And then you can start your study after downloading the AZ-800 exam questions in the email attachments.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q132-Q137):

NEW QUESTION # 132
Your company has offices in Boston and Montreal. The offices are connected by using a 10-Mbps WAN link that is often saturated
The office in Boston contains the following:
* An Active Directory Domain Services (AD DS) domain controller named DC1.
* A server named Server1 that runs Windows Server and has the File Server role installed The office in Montreal contains 20 client computers that run Windows 10 Montreal does NOT have any servers.
The company plans to deploy a new line of business (LOB) application to all the client computers. The installation source files for the application are in \\Server\Apps.

Answer:

Explanation:

NEW QUESTION # 133
You need to meet the technical requirements for User1. The solution must use the principle of least privilege.
What should you do?

- **A. Create a delegation on OU3.**
- B. Add Users1 to the Server Operators group in contoso.com.
- C. Create a delegation on contoso.com.
- D. Add Users1 to the Account Operators group in contoso.com.

Answer: A

Topic 2, Fabrikam inc.
On-premises Servers
The on-premises network contains servers that run Windows Server as shown in the following table.
DC1 hosts all the operation master roles.
WEB1 and WEB2 run an Internet Information Services (IIS) web app named Webapp1.
On-premises Network
The New York and Seattle offices are connected by using redundant WAN links.
The client computers in each office get IP addresses from their local DHCP server.
DHCP! contains a scope named Scope1 that has addresses for the New York office. DHCP2 contains a scope named Scope2 that has addresses for the Seattle office.
Group Policy Object (GPOs)
The cwp.fabrikam.com domain contains the organizational units (OUs) and custom Group Policy Objects (GPOs) shown in the following table.
Requirements:
Fabrikam Identifies the following planned changes:
* Create a single Azure subscription named Sub1 that will contain a single Azure virtual network named Vnet1.
* Replace the WAN links between the Seattle and New York offices by using Azure Virtual WAN and ExpressRoute. Both on-premises offices will be connected to Vnet1 by using ExpressRoute.

* Create three Azure file shares named newyorkfiles, seattfefiles, and companyfiles.
* Create a domain controller named dc3.corp.fabrikam,com in Vnet1.
* Deploy an Azure Virtual Desktop host pool lo Vnet1. The Azure Virtual Desktop session hosts will be hybrid Azure AD joined.
* License all servers for Microsoft Defender for servers.
* Use Azure Policy to enforce configuration management policies on the servers in Azure and on-premises.
Networking Requirements
Fabrikam identifies the following security requirements:
* Apply GP04 to the Azure Virtual Desktop session hosts. Ensure that Azure Virtual Desktop user sessions lock after being idle for 10 minutes. Users must be able to control the lockout lime manually from their client computer.
* Ensure that server administrators request approval before they can establish a Remote Desktop connection to an Azure virtual machine. If the request is approved, the connection must be established within two hours.
* Prevent user passwords from containing all or part of words that are based on the company name, such as Fab. fabrikam or fsbr! |.
* Ensure that all instances of Webapp1 use the same service account. The password of the service account must change automatically every 30 days.
* Prevent domain controllers from directly contacting hosts on the internet.
File Sharing Requirements
You need to configure the synchronization of Azure files to meet the following requirements:
* Ensure that seattlefiles syncs to FS2.
* Ensure that newyorkfiles syncs to FS1.
* Ensure that companyfiles syncs to both FS1 and FS2.

NEW QUESTION # 134
Your network contains an Active Directory Domain Services (AD DS) forest named contoso.com. The forest contains a child domain named east.contoso.com and the servers shown in the following table.
You need to create a folder for the Central Store to manage Group Policy template files for the entire forest.
What should you name the folder, and on which server should you create the folder? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation

NEW QUESTION # 135
Which three actions should you perform in sequence to meet the security requirements for Webapp1? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - Configure the llS application pool to run as Network Service.
2 - Create a group managed service account (gMSA) in Active Directory.
3 - Create the Key Distribution Services (KDS) root key in AD DS.

NEW QUESTION # 136
You have a disaggregated cluster deployment. The deployment contains a scale-out file server (SOFS) cluster that runs Windows Server and a compute duster that has the Hyper-V role enabled.
You need to implement Storage Quality of Service (QoS). The solution must ensure that you can control the bandwidth usage between the SOFS cluster and the Hyper-V cluster.
Which cmdlet should you run on each cluster? To answer, drag the appropriate cmdlets to the correct clusters.
Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
☐
Explanation:
☐

NEW QUESTION # 137

......

Our company has a professional team of experts to write AZ-800 preparation materials and will constantly update it to ensure that it is synchronized with the exam content. In addition to the high quality, reasonable price and so on, we have many other reasons to make you choose our AZ-800 Actual Exam. There are three versions of our AZ-800 exam questions: PDF, Software and APP online which can provide you the varied study experiences.
