

DP-700 Test Papers, Latest DP-700 Exam Registration

DOWNLOAD the newest Pass4training DP-700 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=12B8oWBQjuepLyJs9d_aFE-aCM6Shd5n0

Our DP-700 training braindump is elaborately composed with major questions and answers. We are choosing the key from past materials to finish our DP-700 guide question. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the DP-700 Test Question. Then, you will have enough confidence to pass the DP-700 exam. What are you waiting for? Just come and buy our DP-700 exam questions!

The valid updated, and real Pass4training DP-700 questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in Implementing Data Engineering Solutions Using Microsoft Fabric DP-700 certification exam and start this journey with Pass4training DP-700 Exam PDF dumps and practice test software. All types of Microsoft DP-700 Exam Questions formats are available at the affordable price.

DP-700 Test Papers & Latest Microsoft Certification Training - Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric

Our DP-700 preparation exam can provide all customers with the After-sales service guarantee. The After-sales service guarantee is mainly reflected in our high-efficient and helpful service. We are glad to receive all your questions on our DP-700 Exam Dumps. If you have any questions about our DP-700 study questions, you have the right to answer us in anytime. Our online workers will solve your problem immediately after receiving your questions.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q95-Q100):

NEW QUESTION # 95

HOTSPOT

You have a Fabric workspace that contains two lakehouses named Lakehouse1 and Lakehouse2. Lakehouse1 contains staging data in a Delta table named Orderlines. Lakehouse2 contains a Type 2 slowly changing dimension (SCD) dimension table named Dim_Customer.

You need to build a query that will combine data from Orderlines and Dim_Customer to create a new fact table named Fact_Orders. The new table must meet the following requirements:

Enable the analysis of customer orders based on historical attributes.

Enable the analysis of customer orders based on the current attributes.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
SELECT
  orderlineid order_line_id
  ,OrderDate order_date
  ,c.customer_key
  ,Quantity order_quantity
  ,unitprice unit_price
  ,taxrate tax_rate
FROM
  Lakehouse1.orderlines o
INNER JOIN
  Lakehouse2.dim_customer c
  ON o.customer_id = c.customer_id
  AND c.is_current = 1
  AND o.OrderDate >= c.valid_to_datetime
  AND o.OrderDate >= c.valid_from_datetime
  AND c.is_current = 1
  AND o.OrderDate <= c.valid_to_datetime
  AND o.OrderDate <= c.valid_from_datetime
```

Answer:

Explanation:

NEW QUESTION # 96

You have a Fabric F32 capacity that contains a workspace. The workspace contains a warehouse named DW1 that is modelled by using MD5 hash surrogate keys.

DW1 contains a single fact table that has grown from 200 million rows to 500 million rows during the past year.

You have Microsoft Power BI reports that are based on Direct Lake. The reports show year-over-year values.

Users report that the performance of some of the reports has degraded over time and some visuals show errors.

You need to resolve the performance issues. The solution must meet the following requirements:

Provide the best query performance.

Minimize operational costs.

Which should you do?

- A. Modify the surrogate keys to use a different data type.
- B. Change the MD5 hash to SHA256.
- C. Increase the capacity.C Enable V-Order
- D. Create views.

Answer: A

Explanation:

In this case, the key issue causing performance degradation likely stems from the use of MD5 hash surrogate keys. MD5 hashes are 128-bit values, which can be inefficient for large datasets like the 500 million rows in your fact table. Using a more efficient data type for surrogate keys (such as integer or bigint) would reduce the storage and processing overhead, leading to better query performance. This approach will improve performance while minimizing operational costs because it reduces the complexity of querying and indexing, as smaller data types are generally faster and more efficient to process.

NEW QUESTION # 97

You need to ensure that usage of the data in the Amazon S3 bucket meets the technical requirements. What should you do?

- A. Create a shortcut and ensure that caching is enabled for the workspace.
- B. Create a workspace identity and use the identity in a data pipeline.
- C. Create a shortcut and ensure that caching is disabled for the workspace.
- D. Create a workspace identity and enable high concurrency for the notebooks.

Answer: C

Explanation:

To ensure that the usage of the data in the Amazon S3 bucket meets the technical requirements, we must address two key points:

NEW QUESTION # 98

HOTSPOT

You have a Fabric workspace that contains an eventstream named EventStream1.

You discover that an EventStream1 transformation fails.

You need to find the following error information:

The error details, including the occurrence time

The total number of errors

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To find the error details:

- Data insights
- Data preview
- Details
- Runtime logs

To find the total number of errors:

- Data insights
- Data preview
- Details
- Runtime logs

Answer:

Explanation:

Explanation:

NEW QUESTION # 99

HOTSPOT

You have a Fabric workspace that contains a warehouse named DW1. DW1 contains the following tables and columns.

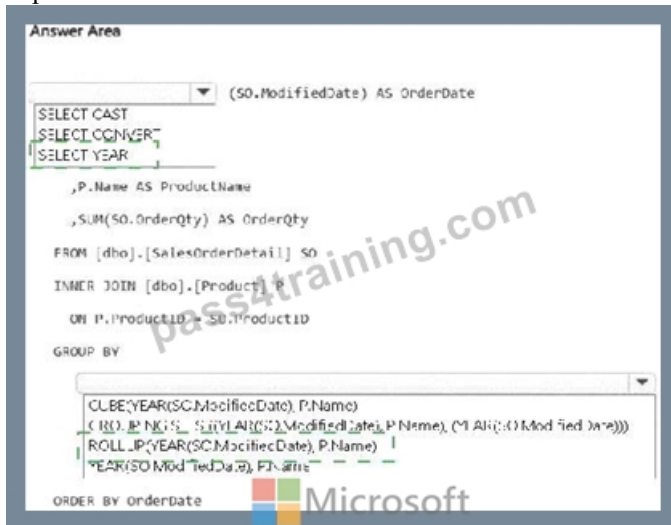

Table name	Column name	Description
SalesOrderDetail	ProductID	Contains the product ID of the ordered product
SalesOrderDetail	ModifiedDate	Contains the date of an order
SalesOrderDetail	OrderQty	Contains the order quantity
Product	ProductID	Contains the unique ID of a product
Product	Name	Contains a product name

You need to create an output that presents the summarized values of all the order quantities by year and product. The results must include a summary of the order quantities at the year level for all the products.

How should you complete the code? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
