FCP_FMG_AD-7.6 Test Free & Latest FCP_FMG_AD-7.6 Test Voucher

We update our Fortinet FCP_FMG_AD-7.6 exam dumps over time and mark the changes online. Enroll in the Fortinet FCP_FMG_AD-7.6 exam dumps and start your preparation with Fortinet FCP_FMG_AD-7.6 practice questions. We will provide you with the information covered in the current test and incorporate materials that originate from Fortinet FCP_FMG_AD-7.6 Exam Dumps. You will get a handful of knowledge about topics that will benefit your professional career.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q59-Q64):

NEW QUESTION # 59

An administrator created a new global policy package that includes both header policies and footer policies. What two things must the administrator know before deploying the global policy package to ADOM2? (Choose two.)

- A. They can synchronize policy packages by importing from the ADOM2 policy package into the global ADOM policy package.
- B. They can assign the global policy package to all or selected policy packaged within ADOM2.
- C. They can promote ADOM2 objects to global objects.
- D. They must install from the ADOM2 layer to FortiGate when using the Automatically install policies to ADOM devices option.

Answer: B,C

Explanation:

Before deploying a Global Policy Package that uses shared objects, the administrator needs to ensure any objects created locally in the target ADOM (ADOM2) that they want to use in the global policies (header or footer) are available in the Global ADOM. The Global Policy Package must be assigned to the specific Local Policy Packages within ADOM2 that are meant to inherit those global header and footer rules. The administrator can choose to assign the Global Policy Package to all policy packages in ADOM2 or only to selected ones.

NEW QUESTION # 60

The administrator uses FortiManager to push a CLI script using the Remote FortiGate Directly (via CLI) option to configure an IPsec VPN. However, when running the script, the administrator receives the following error:

config vpn ipsec phase2-interface [parameter(s) invalid. detail: object mismatch] What must the administrator do to resolve the script error and successfully apply the IPsec configuration?

- A. Add the end command after finishing the IPsec phase 1-interface configuration block.
- B. Use IPsec templates to deploy provisioning templates.
- **C. Run the script using the policy package or ADOM database method.**
- D. Add a second config vpn ipsec phase2-interface block without linking it to phase1.

Answer: C

Explanation:

Running the script through the policy package or ADOM database method allows FortiManager to properly interpret object relationships and dependencies in the IPsec configuration, preventing object mismatch errors when pushing complex VPN settings directly via CLI.

NEW QUESTION # 61

What allows FortiManager to run CLI scripts on FortiGate devices without prompting for SSH authentication each time?

- A. FortiGate devices using the legacy login method.
- **B. The secure management tunnel between FortiManager and FortiGate devices.**
- C. The script using the Remote FortiGate Directly (via CLI) option.
- D. The script on the FortiManager device database.

Answer: B

Explanation:

FortiManager uses a secure management tunnel (TCP port 541) to communicate with managed FortiGate devices. This tunnel allows FortiManager to run CLI scripts, push configuration changes, and retrieve information without prompting for SSH authentication each time, as trust is already established through device authorization and certificate exchange.

NEW QUESTION # 62

Refer to the exhibit. Which two statements about the output are true? (Choose two.)

```
FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdms managed ---
--- There are currently 6 devices/vdms count for license ---

TYPE          OID   SN              HA   IP          NAME          ADOM   IPS          FIRMWARE   HW_GenX
fmgfaz-managed 188   FGV02TM24013504 -   100.65.1.111 BR1-FGT-1     My_ADOM 7.0 MR6 (3401) N/A
STATUS: dev-db: not modified; conf: in sync; cond: pending; dm: installed; conn: up; template:[modified]default
- vdom: [3] root flags: 0 adom: My_ADOM pkg: [imported]BR1-FGT-1
```

- **A. The system template default will override device-level database configurations.**
- B. The latest revision history for the managed FortiGate does match the FortiManager policy database.
- C. Configuration changes have been installed on FortiGate, updating policy and device-level database.
- **D. The latest revision history for the managed FortiGate does not match the device-level database.**

Answer: A,D

Explanation:

The status "pending" indicates the latest revision history does not match the device-level database, meaning there are unapplied changes.

The template is marked as [modified], so the system template default will override device-level database configurations when installed.

NEW QUESTION # 63

Which two items does an FGFM keepalive message include? (Choose two.)

- A. FortiGate IPS version
- B. FortiGate configuration checksum
- C. FortiGate license information
- D. FortiGate uptime

Answer: A,B

Explanation:

Keepalive messages, including the configuration checksums, are sent from FortiGate at configured intervals.

The messages also show the intrusion prevention system (IPS) version of the FortiGate device.

NEW QUESTION # 64

.....

The Fortinet expert team use their knowledge and experience to make out the latest short-term effective training materials. This training materials is helpful to the candidates. It allows you to achieve the desired results in the short term. Especially those who study FCP_FMG_AD-7.6 while working, you can save a lot of time easily. Exam-Killer's training materials are the thing which you most wanted.
