is professional brand. There are a lot of experts and professors in the field in our company. All the experts in our company are devoting all of their time to design the best 312-49v11 312-49v11 study materials for all people. In order to ensure quality of the products, a lot of experts keep themselves working day and night. We believe that our study materials will have the

ability to help all people pass their 312-49v11 Exam and get the related exam in the near future.
