

DevOps-Foundation Latest Training & Latest DevOps-Foundation Exam Dumps

DOWNLOAD the newest Exam4Free DevOps-Foundation PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=1COaJY7QEAxY09tZFpPC2MyI43eHO5ceo>

You can trust Exam4Free DevOps-Foundation exam real questions and start preparation without wasting further time. We are quite confident that with the Exam4Free DevOps-Foundation real exam questions you will get everything that you need to learn, prepare and pass the challenging Peoplecert DevOps-Foundation Certification Exam easily.

If you are going to look for DevOps-Foundation exam braindumps, you may pay more attention to the quality as well as the pass rate. DevOps-Foundation training materials are edited by experienced experts, and therefore the quality can be guaranteed. With the pass rate reaching 98.65%, our DevOps-Foundation exam materials have received many good feedbacks from candidates. Besides, DevOps-Foundation Exam Materials cover most of knowledge points for the exam, and you can master them well through practicing as well as improve your ability in the process of training. We offer you free update for 365 days, and the update version for DevOps-Foundation exam dumps will be auto sent to you.

Latest DevOps-Foundation Exam Dumps - DevOps-Foundation Valid Test Camp

If you have aspiration to be an IT specialist with considerable salary and work in big company, our Peoplecert exam dumps will make your dream closer. You just need to prepare DevOps-Foundation real questions with one or two days and we will give your support in every steps of your IT test preparation if you have any problems and doubts to our DevOps-Foundation Pdf Torrent.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

Which of the following helps an organization to practice DevSecOps?

- A. Engaging external testing services
- B. Embracing a "shift right" testing strategy approach can take advantage of continuous integration and test-driven development practices
- **C. Security as code**
- D. Conducting frequent security audits after deployment

Answer: C

Explanation:

DevSecOps is about integrating security into every stage of the software delivery lifecycle rather than treating it as a separate, post-development activity. PeopleCert DevOps Foundation v3.6 stresses that security must shift left-moving testing, vulnerability scanning, and compliance checks earlier in the process.

Security as Code means embedding security policies, controls, and checks directly into infrastructure and application code. This includes:

- * Automated vulnerability scanning in CI/CD pipelines
 - * Infrastructure-as-code with integrated security configurations
 - * Policy-as-code to enforce compliance automatically
 - * Static and dynamic application security testing (SAST/DAST) integrated into build pipelines
- While A incorrectly says "shift right" (testing later in production), DevSecOps emphasizes shifting left. B (post-deployment audits) and C (external testing) can complement DevSecOps but don't fully embed security into the delivery workflow.

Therefore, D - Security as code is the most direct enabler of DevSecOps practices.

OWASP DevSecOps Guidelines

NEW QUESTION # 51

Which framework ensures that ITSM processes are designed with just enough control and structure in order to effectively and efficiently deliver services that facilitate customer outcomes when and how they are needed?

- A. ITIL
- **B. Agile Service Management**
- C. COBIT
- D. DevOps

Answer: B

Explanation:

Agile Service Management (Agile SM) applies Agile principles to the design and improvement of IT Service Management (ITSM) processes. Its goal is to create processes that are lightweight, adaptable, and customer-focused, ensuring they provide just enough control to meet objectives without creating unnecessary bureaucracy.

This framework helps align ITSM practices with the speed and flexibility required in a DevOps environment, ensuring that services can be delivered in a timely, efficient, and outcome-focused manner.

A (ITIL) provides a comprehensive ITSM framework but is not inherently Agile. B (COBIT) focuses on governance rather than process agility. D (DevOps) is a cultural and technical movement, not specifically a framework for ITSM process design.

Thus, C is correct.

NEW QUESTION # 52

Which of the following is NOT a crucial ingredient when leading a digital transformation?

- A. Courage
- **B. Command**
- C. Collaboration
- D. Curiosity

Answer: B

Explanation:

Command(authoritarianism) is not a crucial ingredient for leading digital transformation.

The key ingredients:

- * Collaboration
- * Curiosity
- * Courage

DevOps leadership is about empowering teams, experimenting, and driving change, not command-and-control.

Extract-style reference:

"Digital transformation leaders embrace collaboration, curiosity, and courage, fostering an environment where experimentation and learning drive change."

-Accelerate, DevOps Handbook

PeopleCert DevOps Foundation v3.6: Advocates servant and transformational leadership, not command /control.

NEW QUESTION # 53

What is the first step to take when improving DevOps automation?

- **A. Architect before automating**
- B. Build a DevOps toolchain
- C. Replace proprietary software with open source tools
- D. Implement self-service

Answer: A

Explanation:

PeopleCert emphasizes that architecture must be planned before automating processes. This means mapping the value stream, understanding dependencies, identifying bottlenecks, and defining integration points before selecting or configuring tools.

Automating without a clear architecture can lead to fragmented processes, wasted effort, and technical debt.

Once the architecture is sound, teams can implement automation in a way that supports scalability, maintainability, and interoperability.

A(building the toolchain) is important but comes after architecture. C(switching to open source) is a tooling decision, not the first automation step. D(self-service) is a benefit of automation, not the starting point.

Thus, B-Architect before automating-is the correct first step.

NEW QUESTION # 54

Which of the following metrics relates to The Third Way?

- A. Change fail rate
- **B. Hypothesis or experiments log**
- C. Change lead times
- D. Change cycle times

Answer: B

Explanation:

The Third Way in DevOps emphasizes continuous learning and experimentation. It's about fostering a culture where teams test hypotheses, take calculated risks, and learn from both successes and failures.

A hypothesis or experiments log directly supports this principle by capturing:

- * The changes or experiments attempted
- * The hypothesis behind them
- * The results and insights gained

Metrics like A, B, and C are more aligned with the First Way(flow) and Second Way(feedback). They measure speed and stability but not the experimental learning process itself.

By tracking experiments, organizations can make data-driven decisions, reinforce a learning culture, and continuously refine practices-core aspects of the Third Way.

NEW QUESTION # 55

.....

It is well known that even the best people fail sometimes, not to mention the ordinary people. In face of the DevOps-Foundation exam, everyone stands on the same starting line, and those who are not excellent enough must do more. Every year there are a large number of people who can't pass smoothly. If you happen to be one of them, our DevOps-Foundation Learning Materials will greatly reduce your burden and improve your possibility of passing the exam. Our advantages of time-saving and efficient can make you no longer be afraid of the DevOps-Foundation exam, and I'll tell you more about its benefits next.
