Our Salesforce Certified Tableau Architect test torrent boost 99% passing rate and high hit rate so you can have a high probability to pass the exam. Our Analytics-Arch-201 study torrent is compiled by experts and approved by the experienced professionals and the questions and answers are chosen elaborately according to the syllabus and the latest development conditions in the theory and the practice and based on the real exam. If you buy our Salesforce Certified Tableau Architect test torrent you only need 1-2 hours to learn and prepare the exam and focus your main attention on your most important thing.

Salesforce Analytics-Arch-201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Deploy Tableau Server: This domain assesses the ability of Tableau Administrators to perform production-ready deployments of Tableau Server. It encompasses installing and configuring Tableau Server with external components, supporting air-gapped environments, disaster recovery validations, and blue-green deployments. It includes configuring and troubleshooting various authentication methods such as SAML, Kerberos, and LDAP. The section also covers implementing encryption strategies, installing and verifying Tableau Server on Linux and Windows platforms, resolving installation and configuration issues, and managing service accounts and logging.
Topic 2	<ul style="list-style-type: none"> Design a Tableau Infrastructure: This section of the exam measures skills of Tableau Consultants and focuses on planning and designing a complex Tableau deployment. It covers gathering user requirements, licensing strategies including Authorization-to-Run, high availability and disaster recovery planning, and mapping server add-ons to the organization's needs. It includes planning and implementing Tableau Cloud with Bridge, authentication, user provisioning, and multi-site configuration. Additionally, it addresses migration planning across Tableau products, operating systems, identity stores, and consolidations, as well as designing process topologies, sizing, node roles, and recommending server configurations including security, hardware, and disaster recovery.
Topic 3	<ul style="list-style-type: none"> Monitor and Maintain a Tableau Deployment: This section evaluates skills of Tableau Administrators in monitoring, maintaining, and optimizing Tableau environments. It involves creating custom administrative dashboards, conducting load testing using tools like TabJolt, and analyzing test results. Troubleshooting complex performance bottlenecks in workbooks and server resources is key, as is tuning caching and scaling strategies. It covers leveraging observability tools such as the Resource Monitoring Tool, analyzing logs and metrics, and adjusting architecture accordingly. Automation of maintenance functions using APIs, scripting, and scheduling is included, along with managing server extensions, content automation, dashboard extensions, web data connectors, and secure embedded solutions.

Free PDF Salesforce - Analytics-Arch-201 - Salesforce Certified Tableau Architect –Trustable Reliable Test Cram

If you are going to purchasing the Analytics-Arch-201 exam bootcamp online, you may pay more attention to the pass rate. With the pass rate more than 98%, our Analytics-Arch-201 exam materials have gained popularity in the international market. And we have received many good feedbacks from our customers. In addition, we offer you free demo to have a try before buying Analytics-Arch-201 Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can also enjoy free update for one year, and the update version for Analytics-Arch-201 will be sent to your email automatically.

Salesforce Certified Tableau Architect Sample Questions (Q136-Q141):

NEW QUESTION # 136

If you encounter an error related to dependency resolution while installing Tableau Server on Linux, what should be your initial troubleshooting step?

- A. Changing the Linux server's hostname to ensure it's correctly recognized by Tableau Server
- B. Temporarily disabling the firewall and antivirus software on the Linux server
- C. Verifying that all required dependencies are installed and up-to-date on the Linux system
- D. Configuring the network settings to allow unrestricted internet access to the Linux server

Answer: C

Explanation:

Verifying that all required dependencies are installed and up-to-date on the Linux system When facing a dependency resolution error during the installation of Tableau Server on Linux, the first step should be to verify that all necessary dependencies are installed and up-to-date. Dependency issues often arise from missing or outdated packages, and ensuring that the system meets all pre-installation requirements is key to resolving these issues. Option A is incorrect because disabling firewall and antivirus software does not typically address dependency resolution problems. Option C is incorrect as configuring network settings for unrestricted internet access is not a standard approach to resolving dependency issues. Option D is incorrect because changing the hostname of the server is unlikely to resolve dependency-related installation errors.

NEW QUESTION # 137

In the context of implementing database encryption for Tableau Server, what factor is important to ensure ongoing data security?

- A. Setting up a redundant database server to take over in case the primary server fails
- B. Increasing the processing power of the database server to handle the additional load from encryption and decryption processes
- C. Ensuring that backup copies of the database are also encrypted
- D. Implementing a network monitoring system to track all access to the database server

Answer: C

Explanation:

Ensuring that backup copies of the database are also encrypted When encrypting a database for Tableau Server, it is crucial to ensure that backup copies of the database are also encrypted. This prevents scenarios where encrypted data at rest could be compromised through un-encrypted backups, maintaining a consistent level of security for all stored data, whether it is in active use or backed up. Option A is incorrect because while processing power is important for overall performance, it is not the primary concern for ongoing data security in the context of database encryption. Option C is incorrect as network monitoring, while important for security, does not ensure the encryption of data at rest or in backups. Option D is incorrect because setting up a redundant database server focuses on availability and does not directly address the encryption of data or back-ups.

NEW QUESTION # 138

When creating a custom administrative view in Tableau to analyze user activity, which table in the Tableau repository should you focus on to understand user login patterns?

- A. The 'datasources' table to monitor the data sources each user accesses
- B. The 'workbooks' table to see which workbooks are most frequently used by users
- C. The 'historical_events' table to analyze specific events like user logins and logouts

- D. The 'sites' table to determine which sites users are accessing most frequently

Answer: C

Explanation:

The 'historical_events' table to analyze specific events like user logins and log-outs For analyzing user login patterns in Tableau, the 'historical_events' table in the repository is the most relevant. This table records various events, including user authentication events like logins and logouts, providing valuable insights into user access patterns and activity on the server. Option A is incorrect because the 'datasources' table focuses on data sources and does not provide information about user login patterns. Option B is incorrect as the 'workbooks' table, while useful for understanding workbook usage, does not track user login events. Option D is incorrect because the 'sites' table provides information about sites on the server but does not specifically track user login events.

NEW QUESTION # 139

When implementing database encryption for Tableau Server, which step is essential to protect sensitive data at rest?

- A. Setting up a dedicated firewall to protect the database server hosting the Tableau Server data
- **B. Configuring Transparent Data Encryption (TDE) on the database used by Tableau Server**
- C. Regularly changing the database user's passwords used by Tableau Server
- D. Enabling SSL encryption for all data in transit between the Tableau Server and its data-bases

Answer: B

Explanation:

Configuring Transparent Data Encryption (TDE) on the database used by Tableau Server Configuring Transparent Data Encryption (TDE) on the database used by Tableau Server is essential for encrypting data at rest. TDE ensures that the data stored in the database is encrypted, which protects it from unauthorized access or breaches, especially if the physical storage media is compromised. Option A is incorrect as SSL encryption protects data in transit and does not encrypt data at rest in the database. Option C is incorrect because while a firewall is crucial for network security, it does not encrypt data stored in the database. Option D is incorrect as regularly changing passwords, while a good security practice, does not directly relate to the encryption of data at rest in the database.

NEW QUESTION # 140

When installing Tableau Server on a Linux system, what is a crucial step to perform using the Command Line Interface (CLI) or the Installation Wizard?

- A. Assigning a static IP address to the Linux server hosting Tableau Server
- B. Installing a graphical user interface (GUI) on the Linux server to support the Installation Wizard
- C. Configuring the firewall to allow all incoming and outgoing traffic to the Linux server
- **D. Setting the appropriate environment variables and initializing the Tableau Server installation**

Answer: D

Explanation:

Setting the appropriate environment variables and initializing the Tableau Server installation When installing Tableau Server on Linux, it's essential to set the appropriate environment variables and initialize the Tableau Server installation through the CLI or Installation Wizard. This involves specifying configuration settings such as data directory paths and ensuring that the system meets all prerequisites for installation. Option A is incorrect because assigning a static IP address, while important for network configuration, is not part of the Tableau Server installation process. Option B is incorrect as configuring the firewall to allow all traffic is overly permissive and not a recommended security practice. Option D is incorrect because a GUI is not necessary for Tableau Server installation on Linux, which can be fully performed via CLI.

NEW QUESTION # 141

.....

FreeDumps is a leading platform in this area by offering the most accurate Analytics-Arch-201 exam questions to help our customers to pass the exam. And we are grimly determined and confident in helping you. With professional experts and brilliant teamwork, our Analytics-Arch-201 practice materials have helped exam candidates succeed since the beginning. To make our Analytics-Arch-201 simulating exam more precise, we do not mind splurge heavy money and effort to invite the most professional

teams into our group.

Analytics-Arch-201 Sample Questions Answers: <https://www.freedumps.top/Analytics-Arch-201-real-exam.html>

- Salesforce Analytics-Arch-201 Dumps PDF And Practice Test Software ☐ Enter 「 www.examdiscuss.com 」 and search for 【 Analytics-Arch-201 】 to download for free ☐New Analytics-Arch-201 Test Sims
- 2026 Analytics-Arch-201 Reliable Test Cram| Accurate Salesforce Certified Tableau Architect 100% Free Sample Questions Answers ☐ Go to website “ www.pdfvce.com ” open and search for 《 Analytics-Arch-201 》 to download for free ☐Relevant Analytics-Arch-201 Questions
- Analytics-Arch-201 Reliable Test Cram - Download Sample Questions Answers for Salesforce Analytics-Arch-201 Exam – Pass Analytics-Arch-201 Fast ☐ ➡ www.examcollectionpass.com ☐ is best website to obtain ☐ Analytics-Arch-201 ☐ for free download ☐New Analytics-Arch-201 Dumps Free
- 2026 Analytics-Arch-201 Reliable Test Cram| Accurate Salesforce Certified Tableau Architect 100% Free Sample Questions Answers ☐ Enter ➡ www.pdfvce.com ☐ and search for ☐ Analytics-Arch-201 ☐ to download for free ☐ ☐Analytics-Arch-201 Exam Details
- 2026 Reliable Analytics-Arch-201: Salesforce Certified Tableau Architect Reliable Test Cram ☐ Go to website ➡ www.prep4sures.top ☐ open and search for ➤ Analytics-Arch-201 ☐ to download for free ☐Braindumps Analytics-Arch-201 Pdf
