## Latest Deep-Security-Professional Training Tools – Marvelous Detailed Study Dumps Provider for Deep-Security-Professional

Before you take the Deep-Security-Professional exam, you only need to spend 20 to 30 hours to practice, so you can schedule time to balance learning and other things. Of course, you care more about your passing rate. If you choose our Deep-Security-Professional exam guide, under the guidance of our Deep-Security-Professional exam torrent, we have the confidence to guarantee a passing rate of over 99%. Our Deep-Security-Professional Quiz prep is compiled by experts based on the latest changes in the teaching syllabus and theories and practices. So our Deep-Security-Professional quiz prep is quality-assured, focused, and has a high hit rate.

## Trend Micro Certified Professional for Deep Security Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which of the following statements is true regarding Deep Security Relays?

- **A. Deep Security Agents communicate with Deep Security Relays to obtain security up-dates.**
- B. Deep Security Relays are able to process Deep Security Agent requests during updates.
- C. Deep Security Agents promoted to Deep Security Relays no longer provide the security capabilities enabled by the Protection Modules.
- D. Both 32-bit and 64-bit Deep Security Agents can be promoted to a Deep Security Relay.

**Answer: A**

#### NEW QUESTION # 53

The Firewall Protection Module is enabled on a server through the computer details. What is default behavior of the Firewall if no rules are yet applied?

- **A. A collection of default rules will automatically be assigned when the Firewall Protection Module is enabled.**
- B. All traffic is passed through the Firewall using a Bypass rule
- C. All traffic is blocked by the firewall until an Allow rule is assigned.
- D. All traffic is permitted through the firewall until either a Deny or Allow rule is assigned.

**Answer: A**

Explanation:

Deep Security provides a set of Firewall rules that can be applied to policies or directly to a computer. These default rules provide coverage for typical scenarios.

Set up the Deep Security firewall

#### NEW QUESTION # 54

Which of the following statements correctly describes Smart Folders?

- A. Smart Folders are the containers used to store the results of Recommendation Scans. Once a Recommendation Scan has completed, and administrator can click a Smart Folder and select which of the recommended rules to apply.
- B. Smart Folders identify the folders that will be scanned when a Real-Time, Manual or Scheduled malware scan is run.
- C. Smart Folders are a collection of subfolders containing the policy settings that are applied to child policies or directly to Computers.
- **D. Smart Folders act as a saved search of computers which is executed each time the folder is clicked to display its contents.**

**Answer: D**

Explanation:

Smart Folders are used to group your computers dynamically. The computers displayed in a Smart Folder are determined by a set of custom rules, that act as a saved search which is executed each time you click on the folder to display its contents. This allows administrators to easily filter and group computers by these defined properties.

Explication: Study Guide - page (127)

#### NEW QUESTION # 55

Multi-tenancy is enabled in Deep Security and new tenants are created. Where does the new tenant data get stored when using SQL Server as the Deep Security database?

- **A. An additional database is created in SQL Server for each new tenant to store its data.**
- B. An additional table is created for each new tenant in the existing database in the SQL Server database to store its data.
- C. The new tenant data is added to the existing SQL Server database.
- D. An additional user is created for each new tenant in the SQL Server database to store its data.

**Answer: A**

Explanation:

When using SQL Server as the backend for Trend Micro Deep Security with multi-tenancy enabled, each new tenant is assigned its

own separate database. This ensures logical isolation and easier management.

From the official documentation:

"If you are using Microsoft SQL Server as the database platform, a new database is created for each tenant that you add." Option C is correct.

Options A, B, and D are incorrect per the official multi-tenancy architecture.
