

# CloudSec-Pro Practice Online & 100% CloudSec-Pro Correct Answers

P.S. Free & New CloudSec-Pro dumps are available on Google Drive shared by ActualVCE: [https://drive.google.com/open?id=1hjcg\\_WkHOCnGc4PoYi1SMAqjnQbBixK8](https://drive.google.com/open?id=1hjcg_WkHOCnGc4PoYi1SMAqjnQbBixK8)

At present, artificial intelligence is developing so fast. So machines inevitably grow smarter and more agile. In the result, many simple jobs are substituted by machines. In order to keep your job, choose our CloudSec-Pro exam questions and let yourself become an irreplaceable figure. In fact, our CloudSec-Pro Study Materials can give you professional guidance no matter on your daily job or on your career. And with the CloudSec-Pro certification, you will find you can be better with our help.

## Palo Alto Networks CloudSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Cloud Runtime Security:</b> This domain addresses the protection of cloud workloads during active operation, covering cloud workload protection, detection and response, web application and API security, and vulnerability management. It also includes the processes involved in deploying and managing security agents.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Security Operations Center (SOC) Fundamentals:</b> This domain covers the foundational components of a SOC, including team roles, tools, and technologies used in day-to-day security operations. It also addresses how AI</li><li>• ML and threat intelligence support incident response, categorization, and prioritization.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Cloud Posture Security:</b> This domain examines the tools and practices used to assess and manage cloud security posture, spanning CSPM, KSPM, AI-SPM, and DSPM. It also covers agentless scanning, identity security, vulnerability management, unified compliance, and the role of Posture Security Management Modules.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Application Security:</b> This domain covers security practices integrated throughout the software development lifecycle, including application security posture management, CI</li> <li>• CD pipeline security, software composition analysis, IaC security, and secrets scanning. It also explores real-world application security use cases and scan management.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Cortex Fundamentals:</b> This domain focuses on the core features of the Cortex Cloud platform, including indicator types, log management, asset inventory, compliance, and data protection. It also covers how to create reports and dashboards and how data sources are ingested into the platform.</li> </ul>

## New CloudSec-Pro Practice Online | Valid CloudSec-Pro: Palo Alto Networks Cloud Security Professional 100% Pass

Obtaining the CloudSec-Pro certificate will make your colleagues and supervisors stand out for you, because it represents CloudSec-Pro your professional skills. At the same time, it will also give you more opportunities for promotion and job-hopping. The CloudSec-Pro latest exam dumps have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. The CloudSec-Pro Exam Question offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation.

### Palo Alto Networks Cloud Security Professional Sample Questions (Q17-Q22):

#### NEW QUESTION # 17

Review this admission control policy:

```
match[{"msg": msg}] { input.request.operation == "CREATE" input.request.kind.kind == "Pod" input.request.resource.resource == "pods"
input.request.object.spec.containers[_].securityContext.privileged msg := "Privileged"
}
```

Which response to this policy will be achieved when the effect is set to "block"?

- A. The policy will alert only the administrator when a privileged pod is created.
- B. The policy will block all pods on a Privileged host.
- **C. The policy will block the creation of a privileged pod.**
- D. The policy will replace Defender with a privileged Defender.

**Answer: C**

Explanation:

The given admission control policy is designed to evaluate pod creation requests in a Kubernetes environment, specifically targeting the creation of privileged pods, which can pose significant security risks.

\* Option D: The policy will block the creation of a privileged pod is the correct answer when the effect of the policy is set to "block". In this context, the policy's logic checks if a pod being created is set to run in privileged mode (a high-risk configuration that grants the pod extended system privileges). If such a configuration is detected, the policy triggers an action to block the pod's creation, thereby preventing the deployment of privileged pods that could undermine the security posture of the Kubernetes environment.

References:

Kubernetes Admission Controllers Documentation: Provides a comprehensive overview of admission controllers in Kubernetes, including how they can be used to enforce policy decisions, such as preventing the creation of privileged pods.

Best Practices for Kubernetes Security: Discusses the importance of admission control policies in maintaining the security and integrity of Kubernetes environments, with specific emphasis on the risks associated with privileged pods.

#### NEW QUESTION # 18

If you are required to run in an air-gapped environment, which product should you install?

- A. Prisma Cloud Compute Edition
- B. Prisma Cloud with self-hosted plugin
- C. Prisma Cloud Jenkins Plugin
- D. Prisma Cloud Enterprise Edition

**Answer: A**

Explanation:

Reference: <https://docs.paloaltonetworks.com/prisma/prisma-cloud.html>

Prisma Cloud Compute Edition is the suitable product for air-gapped environments, where there is no direct internet access. This edition can be installed and operated in isolated environments, providing cloud security capabilities without the need for external connectivity.

#### NEW QUESTION # 19

An S3 bucket within AWS has generated an alert by violating the Prisma Cloud Default policy "AWS S3 buckets are accessible to public". The policy definition follows:

config where cloud.type = 'aws' AND api.name='aws-s3api-get-bucket-ac!' AND json.rule='((((acl.grants[?(@.grantee=='AllUsers')] size > 0) or policyStatus.isPublic is true) and publicAccessBlockConfiguration does not exist) or ((acl.grants[?(@.grantee=='AllUsers')] size > 0) and publicAccessBlockConfiguration.ignorePublicAcis is false) or (policyStatus.isPublic is true and publicAccessBlockConfiguration.restrictPublicBuckets is false)) and websiteConfiguration does not exist" Why did this alert get generated?

- A. network traffic to the S3 bucket
- B. an event within the cloud account
- C. anomalous behaviors
- D. configuration of the S3 bucket

**Answer: D**

Explanation:

The alert "AWS S3 buckets are accessible to public" is generated due to the configuration of the S3 bucket, which has been set in a way that allows public access. The policy definition provided checks for various conditions that would make an S3 bucket publicly accessible, such as grants to 'AllUsers', the absence of a 'publicAccessBlockConfiguration', or specific configurations that do not restrict public access. Therefore, the alert is triggered by the configuration settings of the S3 bucket that violate the policy's criteria for public accessibility.

#### NEW QUESTION # 20

What is the behavior of Defenders when the Console is unreachable during upgrades?

- A. Defenders continue to alert and enforce using the policies and settings most recently cached before upgrading the Console.
- B. Defenders will fail open until the web-socket can be re-established.
- C. Defenders continue to alert, but not enforce, using the policies and settings most recently cached before upgrading the Console.
- D. Defenders will fail closed until the web-socket can be re-established.

**Answer: A**

Explanation:

When the Console is unreachable during upgrades, Defenders continue to alert and enforce using the policies and settings most recently cached before the upgrade (option D). This behavior ensures that security enforcement remains active and consistent, even when the central management console is temporarily unavailable. The cached policies enable Defenders to maintain the security posture based on the last known configuration, ensuring continuous protection against threats and compliance with established security policies. This approach reflects Prisma Cloud's design principle of ensuring uninterrupted security enforcement, thereby safeguarding the environment against potential vulnerabilities during maintenance periods.

#### NEW QUESTION # 21

Which method should be used to authenticate to Prisma Cloud Enterprise programmatically?

- A. access key
- B. basic authentication
- C. single sign-on
- D. SAML

**Answer: A**

Explanation:

To authenticate to Prisma Cloud Enterprise programmatically, the use of an access key is the most suitable method among the given options. Access keys, typically consisting of an Access Key ID and Secret Access Key, are used for programmatic calls to the Prisma Cloud API. This method enables secure, authenticated API requests to Prisma Cloud services without requiring manual user intervention, which is essential for automation and integration with CI/CD pipelines.

Reference to the use of access keys for programmatic access can often be found in the API documentation of cloud security platforms like Prisma Cloud. While specific documentation from Prisma Cloud is not directly quoted here, the general practice across cloud services (AWS, Azure, GCP) supports the use of access keys for API authentication, making it a verified approach for Prisma Cloud as well.

## NEW QUESTION # 22

.....

The CloudSec-Pro desktop-based practice exam is compatible with Windows-based computers and only requires an internet connection for the first-time license validation. The web-based CloudSec-Pro practice test is accessible on any browser without needing to install any separate software. Finally, the CloudSec-Pro Dumps PDF is easily portable and can be used on smart devices or printed out. We constantly update the CloudSec-Pro pdf file to ensure customers receive the latest version of Palo Alto Networks CloudSec-Pro questions, based on the actual Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam content.
