Microsoft PL-900: Microsoft Power Platform Fundamentals is a certification exam designed to test your knowledge of Microsoft's Power Platform, which is one of the company's most popular business solutions. PL-900 exam covers a wide range of topics, from the basics of the Power Platform to more advanced concepts such as data modeling and analytics. Passing PL-900 exam is an excellent way to demonstrate your expertise in the Power Platform and enhance your career prospects in the field of data analytics and business intelligence.

Identifying the Key Components of Power Platform

This objective is focused on the major concepts relating to the Common Data Service, connectors, and the AI Builder. Under this section, the applicants need to master Power Apps user experience, various use cases, get familiar with Common Data Model, fields, and entities. Then, one's knowledge of trigger types, licensing options, detection model, business card reader, and form

processing model, among the rest, is needed.

The Microsoft PL-900 Exam consists of multiple-choice questions and covers various topics related to the Power Platform, including Power Apps, Power Automate, Power BI, and Common Data Service. PL-900 exam also assesses the candidate's knowledge of the different components of the Power Platform and their ability to create solutions using these components. PL-900 exam is available in multiple languages and can be taken online or at a testing center.

NEW QUESTION # 262

A user is creating their first canvas app in Power Apps.

The user does not know what types of controls they can include.

You need to recommend solutions for the user.

Which types of controls would you recommend using in Power Apps? To answer, select the appropriate control in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Gallery

A Gallery control can show multiple records from a data source, and each record can contain multiple types of data. For example, a Gallery control can show multiple contacts with each item showing contact information that includes a name, an address, and a phone number for each contact.

Box 2: Meeting-screen template

In a canvas app, add a meeting screen that lets users create and send meeting requests from their Office 365 Outlook accounts.

Users can search for attendees in their org and add external email addresses. If your tenant has meeting rooms built into Outlook, users can select a location as well.

Box 3: Image

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.
