NEW QUESTION # 71

An administrator upgrades FortiManager with workspace mode (per ADOM) enabled to the latest version but notices that the ADOM versions did not change.

Why were the ADOMs not upgraded?

- A. A FortiManager process task is stuck and blocking the ADOM upgrade, so the administrator must fix it.
- B. A user had all ADOMs locked before the upgrade, which stopped them from being upgraded.
- C. FortiManager does not automatically upgrade ADOMs after a firmware upgrade.
- D. The administrator did not run the database integrity check before performing the upgrade.

Answer: C

Explanation:

After a FortiManager firmware upgrade, ADOM versions are not automatically upgraded. This is by design, allowing administrators to manually control when to upgrade each ADOM, ensuring compatibility with the FortiGate firmware versions managed within those ADOMs.
