

# Why to trend for Juniper JN0-460 pdf dumps before actual exam

P.S. Free 2026 Juniper JN0-460 dumps are available on Google Drive shared by FreeCram: <https://drive.google.com/open?id=1BboEJsg2IM-j6L87dMeABhHOiuL1ANn>

In order to serve you better, we have a complete system for you if you choose us. We have free demo for JN0-460 training materials for you to have a try. If you have decided to buy JN0-460 exam dumps of us, just add them to your cart, and pay for it, our system will send the downloading link and password to you within ten minutes, and if you don't receive, just contact us, we will solve this problem for you as quickly as possible. For JN0-460 Training Materials, we also have after-service, if you have questions about the exam dumps, you can contact us by email.

## Juniper JN0-460 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"><li>Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.</li></ul> |
| Topic 2 | <ul style="list-style-type: none"><li>Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.</li></ul>            |

|         |  |
|---------|--|
| Topic 3 | <ul style="list-style-type: none"> <li>• <b>Wired Assurance Management or Operations:</b> This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.</li> </ul> |
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Campus Fabric Architecture:</b> This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.</li> </ul>  |
| Topic 5 | <ul style="list-style-type: none"> <li>• <b>Campus EVPN-VXLAN:</b> This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.</li> </ul>   |

## Free PDF Quiz Updated Juniper - JN0-460 - Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Examcollection Dumps

All the JN0-460 training files of our company are designed by the experts and professors in the field. The quality of our study materials is guaranteed. According to the actual situation of all customers, we will make the suitable study plan for all customers. If you buy the JN0-460 learning dumps from our company, we can promise that you will get the professional training to help you pass your exam easily. By our professional training, you will pass your exam and get the related certification in the shortest time.

### Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q58-Q63):

#### NEW QUESTION # 58

What is the primary purpose of using templates in the deployment of wired assurance?

- A. To increase network security
- **B. To standardize configurations across devices**
- C. To reduce the physical size of devices
- D. To monitor network performance

**Answer: B**

#### NEW QUESTION # 59

Which statement is correct about the VXLAN data plane?

- **A. The data plane encapsulates the traffic.**
- B. The data plane learns the IP addresses of end-user devices.
- C. The data plane advertises the MAC addresses of end-user devices.
- D. The data plane learns the MAC addresses of end-user devices.

**Answer: A**

Explanation:

VXLAN (Virtual Extensible LAN) uses an overlay encapsulation method to carry Layer-2 frames over an IP underlay. This functionality is part of the data plane, which is responsible for packet forwarding and encapsulation/decapsulation.

"In an EVPN-VXLAN fabric, the control plane (via BGP EVPN) learns and advertises MAC and IP information, while the data plane encapsulates and forwards traffic using VXLAN tunnels between VTEPs." Option A is incorrect: IP learning happens in the control plane, not the data plane.

Option B is incorrect: MAC advertisement is done in the control plane through EVPN route types.

Option D is incorrect: MAC learning is handled by EVPN control plane, not the VXLAN data plane.

Option C is correct: the VXLAN data plane encapsulates the traffic in UDP tunnels between VTEPs.

### NEW QUESTION # 60

You have received a Marvis Actions Missing VLAN notification.

In this scenario, where is the problem?

- A. A switch is missing the VLAN.
- **B. An access point is missing the VLAN.**
- C. A client is missing the VLAN.
- D. The gateway is missing the VLAN.

**Answer: B**

Explanation:

A Marvis Actions Missing VLAN notification indicates that an access point is missing a VLAN configured on other APs within the same site.

Marvis identifies configuration inconsistencies by comparing VLAN assignments across devices.

### NEW QUESTION # 61

What role do Ethernet Segment Identifiers (ESI) play in EVPN for multipath scenarios?

- A. Mark traffic for prioritization over a single path
- B. They prevent the use of multiple paths to ensure linear traffic flow
- **C. Identify redundant paths to facilitate load balancing and redundancy**
- D. Encrypt data traffic across multipath networks

**Answer: C**

### NEW QUESTION # 62

Which routing protocol does EVPN utilize for the control plane?

- A. VXLAN
- **B. MP-BGP**
- C. OSPF
- D. IS-IS

**Answer: B**

### NEW QUESTION # 63

.....

In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the Mist AI Wired, Specialist (JNCIS-MistAI-Wired) test guide is perfect. We can promise that quality first, service upmost. If you buy the JN0-460 learning dumps from our company, we are glad to provide you with the high quality JN0-460 study question and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company
