Juniper JN0-481 Discount, JN0-481 Latest Mock Test

No doubt the Juniper JN0-481 certification is a valuable credential that helps you to put your career on the right track and assist you to achieve your professional career goals. To achieve this goal you need to pass the Data Center, Specialist (JNCIS-DC) (JN0-481) exam. To pass the Data Center, Specialist (JNCIS-DC) (JN0-481) exam you need to start this journey with valid, updated, and real Juniper JN0-481 PDF QUESTIONS. The Actual4Exams JN0-481 exam practice test questions are essential study material for quick Juniper JN0-481 exam preparation.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which statement is correct about making changes to a predefined device profile in Juniper Apstra?

- A. Changing the predefined device profile will also affect deployed devices that use the same profile.
- B. You must reboot the Apstra server after changes are made to a predefined device profile before they will become active.
- C. The processor load on the Apstra server will be negatively impacted when changes are made to a predefined device profile.
- **D. The changes you make to a predefined device profile will be discarded and overwritten when upgrading the Apstra server version.**

Answer: D

Explanation:

A predefined device profile is a configuration template that is shipped with Apstra software and supports most qualified Juniper

devices. A predefined device profile cannot be changed, since any changes would be discarded and overwritten when you upgrade the Apstra server version. If you want to customize a predefined device profile, you can clone and edit it instead.

NEW QUESTION # 46

You are using Juniper Apstra to design a data center fabric. In this scenario, which object type associates a specific vendor model to a logical device?

- A. templates
- **B. device profiles**
- C. interface map
- D. agent profiles

Answer: B

Explanation:

Device profiles are objects that associate a specific vendor model to a logical device in Juniper Apstra. Device profiles contain extensive hardware model details, such as form factor, ASIC, CPU, RAM, ECMP limit, and supported features. Device profiles also define how configuration is generated, how telemetry commands are rendered, and how configuration is deployed on a device. Device profiles enable the Apstra system to render and deploy the configuration according to the Apstra Reference Design.

NEW QUESTION # 47

You are adding a new switch to Juniper Apstra software. The Managed Devices page shows the "0 OS- Quarantined" status. What is the proper next step to make the device ready for use in a blueprint?

- A. Take the device out of maintenance mode.
- B. Take the device out of drain state.
- C. Install the agent for the device.
- **D. Acknowledge the device.**

Answer: D

Explanation:

When a new switch is added to Juniper Apstra software, it initially shows the "0 OS-Quarantined" status, which means that the device is not yet managed by Apstra and has not been assigned to any blueprint. The proper next step to make the device ready for use in a blueprint is to acknowledge the device, which is a manual action that confirms the device identity and ownership. Acknowledging the device changes its status to "OOS-Ready", which means that the device is ready to be assigned to a blueprint and deployed.

NEW QUESTION # 48

In the Juniper Apstra design phase, which object dictates port count, port speed, and how the ports would be used?

- A. network devices
- B. rack type
- **C. interface map**
- D. logical devices

Answer: C

Explanation:

Interface maps are objects that map interfaces between logical devices and physical hardware devices in the Juniper Apstra design phase. They dictate port count, port speed, and how the ports would be used for achieving the intended network configuration rendering. Interface maps also allow you to select device ports, transformations, and interfaces, provision breakout ports, and disable unused ports.

NEW QUESTION # 49

What is the purpose of an interface map in Juniper Apstra?

- A. An interface map specifies a connection between the interfaces of two devices.
- B. An interface map specifies the number of ports and the port speeds of a logical device
- C. An interface map associates a logical device with a device profile.
- D. An interface map specifies the connections between racks in a template.

Answer: A

Explanation:

An interface map is a configuration template that maps interfaces between logical devices and physical hardware devices (represented with device profiles) while adhering to vendor specifications. An interface map specifies a connection between the interfaces of two devices, such as a leaf and a spine, a leaf and a server, or a leaf and an external gateway. An interface map can also specify port transformations, such as breaking out a 40 GbE port into four 10 GbE ports, or disabling unused ports. An interface map can be used to achieve the intended network configuration rendering and to enable features such as LAG, ESI-LAG, or MLAG.

NEW QUESTION # 50

.....

Our Actual4Exams have a lot of IT professionals and the exam practice questions and answers we provide have been certified by many IT elites. Besides, the exam practice questions and answers have wide coverage of the content of the examination and the correct rate is up to 100%. Although there are many similar websites, perhaps they can provide you study guide and online services, our Actual4Exams is leading these many websites. The reason of making the Actual4Exams stand out in so many peers is that we have a lot of timely updated practice questions and answers which accurately and correctly hit the exam. So we can well improve the exam pass rate and make the people ready to participate in Juniper Certification JN0-481 Exam safely use practice questions and answers provided by Actual4Exams to pass the exam. Actual4Exams 100% guarantee you to pass Juniper certification JN0-481 exam.

JN0-481 Discount: <https://www.actual4exams.com/JN0-481-valid-dump.html>

It is a promise that these JN0-481 dumps will help you clear the certification test with distinction in one go, Juniper Reliable JN0-481 Dumps Ppt Unfortunately if you fail the exam you should not pay us any, we will refund you, 100% full refund, Juniper JN0-481 Practice Exam are also available so the students can test their preparation with unlimited tries and pass Data Center, Specialist (JNCIS-DC) (JN0-481) certification exam on the first try, Our company has employed many excellent experts and professors in the field in the past years, in order to design the best and most suitable JN0-481 latest questions for all customers.

The builder's tools are especially helpful for setting categories, subcategories, and items for sale, Finite State Machine, It is a promise that these JN0-481 Dumps will help you clear the certification test with distinction in one go.

100% Pass Quiz 2026 Marvelous Juniper JN0-481: Reliable Data Center, Specialist (JNCIS-DC) Dumps Ppt

Unfortunately if you fail the exam you should not pay us any, we will refund you, 100% full refund, Juniper JN0-481 Practice Exam are also available so the students can test their preparation with unlimited tries and pass Data Center, Specialist (JNCIS-DC) (JN0-481) certification exam on the first try.

Our company has employed many excellent experts and professors in the field in the past years, in order to design the best and most suitable JN0-481 latest questions for all customers.

Our JN0-481 test questions have been following the pace of digitalization, constantly refurbishing, and adding new things.
