

Lead1Pass Provides Peoplecert DevOps-Foundation Exam Questions 2026

2026 Latest Lead1Pass DevOps-Foundation PDF Dumps and DevOps-Foundation Exam Engine Free Share:
<https://drive.google.com/open?id=1NWr7uHLm5Hpi19g4ADMK-2pYdpGYW8Vg>

The clients can use the shortest time to prepare the DevOps-Foundation exam and the learning only costs 20-30 hours. The questions and answers of our DevOps-Foundation exam questions are refined and have simplified the most important information so as to let the clients use little time to learn. The client only need to spare 1-2 hours to learn our DevOps-Foundation study question each day or learn them in the weekends. Commonly speaking, people like the in-service staff or the students are busy and don't have enough time to prepare the exam. Learning our DevOps-Foundation test practice materials can help them save the time and focus their attentions on their major things.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Topic 2	<ul style="list-style-type: none">Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
Topic 3	<ul style="list-style-type: none">Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.
Topic 4	<ul style="list-style-type: none">Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 5	<ul style="list-style-type: none">Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.

Topic 6	<ul style="list-style-type: none"> Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.

Test Peoplecert DevOps-Foundation Free & Examcollection DevOps-Foundation Vce

DevOps-Foundation study material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction. During your installation, DevOps-Foundation exam questions hired dedicated experts to provide you with free remote online guidance. During your studies, DevOps-Foundation Exam Torrent also provides you with free online services for 24 hours, regardless of where and when you are, as long as an email, we will solve all the problems for you. At the same time, if you fail to pass the exam after you have purchased DevOps-Foundation training materials, you just need to submit your transcript to our customer service staff and you will receive a full refund.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which of the following is NOT a metric for culture?

- A. Employee Net Promoter Score (eNPS)
- B. Retention
- C. Engagement and morale
- D. Deployment frequency

Answer: D

Explanation:

Deployment frequency is not a culture metric.

* It's a process metric, indicating how often code is released.

* Culture metrics focus on engagement, morale, retention, psychological safety, and NPS.

Why not the others?

* Employee NPS: Measures employee satisfaction and willingness to recommend.

* Engagement/morale: Direct indicators of cultural health.

* Retention: How well an org keeps talented people, reflecting culture.

Extract-style reference:

"Measuring DevOps culture relies on employee engagement, morale, and retention, not on delivery metrics like deployment frequency."

-State of DevOps Report

PeopleCert DevOps Foundation v3.6: Culture metrics focus on people, not just process.

NEW QUESTION # 22

What is the first step to take when improving DevOps automation?

- A. Replace proprietary software with open source tools
- B. Build a DevOps toolchain
- C. Implement self-service
- D. Architect before automating

Answer: D

Explanation:

PeopleCert emphasizes that architecture must be planned before automating processes. This means mapping the value stream, understanding dependencies, identifying bottlenecks, and defining integration points before selecting or configuring tools. Automating without a clear architecture can lead to fragmented processes, wasted effort, and technical debt. Once the architecture is sound, teams can implement automation in a way that supports scalability, maintainability, and interoperability.

A (building the toolchain) is important but comes after architecture. C (switching to open source) is a tooling decision, not the first automation step. D (self-service) is a benefit of automation, not the starting point.

Thus, B - Architect before automating - is the correct first step.

NEW QUESTION # 23

Which of the following is NOT a characteristic of DevOps?

- A. Working towards a common goal
- B. Ensuring overall organizational success
- C. Fast flow of unplanned work into production
- D. World-class stability, reliability, availability and security

Answer: C

Explanation:

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options - ensuring organizational success, working toward a common goal, and world-class stability/reliability - are all key DevOps characteristics.

Reference: DevOps Foundation v3.6 syllabus section 1.4; State of DevOps Report.

NEW QUESTION # 24

Which statement is NOT TRUE?

- A. Continuous Delivery ensures software is always in a releasable state
- B. Continuous Deployment requires a manual push button
- C. Waterfall approaches can take advantage of continuous integration and test-driven development practices
- D. Continuous Integration requires developers commit code to trunk at least daily

Answer: B

Explanation:

Let's clarify what these terms mean in DevOps:

* Continuous Integration (CI): Developers integrate code into a shared repository frequently (ideally daily), with each integration automatically verified by tests.

* Continuous Delivery (CD): Ensures software is always in a releasable state. Every change can be deployed to production, but the deployment itself may be a manual decision.

* Continuous Deployment: Every change that passes automated tests is automatically deployed to production, without manual intervention.

Why is D ("Continuous Deployment requires a manual push button") NOT TRUE?

Because Continuous Deployment is about no manual intervention - once code passes all tests, it's automatically pushed live. Manual deployment is a feature of Continuous Delivery, not Continuous Deployment.

Extract-style reference:

"Continuous Deployment means that every change goes through the pipeline and is automatically put into production, resulting in many production deployments every day."

-Accelerate: The Science of Lean Software and DevOps, Jez Humble & Nicole Forsgren DevOps Foundation v3.6 distinguishes between Continuous Delivery (manual trigger) and Continuous Deployment (fully automated).

NEW QUESTION # 25

Regardless of structure, what should a DevOps team NOT be?

- **A. Isolated**
- B. Continuously engaged
- C. Balanced in terms of people and automation skills
- D. Flat

Answer: A

Explanation:

A core goal of DevOps is to eliminate isolation between roles, teams, and departments. Isolated teams—cut off from other parts of the value stream—create bottlenecks, reduce visibility, and slow feedback.

While flat hierarchies (A), continuous engagement (C), and balanced skills (D) are positive traits, B is the opposite of DevOps principles.

Therefore, B is the correct "NOT" choice.

NEW QUESTION # 26

.....

The PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) certification exam is one of the top-rated career advancement certification exams. The PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) certification exam can play a significant role in career success. With the PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) certification you can gain several benefits such as validation of skills, career advancement, competitive advantage, continuing education, and global recognition of your skills and knowledge. The PeopleCert DevOps Foundation v3.6 Exam (DevOps-Foundation) certification is a valuable credential that assists you to enhance your existing skills and experience.
