Free PDF 2026 Salesforce High Pass-Rate Plat-Admn-301 Detailed Answers

With the most scientific content and professional materials Plat-Admn-301 preparation materials are indispensable helps for your success. Such a valuable acquisition priced reasonably of our Plat-Admn-301 study guide is offered before your eyes, you can feel assured to take good advantage of. And we give some discounts from time to time on our Plat-Admn-301 Exam Questions for promoting. If you come to visit our website more times, you will buy our Plat-Admn-301 practice engine at a more favorable price.

Salesforce Plat-Admn-301 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Security and Access: This section of the exam measures the skills of Salesforce Administrator and covers how record-level access, field access, and sharing models impact data visibility across the system. It focuses on understanding controlled-by-parent relationships, territory management, role hierarchies, and access to reports, dashboards, and email folders. It also includes comparing custom profiles, permission sets, and delegated administration, along with evaluating different authentication methods. The section also addresses the structure of business models such as person accounts, standard accounts, contacts, and contact-to-multiple-account relationships.
Topic 2	<ul style="list-style-type: none"> • Environment Management and Deployment: This section of the exam measures skills of Salesforce Administrator and covers moving metadata between environments using tools such as sandboxes, change sets, and managed or unmanaged AppExchange packages. It explains the capabilities and best practices related to deploying changes through change sets to ensure smooth and controlled migrations.

Topic 3	<ul style="list-style-type: none"> • Data and Analytics Management: This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.
Topic 4	<ul style="list-style-type: none"> • Cloud Applications: This section of the exam measures skills of Salesforce Consultant and covers the standard Salesforce capabilities that support sales and service operations. It includes features such as products, price books, schedules, orders, quotes, and the tools that help with forecasting and territory management. The section also describes how to create Salesforce Knowledge articles, manage entitlements, support service workflows, and enable interactions through chat, case feed, Omni-Channel, console apps, and Experience Cloud sites. It also introduces the broader Salesforce suite that extends core platform functionality.
Topic 5	<ul style="list-style-type: none"> • Process Automation: This section of the exam measures skills of Salesforce Consultant and covers choosing the right automation tools to solve complex business problems. It focuses on understanding the capabilities and limitations of declarative tools, identifying the right troubleshooting methods, and applying automation correctly within Salesforce's order of execution. This section emphasizes designing efficient, scalable automation using workflow tools, flows, and other declarative features.

Salesforce Certified Platform Administrator II Sample Questions (Q18-Q23):

NEW QUESTION # 18

A user started to work remotely. They are having an Issue logging in.
What could be the issue?

- A. The user Is not In the IP range for their profile.
- B. The time zone for the profile is outside of login hours.
- C. They are signing in from a mobile device.
- D. The login session has expired for this user.

Answer: A

Explanation:

IP ranges are settings that restrict login access to Salesforce from specific IP addresses. Administrators can set IP ranges at the org level or at the profile level. If a user tries to log in from an IP address that is outside the allowed range for their profile or their org, they will not be able to access Salesforce. Therefore, if a user started to work remotely and is having an issue logging in, it could be because they are not in the IP range for their profile or their org. htm&type=5

NEW QUESTION # 19

DreamHouse Realty wants to notify an assigned agent when an appointment Is booked on a custom object for one of their listed homes along with the total number of appointments booked so far. The administrator has configured a Roll-up Summary for the number of appointments as well as a flow to detect the creation of a new appointment and send the information to the agent. What consideration about process automation should the administrator be aware of to ensure the right Information is delivered?

- A. Roll-up Summary calculations will prevent a Flow from being triggered.
- B. Rows can only be triggered from the records created on standard objects.
- C. Roll-up Summary calculations run after processes and workflows.
- D. Only standard objects can be used with Roll-up Summary fields.

Answer: C

Explanation:

Roll-up Summary calculations are performed after processes and workflows are executed, which means that any changes made by processes or workflows will not be reflected in the roll-up summary field until after the transaction is committed. This could cause inaccurate or outdated information to be delivered to the agent if the flow relies on the roll-up summary field value.

NEW QUESTION # 20

Ursa Major Solar customer records have a lot of fields and Lightning components to give users a variety of information and available functions. Recently, users have noted that their pages take a long time to load and it's starting to negatively impact their experience. What should the administrator do to help diagnose where improvements can be made?

- A. Use the Apex debugger while loading a customer record.
- B. Review the debug logs from the Developer Console.
- C. Click Analyze from the Lightning App Builder toolbar.
- D. Check the debug logs found in the Environment section of Setup.

Answer: C

Explanation:

The Analyze feature in the Lightning App Builder toolbar is a tool that helps you optimize the performance of your record pages by providing recommendations and insights on how to improve page load time and user experience. It can help you identify which fields and components are taking the most time to load and suggest ways to reduce their impact. You can also compare your page performance with other pages in your org or with Salesforce best practices. References: https://help.salesforce.com/s/articleView?id=sf.lightning_page_optimize.htm&type=5

[lightning_page_optimize.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.lightning_page_optimize.htm&type=5)

NEW QUESTION # 21

An administrator is planning the release process for the year. The team will be using change sets to process deployment to production.

Which three best practices should be considered?

- A. Make sure change sets are limited to 10,000 files.
- B. Be sure to test only after business hours the data after deployment.
- C. Use matching names for global publisher layouts and Outlook publisher layouts.
- D. Plan your deployments around the production and sandbox maintenance schedules.
- E. Make sure to deploy all dependent components.

Answer: A,D,E

Explanation:

Planning deployments around maintenance schedules ensures that there are no interruptions or delays in the deployment process. Deploying all dependent components ensures that there are no missing metadata or references that could cause errors or failures in the deployment. Limiting change sets to 10,000 files ensures that the deployment does not exceed the maximum size limit for change sets.

NEW QUESTION # 22

AW Computing has a private sharing model for its accounts, but a sales rep occasionally needs assistance from an engineer. What feature should be used to grant the engineer access to the necessary account, while maintaining the company's data security?

- A. Account Teams
- B. Permission Set Group
- C. Custom Profile
- D. Permission Set

Answer: A

Explanation:

Account teams are groups of users who work together on an account. Administrators can enable account teams and grant team members different levels of access to accounts and related records such as contacts, opportunities, and cases. By using account teams, Cloud Kicks can grant engineers access to the necessary accounts when they need assistance from them, while maintaining

data security for other accounts that they do not need to access. References: <https://help.salesforce.com/s/articleView?id=sf.accountteam.htm&type=5>
