## 100% Pass-Rate 350-701 Reliable Exam Prep Help You to Get Acquainted with Real 350-701 Exam Simulation

Our 350-701 practice dumps are so popular that all our customers are giving high praise on its high-quality to help them pass the exams. Numerous of warming feedbacks from our worthy customers give us data and confidence. We have clear data collected from customers who chose our 350-701 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our 350-701 exam questions!

### Secure Network Visibility, Access, and Enforcement – 15%

- Explaining the device compliance & application control benefits;
- Configuring and verifying the function of network access device, such as 802.1X, WebAuth, and MAB;
- Explaining the capacity, benefits, and components of the security products & solutions, such as Cisco Stealthwatch, Cisco Umbrella Investigate, Cisco Stealthwatch Cloud, Cisco pxGrid, and others.
- Explaining identity management & secure network access concepts, such as profiling, posture assessment, guest services, as well as BYOD;

### Exam Topics

The candidates for the Cisco 350-701 Exam are required to develop a good comprehension of the topics covered in its content before attempting the test. The detailed outline of knowledge and skills measured in the exam can be downloaded from the official website. A brief description of the domains of the 350-701 certification test is provided below:

Security Concepts – 25%

- Describing the function of the endpoint in the protection of humans from phishing & social engineering attacks;
- Comparing the most often security vulnerabilities, such as weak and hardcoded passwords, software bugs, SQL injection, path traversal, buffer overflow, missing encryption, and cross-site scripting/forgery;
- Comparing the site-to-site VPN as well as remote access VPN deployment kinds, including IPsec, sVTI, Cryptomap, FLEXVPN, DMVPN, etc;
- Describing the functionality of the cryptography elements, such as encryption, hashing, NAT-T IPv4 for IPsec, SSL, PKI, IPsec, pre-shared key & certificate-based authorization;
- Describing North Bound & South Bound APIs within the SDN architecture;
- Interpreting the elementary Python scripts that are utilized to call Cisco Security appliances APIs.
- Explaining security intelligence consumption, sharing, and authoring;

## Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q544-Q549):

### NEW QUESTION # 544

Refer to the exhibit,

```
*Jul 1 15:33:50.027: ISAKMP: (0):Enqueued KEY_MGR_SESSION_CLOSED for Tunnel0 deletion
*Jul 1 15:33:50.027: ISAKMP: (0):Deleting peer node by peer_reap for 2.2.2.2: D1250B0
*Jul 1 15:33:50.029: ISAKMP: (1001):peer does not do paranoid keepalives.
*Jul 1 15:33:54.781: ISAKMP-PAK: (0):received packet from 2.2.2.2 dport 500 sport 500 Global (N) NEW SA
*Jul 1 15:33:54.781: ISAKMP: (0):Created a peer struct for 2.2.2.2, peer port 500
*Jul 1 15:33:54.781: ISAKMP: (0):New peer created peer = 0x11026528 peer_handle = 0x80000004
*Jul 1 15:33:54.781: ISAKMP: (0):Locking peer struct 0x11026528, refcount 1 for crypto_isakmp_process_block
*Jul 1 15:33:54.782: ISAKMP: (0):local port 500, remote port 500
*Jul 1 15:33:54.782: ISAKMP: (0):Find a dup sa in the av tree during calling isadb_insert sa = 104E3C68
*Jul 1 15:33:54.782: ISAKMP: (0):Input = IKE_MSG_FROM_PEER, IKE_MM_EXCH
*Jul 1 15:33:54.782: ISAKMP: (0):Old State = IKE_READY New State = IKE_R_MM1
```

which command results in these messages when attempting to troubleshoot an IPsec VPN connection?

- A. debug crypto ipsec endpoint
- **B. debug crypto isakmp**
- C. debug crypto Ipsec
- D. debug crypto isakmp connection

**Answer: B**

Explanation:

The command that results in these messages when attempting to troubleshoot an IPsec VPN connection is debug crypto isakmp. This command displays debug information about the Internet Key Exchange (IKE) protocol, which is used to establish security associations (SAs) for IPsec VPNs. The messages in the exhibit show various steps and statuses of the IKE negotiation process, such as creating and deleting peer structures, receiving and sending packets, and checking the compatibility of the security policies and proposals. The other commands are either invalid (debug crypto ipsec endpoint and debug crypto isakmp connection) or display different information (debug crypto ipsec shows the details of the IPsec encryption and decryption operations). ### NEW QUESTION # 545

Drag and drop the capabilities of Cisco Firepower versus Cisco AMP from the left into the appropriate category on the right.

|   |                 |
|---|-----------------|
| provides detection, blocking, tracking, analysis and remediation to protect against targeted persistent malware attacks | Cisco Firepower |
| provides superior threat prevention and mitigation for known and unknown threats  |                 |
| provides outbreak control through custom detections   |                 |
| provides the root cause of a threat based on the indicators of compromise seen  | Cisco AMP       |
| provides the ability to perform network discovery   |                 |
| provides intrusion prevention before malware compromises the host   |                 |

**Answer:**

**Explanation:**

|   |                 |
|---|-----------------|
| provides detection, blocking, tracking, analysis and remediation to protect against targeted persistent malware attacks | Cisco Firepower |
| provides the ability to perform network discovery   |                 |
| provides superior threat prevention and mitigation for known and unknown threats  |                 |
| provides outbreak control through custom detections   | Cisco AMP       |
| provides the root cause of a threat based on the indicators of compromise seen  |                 |
| provides intrusion prevention before malware compromises the host   |                 |

**NEW QUESTION # 546**

What two mechanisms are used to redirect users to a web portal to authenticate to ISE for guest services?  
(Choose two.)

- A. single sign-on
- B. local web auth
- C. TACACS+
- D. central web auth
- E. multiple factor auth

**Answer: B,D**

**NEW QUESTION # 547**

In an IaaS cloud services model, which security function is the provider responsible for managing?

- A. firewalling virtual machines
- B. Internet proxy

- C. hypervisor OS hardening
- D. CASB

**Answer: C**

Explanation:

Infrastructure as a Service (IaaS) in cloud computing is one of the most significant and fastest growing field. In this service model, cloud providers offer resources to users/machines that include computers as virtual machines, raw (block) storage, firewalls, load balancers, and network devices.

#### NEW QUESTION # 548

What does endpoint isolation in Cisco AMP for Endpoints security protect from?

- A. an infection spreading across the network E
- B. an infection spreading across the LDAP or Active Directory domain from a user account
- C. a malware spreading across the user device
- D. a malware spreading across the LDAP or Active Directory domain from a user account

**Answer: B**

Explanation:

<https://community.cisco.com/t5/endpoint-security/amp-endpoint-isolation/td-p/4086674#:~:text=Isolating%20an>
