## Reliable 1Z1-947 Braindumps Book, Valid 1Z1-947 Exam Topics

It is known to us that more and more companies start to pay high attention to the 1Z1-947 certification of the candidates. Because

these leaders of company have difficulty in having a deep understanding of these candidates, may it is the best and fast way for all leaders to choose the excellent workers for their company by the 1Z1-947 certification that the candidates have gained. There is no doubt that the certification has become more and more important for a lot of people, especial these people who are looking for a good job, and it has been a general trend. More and more workers have to spend a lot of time on meeting the challenge of gaining the 1Z1-947 Certification by sitting for an exam.

## Oracle GoldenGate 19c Implementation Professional Sample Questions (Q138-Q143):

### NEW QUESTION # 138

Which utility is used to view the contents of trail files?

- A. ggconsole
- B. datapump
- C. logdump
- D. trailreader

**Answer: C**

Explanation:

logdump is the diagnostic tool to examine trail files at the record level.

### NEW QUESTION # 139

Initial Load is a process of extracting data records from the source database and loading those records onto the target database. There are many advantages in using GoldenGate to obtain the data from the source and load the records onto the target. What describes the advantage of continuing to make data changes on the source database while loading data onto the target database?

- A. Enable change delivery to handle collisions with initial load.
- B. Enable the LGWR to indicate in the transaction log when initial load commenced.
- C. Enable data changes on source tables without locking tables.
- D. Enable Extract to indicate in the trail file when initial load commenced.

**Answer: C**

Explanation:

"Oracle GoldenGate can perform a one-time initial load while the source tables remain online and active. You do not need to lock the source tables during the load. Oracle GoldenGate tracks ongoing changes with Change Data Capture (CDC) and applies them after the load completes."

### NEW QUESTION # 140

You need to manually patch Oracle GoldenGate source and targets. How should you proceed?

- A. Stop access to the source database. Allow Extract to finish capturing the transaction data that remains in the transaction log and stop Extract. Start applying the patch on the source and on the target. Start the Oracle GoldenGate processes whenever you are ready to begin capturing user activity again.
- B. Stop access to the source and target databases. Start applying the patch on the source. Stop the data pump and Replicat. Apply the patch on the target. Start the Oracle GoldenGate processes whenever you are ready to begin capturing user activity again.
- C. Stop access to the source. Allow Extract to finish capturing the transaction data that remains in the transaction log and stop Extract. Start applying the patch on the source. Wait until the data pump/Replicat are finished processing the data in their respective trails. Stop the data pump/Replicat. Apply the patch on the target. If the patches changed table defs, run DEFGEN for the source tables to generate updated source defs, and then replace the old defs with the new ones in the existing source defs file on the target. Start GG processes when ready to begin capturing activity again.
- D. Stop access to the source and target databases. Allow Extract to finish capturing the transaction data that remains in the transaction log and stop Extract. Start applying the patch on the source. Wait until the data pump (if used) and Replicat are finished processing the data in their respective trails. Stop the data pump and Replicat. Apply the patch on the target. Start the Oracle GoldenGate processes whenever you are ready to begin capturing user activity again.

**Answer: C**

Explanation:

This is the only option that:

- \* Waits for Extract to finish capturing remaining redo/transaction log data
- \* Waits for Data Pump and Replicat to reach EOF
- \* Properly stops components in sequence
- \* Accounts for definition file updates (DEFGEN) if metadata changes

#### NEW QUESTION # 141

Which of these can you not do from the main page of the MA Administration Server web page?

- A. Restart configured Extracts and Replicats.
- B. See the lag time of currently configured Extracts and Replicats.
- C. Fix the situation of what caused the Extract or Replicat to be down from the Critical Event box.
- D. Create an Extract or Replicat.

**Answer: C**

Explanation:

From the main page of the Oracle GoldenGate 19c Microservices Architecture (MA) Administration Server web interface, you can do the following: ? Restart configured Extracts and Replicats ? Create Extract or Replicat processes ? View lag time and status of running processes ? But you cannot directly "fix" the underlying issue causing an Extract or Replicat to fail from the Critical Event box. You may be alerted to the issue there, but resolving it typically requires additional diagnosis or configuration changes via other tools or pages.

#### NEW QUESTION # 142

What is the purpose of a data pump Extract in Oracle GoldenGate?

- A. Encrypts trail files
- B. Directly applies changes to target
- C. Monitors performance metrics
- D. Reads from local trail and forwards to remote system

**Answer: D**

Explanation:

It allows recovery if the network or target system fails by maintaining a local trail.

#### NEW QUESTION # 143

.....

There is always a fear of losing the 1Z1-947 exam and this causes you may loss your money and waste the time. There is no such issue if you study our 1Z1-947 exam questions. Your money and exam attempt is bound to award you a sure and definite success if you study with our 1Z1-947 Study Guide to prepare for the exam. According to our data, our pass rate of the 1Z1-947 practice engine is high as 98% to 100%. So if you choose our 1Z1-947 learning quiz, you will pass for sure.
