

# Interactive JN0-253 EBook | JN0-253 Latest Exam Test

P.S. Free & New JN0-253 dumps are available on Google Drive shared by Pass4Leader: [https://drive.google.com/open?id=1SJxWb9b7FFBuhf\\_bMiDbu\\_3sExh\\_81kW](https://drive.google.com/open?id=1SJxWb9b7FFBuhf_bMiDbu_3sExh_81kW)

Since the childhood, we seem to have been studying and learning seems to take part in different kinds of the purpose of the test, at the same time, we always habitually use a person's score to evaluate his ability. And our JN0-253 real study braindumps can help you get better and better reviews. This is a very intuitive standard, but sometimes it is not enough comprehensive, therefore, we need to know the importance of getting the test JN0-253 Certification, qualification certificate for our future job and development is an important role. Only when we have enough qualifications to prove our ability can we defeat our opponents in the harsh reality. We believe our JN0-253 actual question will help you pass the qualification examination and get your qualification certificate faster and more efficiently.

It means that our JN0-253 test questions are very useful for all people to achieve their dreams, and the high quality of our JN0-253 exam prep is one insurmountable problem. If you decide to choice our products as your study tool, you will be easier to pass your exam and get the JN0-253 Certification in the shortest time. So do not hesitate and buy our JN0-253 test torrent, an unexpected surprise is awaiting you, we believe you will prefer to our JN0-253 test questions than other study materials.

## JN0-253 PDF Dumps - The most beneficial Option For Certification Preparation

Nowadays, online shopping has been greatly developed, but because of the fear of some uncontrollable problems after payment, there are still many people don't trust to buy things online, especially electronic products. But you don't have to worry about this when buying our JN0-253 Study Materials. Not only will we fully consider for customers before and during the purchase, but we will also provide you with warm and thoughtful service after payment. We have a special technical customer service staff to solve all kinds of consumers' problems.

### Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> <li>• Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Juniper Mist Configuration Basics: This domain addresses initial setup including user accounts, device onboarding, organizational structures, subscription licensing, certificate management, and automated provisioning with labels and policies.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.</li> </ul>

## Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q41-Q46):

### NEW QUESTION # 41

How often does Marvis Minis execute automatic validations?

- A. Every day
- B. Every 30 minutes
- C. Every hour
- D. Every week

**Answer: C**

Explanation:

Marvis Minis continuously validates the health of network services by performing synthetic tests at predefined intervals without requiring user intervention. These tests simulate real client interactions - such as authentication, DHCP, DNS, and application reachability - to detect network issues proactively.

According to the Juniper Mist Marvis Minis Technical Overview, the feature performs:

"Automated validations every hour to ensure wireless, wired, and WAN network services are operating as expected." Each validation cycle allows the Minis agent (running on Mist Access Points) to verify connectivity and performance parameters across key stages of the client experience. If any issues are detected, they are automatically surfaced in the Marvis Actions dashboard for further analysis.

While administrators can trigger additional manual tests, automatic validations occur every hour by default across all enabled sites. Therefore, the correct answer is B. Every hour.

### NEW QUESTION # 42

Exhibit:

Referring to the exhibit, how many Marvis for Wireless subscriptions have been purchased and onboarded?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

Explanation:

In the Juniper Mist Cloud Portal, the Subscriptions page provides a summary of all service entitlements associated with an

organization, including the number of licenses purchased and onboarded for each Mist Cloud service. According to the official Juniper Mist Cloud Administration Guide, this section displays key fields such as Service Name, Purchased, Onboarded, Start Date, and End Date. The Purchased column indicates the total number of subscriptions bought, while the Onboarded column represents how many of those have been actively assigned and deployed within the organization's network.

In the exhibit, the entry for Marvis for Wireless shows 103 purchased and 82 onboarded, meaning that while 103 licenses were obtained, only 82 have been claimed and are in use within the system.

Therefore, the correct number of onboarded Marvis for Wireless subscriptions is 82.

### NEW QUESTION # 43

Which two statements are correct about the Juniper Mist vBLE Asset Visibility mode? (Choose two.)

- A. The vBLE antenna tracks chirps from BLE tags.
- B. The vBLE antenna communicates with mobile devices running the Juniper Mist location SDK.
- C. The vBLE antenna is in the transmit mode.
- D. The vBLE antenna is in the receive mode.

**Answer: A,D**

Explanation:

Juniper Mist's virtual Bluetooth Low Energy (vBLE) technology is designed to deliver precise indoor location services using cloud-managed access points equipped with integrated BLE antenna arrays. The system supports multiple operational modes, including Engagement Mode (for mobile app interactions) and Asset Visibility Mode (for BLE tag tracking).

According to the Juniper Mist Location Services Documentation, in Asset Visibility Mode, the vBLE antenna functions primarily in receive mode to detect and process signals emitted from BLE asset tags. These tags periodically transmit Bluetooth "chirps" that are received by multiple APs. Mist Cloud then uses angle-of-arrival (AoA) and RSSI triangulation algorithms to determine the exact location of the asset within the facility.

The documentation specifies:

"In Asset Visibility Mode, the vBLE antenna operates in receive mode and listens for BLE tag beacons (chirps). The system triangulates these signals to calculate the real-time location of tracked assets." Conversely, Engagement Mode is the configuration in which vBLE operates in transmit mode to interact with mobile devices running the Mist SDK - which corresponds to location-based engagement or proximity notifications.

Thus, the correct answers are:

- \* A. The vBLE antenna is in the receive mode
- \* B. The vBLE antenna tracks chirps from BLE tags

### NEW QUESTION # 44

You are asked to create a real-time visualization dashboard which displays clients on a map.

Which two Juniper Mist functions would you use in this scenario? (Choose two.)

- A. WebSocket
- B. Live View
- C. RESTful API
- D. Webhooks

**Answer: A,B**

Explanation:

When developing a real-time visualization dashboard that displays client locations on a map, Juniper Mist offers specific APIs and data streaming methods to support dynamic updates.

According to the Juniper Mist Developer Documentation, the WebSocket interface enables continuous, real-time streaming of client location and telemetry data directly from the Mist Cloud. This mechanism is ideal for live dashboards, as it eliminates the need for repeated REST API polling. WebSocket connections provide instant updates whenever a device moves, connects, or disconnects, ensuring the displayed map remains accurate in real time.

The Live View feature complements this functionality within the Mist Cloud and third-party integrations. It allows administrators and

developers to view live location movements of Wi-Fi clients, BLE beacons, and IoT devices within a site's floor plan. It uses telemetry directly from access points, offering second-by-second updates.

In contrast, RESTful APIs and Webhooks are designed for event-based automation and configuration management rather than live visualization. REST APIs are best for historical or static data retrieval, while Webhooks are used for triggering external actions based on events.

Therefore, the correct functions for real-time map visualization are:

- \* WebSocket (C)- for continuous live data streaming
- \* Live View (D)- for direct map-based visualization of client activity

References:- Juniper Mist Developer API and WebSocket Guide- Juniper Mist Location Services and Live View Documentation- Juniper Mist Cloud Architecture Overview

## NEW QUESTION # 45

Which two Mist location tracking components run in the cloud? (Choose two.)

- A. location engine
- B. BLE tag
- C. location sensor
- D. location system

**Answer: A,D**

Explanation:

**Location Engine:** The location engine runs in the cloud and processes data from BLE tags and sensors to determine the location of devices within a network. It performs the necessary computations to provide accurate location tracking and analytics.

**Location System:** The location system, also cloud-based, integrates with the location engine to provide a complete solution for tracking and managing location data within Mist's ecosystem. This system supports various applications such as asset tracking, wayfinding, and proximity-based services.

## NEW QUESTION # 46

.....

Our JN0-253 exam materials are formally designed for the exam. With its help, you don't have to worry about the exam any more for it almost guarantees you get what you want. If you think I'm exaggerating, you might as well take a look at our JN0-253 Actual Exam. With a high pass rate as 98% to 100%, you will be bound to pass the exam. And our JN0-253 training questions are popular in the market. We believe you will make the right choice.
