Similarly, bill rates derive invoice amounts when the invoice method classification on a bill plan is rate based.

NEW QUESTION # 43

Select two correct statements about project classifications on a template. (Choose two.)

- A. Project class category in a project classification must be associated with a Set Code.
- B. Set Code is not required for a project class category in a project classification.
- C. Project Classification is a mandatory field on a project template.
- D. When a project is created from a template, the required project classifications must be entered.

Answer: A,D

Explanation:

Project classifications are used to group and report on projects based on different criteria. A project template can have one or more project classifications, which can be either required or optional. When a project is created from a template, the required project classifications must be entered, while the optional ones can be left blank. A project class category in a project classification must be associated with a set code, which determines the list of values for the project class. Project classification is not a mandatory field on a project template, but it is recommended to use it for reporting purposes. NEW QUESTION # 44

Your business user has created a purchase order (PO) that has the following attributes:

Accrue at Receipt = Yes

Matching Option = 2 way

Receipt Close Tolerance = 100%

After approval, the PO is closed for receiving without creating a receipt. An AP invoice is created by matching to the PO. The user now runs Create Accounting for Receiving Transactions and then the "Import and Process Cost transactions" ESS (Enterprise Scheduler Service) job using the Transaction Source parameter as "Oracle Payables". The user notices that there is no cost transferred to the projects. Identify two reasons for this problem. (Choose two.)

- A. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to Yes, cost is transferred to projects only if there are accounted receipt lines.
- B. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to Yes, cost is transferred to project by payables.
- C. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to NO, cost is transferred to projects by receipt accounting.
- D. When you have an AP invoice that is matched against a PO with Accrue at Receipt set to YES, cost is transferred to projects by Cost Management and not by Payables.

Answer: A,D

Explanation:

When the Accrue at Receipt option is set to Yes on a PO, the cost of the items or services is accrued when they are received, not when they are invoiced. Therefore, the cost is transferred to projects by Cost Management and not by Payables. However, if the PO is closed for receiving without creating a receipt, there will be no accounted receipt lines and no cost will be transferred to projects. To transfer the cost to projects, you need to either create a receipt or reopen the PO for receiving.
