Detailed 220-1202 Study Plan, 220-1202 Study Guide

It is well known that certificates are not versatile, but without a 220-1202 certification you are a little inferior to the same competitors in many ways. Compared with the people who have the same experience, you will have the different result and treatment if you have a 220-1202 Certification. Without doubt, you will get a higher salary if you have a 220-1202 certification or you can enter into a bigger company. And our 220-1202 exam materials can make your dream come true.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q169-Q174):

NEW QUESTION # 169
A customer asks a help desk technician for help in selecting new computers. The customer would like to avoid expensive licensing fees but would like all files to be kept locally. Which of the following operating systems should the technician recommend?

- A. Linux
- B. Windows
- C. Chrome OS
- D. macOS

Answer: A

Explanation:
Linux provides a full-featured OS without expensive licensing fees and allows all files to be stored locally, meeting the customer's requirements.

NEW QUESTION # 170
Which of the following security measures addresses the issue of information exfiltration?

- A. SAML
- B. IAM
- C. MDM
- D. DLP

Answer: D

Explanation:
The correct answer is A. DLP (Data Loss Prevention), because DLP solutions are specifically designed to detect, monitor, and prevent unauthorized transmission of sensitive data outside an organization.
Information exfiltration occurs when confidential data is improperly transferred, leaked, or stolen, either intentionally or accidentally.
According to the Quentin Docter - CompTIA A+ Complete Study Guide, DLP technologies enforce policies that restrict how data can be shared via email, cloud services, removable media, or network transfers.
DLP systems can block, quarantine, or alert administrators when sensitive data patterns-such as credit card numbers or personal identifiers-are detected leaving the organization.
The Travis Everett & Andrew Hutz - All-in-One Exam Guide explains that DLP focuses on data protection, not user authentication or device management. While IAM controls access to resources and MDM manages mobile devices, neither directly prevents data from being exfiltrated once access is granted.
The Mike Meyers / Mark Soper Lab Manual reinforces that SAML is an authentication framework and does not monitor data movement.
Because the question specifically addresses information exfiltration, the security control designed to prevent it is Data Loss Prevention, making A the correct answer.

NEW QUESTION # 171
A technician is working on a user's computer. The technician wants to log in to the intranet on the computer without logging the current user out. Which of the following should the technician do?

- A. Enable the pop-up blocker on the browser.
- B. Configure the proxy server.
- C. Clear the browser cache.
- D. Use private browsing.

Answer: D

Explanation:
Private browsing allows the technician to log in to the intranet without affecting the current user's session, cookies, or logins.

NEW QUESTION # 172

A user's application only works with a legacy version of the OS. The OS is reaching its end-of-life date. For security reasons, the company is migrating to the current version of the OS. Which of the following is the most efficient way to complete the migration while maintaining accessibility to the application?

- A. Multiboot
- B. Virtualization
- C. Bare-metal server
- D. Terminal server

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Virtualizationallows the legacy OS to be run in a virtual machine (VM) on top of the newer OS. This method provides backward compatibility without requiring outdated operating systems on physical hardware.
FromQuentin Docter - CompTIA A+ Complete Study Guide:
"Using virtualization is a preferred method when legacy applications are needed after migrating to newer operating systems. It allows legacy environments to exist securely within a modern OS framework."

NEW QUESTION # 173

A technician follows proper malware removal procedures but cannot remove all malware. They decide to reload the OS. What should they select?

- A. Version upgrade
- B. OS repair
- C. Clean install
- D. System restore

Answer: C

Explanation:
Aclean installensures all malware is eliminated by completely wiping and reinstalling the OS. System restore or repair may leave traces.
FromQUENTIN DOCTER - COMPTIA A+ COMPLETE study GUIDE:
"If malware cannot be completely removed, perform a clean installation of the operating system. This ensures no remnants remain on the machine."

NEW QUESTION # 174
......
