

# Marvelous CIPM Best Practice—Pass CIPM First Attempt

---

## CIPM Practice Exam

Which of the following is not a metric an organization would use? - ✓ ✓ Minimize security threats

Which of the following is least likely a goal of an organization's privacy program? - ✓ ✓ Hiring a privacy officer or manager

In which of the following ways can internal audit most likely help a privacy program? - ✓ ✓ Providing consultancy services

What can be considered to be the essence of an organization's privacy notice communicated to the outside world? - ✓ ✓ A promise on handling

Which of the following is most true about privacy by design? - ✓ ✓ Results, partly, in compliance with the General Data Protection Regulation

Which of the following is the best description of an accountable organization? - ✓ ✓ An organization with the necessary policies and procedures

Which step is likely not part of a privacy program with the goal to protect an organization's brand? - ✓ ✓ Prevent phishing e-mails using the company logo from being sent

What is "the authority aims to safeguard the balance between the right to privacy and other rights"? - ✓ ✓ A mission or vision

A manufacturing company has placed computers all around the manufacturing area to help machine operators to relax during their lunch break and check their e-mails or social media. The company is doing so in an attempt to stop the machine operators from being distracted by their phones during their work and all the dangers that come with being distracted in a manufacturing area.

All the computers are connected to both the intranet and the internet. This allows an internal news bulletin and all policies and procedures to be displayed easily. There are regular updates, for example on family events, updates of procedures, bonus-related information and news on the employee of the month.

P.S. Free 2026 IAPP CIPM dumps are available on Google Drive shared by Prep4sureExam: [https://drive.google.com/open?id=1wSla\\_j8b8D7yjGQAr6dpjcdlKGfVDd7p](https://drive.google.com/open?id=1wSla_j8b8D7yjGQAr6dpjcdlKGfVDd7p)

As old saying goes, knowledge is wealth. So our CIPM exam questions will truly teach you a lot of useful knowledge, which can compensate for your shortcomings. Actions speak louder than words. You are supposed to learn to make a rational plan of life. Our CIPM Real Exam will accompany you to grow stronger. And the more you know, the more easily you can cope with the difficulties in your work. And the most important is that you can get the CIPM certification.

The CIPM certification exam covers various topics related to privacy management, including privacy program governance, privacy program development, and privacy program management. CIPM exam is designed to test the candidate's knowledge of various privacy laws and regulations, such as the GDPR, CCPA, HIPAA, and other privacy laws that are relevant to their respective jurisdictions.

Achieving the CIPM certification demonstrates a commitment to the privacy profession and a dedication to staying up-to-date with the latest privacy laws and regulations. It also provides a competitive edge in the job market, as many organizations recognize the value of privacy management and seek out qualified professionals to manage their privacy programs. Whether you are a privacy professional looking to advance your career or an organization seeking to build a strong privacy program, the CIPM Certification Exam is an excellent way to demonstrate your expertise and stand out in the field.

The client can try out our and download CIPM Guide materials freely before the sale and if the client have problems about our CIPM study braindumps after the sale they can contact our customer service at any time.

To prepare for the CIPM Certification Exam, candidates can take advantage of a range of resources offered by the IAPP, including training courses, study materials, and practice exams. By investing time and effort into preparing for the exam, professionals can achieve a certification that will enhance their career prospects and help them to become leaders in the field of privacy management.

### IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q210-Q215):

#### NEW QUESTION # 210

A systems audit uncovered a shared drive folder containing sensitive employee data with no access controls and therefore was available for all employees to view. What is the first step to mitigate further risks?

- A. Restrict access to the folder.
- B. Notify all employees whose information was contained in the file.
- C. Check access logs to see who accessed the folder.
- D. Notify legal counsel of a privacy incident.

**Answer: A**

Explanation:

Explanation

The first step to mitigate further risks when a systems audit uncovers a shared drive folder containing sensitive employee data with no access controls is to restrict access to the folder. This can be done by implementing appropriate access controls, such as user authentication, role-based access, and permissions, to ensure that only authorized individuals can view and access the sensitive data.

#### NEW QUESTION # 211

##### SCENARIO

Please use the following to answer the next QUESTION:

It's just what you were afraid of. Without consulting you, the information technology director at your organization launched a new initiative to encourage employees to use personal devices for conducting business. The initiative made purchasing a new, high-specification laptop computer an attractive option, with discounted laptops paid for as a payroll deduction spread over a year of paychecks. The organization is also paying the sales taxes. It's a great deal, and after a month, more than half the organization's employees have signed on and acquired new laptops. Walking through the facility, you see them happily customizing and comparing notes on their new computers, and at the end of the day, most take their laptops with them, potentially carrying personal data to their homes or other unknown locations. It's enough to give you data- protection nightmares, and you've pointed out to the information technology Director and many others in the organization the potential hazards of this new practice, including the inevitability of eventual data loss or theft.

Today you have in your office a representative of the organization's marketing department who shares with you, reluctantly, a story with potentially serious consequences. The night before, straight from work, with laptop in hand, he went to the Bull and Horn Pub to play billiards with his friends. A fine night of sport and socializing began, with the laptop "safely" tucked on a bench, beneath his jacket. Later that night, when it was time to depart, he retrieved the jacket, but the laptop was gone. It was not beneath the bench or on another bench nearby. The waitstaff had not seen it. His friends were not playing a joke on him. After a sleepless night, he confirmed it this morning, stopping by the pub to talk to the cleanup crew. They had not found it. The laptop was missing. Stolen, it seems. He looks at you, embarrassed and upset.

You ask him if the laptop contains any personal data from clients, and, sadly, he nods his head, yes. He believes it contains files on about 100 clients, including names, addresses and governmental identification numbers. He sighs and places his head in his hands in despair.

From a business standpoint, what is the most productive way to view employee use of personal equipment for work-related tasks?

- A. The use of personal equipment is a cost-effective measure that leads to no greater security risks than are always present in a modern organization.
- B. The use of personal equipment must be reduced as it leads to inevitable security risks.

- C. Any computer or other equipment is company property whenever it is used for company business.
- D. While the company may not own the equipment, it is required to protect the business-related data on any equipment used by its employees.

**Answer: D**

Explanation:

This answer reflects the principle of accountability, which states that the company is responsible for ensuring that personal data is processed in compliance with applicable laws and regulations, regardless of who owns or controls the equipment that stores or processes the data. The company should establish policies and procedures for managing the use of personal equipment for work-related tasks, such as requiring encryption, authentication, remote wipe, backup and reporting of incidents. The company should also provide training and awareness to the employees on how to protect the data on their personal equipment and what are their obligations and liabilities. **NEW QUESTION # 212**

Under the General Data Protection Regulation (GDPR), which of the following situations would LEAST likely require a controller to notify a data subject?

- A. A hacker publishes usernames, phone numbers and purchase history online after a cyber-attack
- B. Personal data of a group of individuals is erroneously sent to the wrong mailing list
- C. A direct marketing email is sent with recipients visible in the 'cc' field
- D. An encrypted USB key with sensitive personal data is stolen

**Answer: D**

Explanation:

Under the GDPR, a controller must notify a data subject of a personal data breach without undue delay when the breach is likely to result in a high risk to the rights and freedoms of the data subject, unless one of the following conditions applies: the personal data are rendered unintelligible to any person who is not authorized to access it, such as by encryption; the controller has taken subsequent measures to ensure that the high risk is no longer likely to materialize; or the notification would involve disproportionate effort, in which case a public communication or similar measure may suffice. In this case, an encrypted USB key with sensitive personal data is stolen, but the personal data are presumably unintelligible to the thief, so the controller does not need to notify the data subject. However, the controller still needs to notify the supervisory authority within 72 hours of becoming aware of the breach, unless the breach is unlikely to result in a risk to the rights and freedoms of natural persons.

**NEW QUESTION # 213**

**SCENARIO**

Please use the following to answer the next question:

Your organization, the Chicago (U.S.)-based Society for Urban Greenspace, has used the same vendor to operate all aspects of an online store for several years. As a small nonprofit, the Society cannot afford the higher-priced options, but you have been relatively satisfied with this budget vendor, Shopping Cart Saver (SCS). Yes, there have been some issues. Twice, people who purchased items from the store have had their credit card information used fraudulently subsequent to transactions on your site, but in neither case did the investigation reveal with certainty that the Society's store had been hacked. The thefts could have been employee-related.

Just as disconcerting was an incident where the organization discovered that SCS had sold information it had collected from customers to third parties. However, as Jason Roland, your SCS account representative, points out, it took only a phone call from you to clarify expectations and the "misunderstanding" has not occurred again.

As an information-technology program manager with the Society, the role of the privacy professional is only one of many you play. In all matters, however, you must consider the financial bottom line. While these problems with privacy protection have been significant, the additional revenues of sales of items such as shirts and coffee cups from the store have been significant. The Society's operating budget is slim, and all sources of revenue are essential.

Now a new challenge has arisen. Jason called to say that starting in two weeks, the customer data from the store would now be stored on a data cloud. "The good news," he says, "is that we have found a low-cost provider in Finland, where the data would also

be held. So, while there may be a small charge to pass through to you, it won't be exorbitant, especially considering the advantages of a cloud." Lately, you have been hearing about cloud computing and you know it's fast becoming the new paradigm for various applications. However, you have heard mixed reviews about the potential impacts on privacy protection. You begin to research and discover that a number of the leading cloud service providers have signed a letter of intent to work together on shared conventions and technologies for privacy protection. You make a note to find out if Jason's Finnish provider is signing on.

What is the best way to prevent the Finnish vendor from transferring data to another party?

- A. Restrict the vendor to using company security controls
- B. Offer company resources to assist with the processing
- C. Lock the data down in its current location
- D. **Include transfer prohibitions in the vendor contract**

**Answer: D**

#### **NEW QUESTION # 214**

A Human Resources director at a company reported that a laptop containing employee payroll data was lost on the train. Which action should the company take IMMEDIATELY?

- A. **Perform a multi-factor risk analysis**
- B. Report the theft to the senior management
- C. Wipe the hard drive remotely
- D. Report the theft to law enforcement

**Answer: A**
