The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q94-Q99):

NEW QUESTION # 94

Which of the following is a purpose of mapping capabilities to value stream stages?

- A. To provide a self-contained business description that is independent of the organizational structure.
- B. To identify and eliminate business capabilities that do not contribute to the business.
- C. To describe the business in terms of services provided and consumed.
- D. To classify, group, and align capabilities into categories for a deeper understanding.

Answer: D

Explanation:

One of the purposes of mapping capabilities to value stream stages is to classify, group, and align capabilities into categories for a deeper understanding of how they support value creation and delivery². By mapping capabilities to value stream stages, the architect can identify which capabilities are required for each stage of the value stream, how they relate to each other, and how they contribute to the overall value proposition. This can help to assess the maturity, effectiveness, performance, and value or cost contribution of each capability.

NEW QUESTION # 95

What is defined as the effect of uncertainty on objectives?

- A. Vulnerability
- B. Risk
- C. Threat
- D. Continuity

Answer: B

Explanation:

Risk is defined as the effect of uncertainty on objectives. It can be positive or negative depending on whether it enhances or hinders the achievement of objectives. Threat is a potential cause of risk that could have a negative impact on objectives. Continuity is the ability to maintain or resume normal operations after a disruption or disaster. Vulnerability is a weakness or exposure that could be exploited by a threat to cause harm or damage.

NEW QUESTION # 96

In what TOGAF ADM phase should the architect locate existing architecture descriptions to create an information map?

- A. Phase E
- **B. Phase A**
- C. Preliminary Phase
- D. Phase B

Answer: B

Explanation:

In the TOGAF ADM cycle, Phase A, the Architecture Vision phase, is where the architect would locate existing architecture descriptions to create an information map. This phase involves understanding the strategic context for the architecture work, defining the scope, identifying stakeholders, creating the Architecture Vision, and obtaining approvals to proceed with the work. Part of this involves reviewing existing documentation to understand the current state of the architecture and the information that is already available, which would be useful for creating an information map.

NEW QUESTION # 97

Consider the following example value stream:

□ Which of the following statements is most correct?

- **A. The value stream is decomposed into five value stream stages**
- B. The value stream is mapped to five subsidiary value streams.
- C. The value stream consists of five sequential subprocesses.
- D. The value stream is decomposed into five sequential events.

Answer: A

Explanation:

According to the TOGAF Series Guide to Value Streams (Version 1), a value stream stage is defined as "a distinct part of a value stream that represents a group of activities contributing to an overall result" 5. A value stream stage can be expressed as a noun phrase that indicates what outcome or state is achieved by completing the stage5. For example, some possible value stream stages are "Product Ordered", "Payment Processed", or "Customer Satisfied". The example value stream shows how an online retailer creates and delivers value for its customers by performing five value stream stages: "Acquire Retail Product", "Advertise Channels", "Display Products", "Enable Selection", "Process Payment", and "Deliver Product(s)" 5. Therefore, the value stream is decomposed into five value stream stages.

NEW QUESTION # 98

Which of the following best describes a business capability?

- A. It is a detailed description of the architectural approach to realize a particular solution.
- **B. It delineates what a business does without an explanation of how, why, or where the capability is used.**
- C. It is an articulation of the relationships between business entities that make up the enterprise.
- D. It is a qualitative statement of intent that should be met by the enterprise architecture capability developing the business architecture.

Answer: B

Explanation:

In TOGAF, a business capability represents a high-level abstraction of what a business does, independent of how, why, or where the capability is used. Here's a detailed explanation:

* Definition of Business Capability:

* Business Capability: A business capability describes the capacity or ability of a business to act or achieve a specific outcome. It is an abstraction of the business functions, representing what the business does.

* Key Characteristics:

* What, Not How: A business capability focuses on what the business does, without delving into the specifics of how, why, or where it is implemented or utilized. This abstraction helps in maintaining a clear and consistent understanding across the organization.

* Independence: Business capabilities are designed to be independent of the organizational structure, processes, or systems that support them. This ensures that they remain stable even as the organization evolves.

* TOGAF References:

* Phase B: Business Architecture: In this phase, business capabilities are identified and mapped to understand the core functions of the business. This helps in aligning the architecture with business strategy and objectives.

* **Capability-Based Planning:** TOGAF emphasizes capability-based planning, where business capabilities are used as the foundation for planning and decision-making.

NEW QUESTION # 99

We will have a dedicated specialist to check if our OGBA-101 learning materials are updated daily. We can guarantee that our OGBA-101 exam question will keep up with the changes by updating the system, and we will do our best to help our customers obtain the latest information on learning materials to meet their needs. If you choose to purchase our OGBA-101 quiz torrent, you will have the right to get the update system and the update system is free of charge. We do not charge any additional fees. Once our OGBA-101 Learning Materials are updated, we will automatically send you the latest information about our OGBA-101 exam question. We assure you that our company will provide customers with a sustainable update system.
