頂尖的312-85題庫資訊 |高通過率的考試材料|免費下載312-85試題

NewDumps 是個很好的為 ECCouncil 312-85 認證考試提供方便的網站。根據過去的考試練習題和答案的研究，它能有效的捕捉 ECCouncil 312-85 認證考試試題內容。我們提供的 312-85 考試練習題與真實的考試題有緊密的相似

性。而且 312-85 考題一直備受考生的稱贊，很多考生使用後，都知道出題高，讓他們順利過關。

Eccouncil 312-85認證考試是一項具有挑戰性的考試，需要大量準備。候選人需要對考試所涵蓋的主題有很好的了解，他們應該在威脅情報分析方面具有動手經驗。該考試旨在測試候選人在網絡安全領域的知識，技能和能力。通過考試的候選人被授予認證威脅情報分析師認證，這是一個有價值的證書，可以幫助他們在網絡安全領域提高職業。

最新的 Certified Threat Intelligence Analyst 312-85 免費考試真題 (Q59-Q64):

問題 #59
An XYZ organization hired Mr. Andrews, a threat analyst. In order to identify the threats and mitigate the effect of such threats, Mr. Andrews was asked to perform threat modeling. During the process of threat modeling, he collected important information about the treat actor and characterized the analytic behavior of the adversary that includes technological details, goals, and motives that can be useful in building a strong countermeasure.
What stage of the threat modeling is Mr. Andrews currently in?

- A. System modeling
- B. Threat profiling and attribution
- C. Threat determination and identification
- D. Threat ranking

答案：B

問題 #60
Daniel is a professional hacker whose aim is to attack a system to steal data and money for profit. He performs hacking to obtain confidential data such as social security numbers, personally identifiable information (PII) of an employee, and credit card information. After obtaining confidential data, he further sells the information on the black market to make money.
Daniel comes under which of the following types of threat actor.

- A. Organized hackers
- B. Industrial spies
- C. Insider threat
- D. State-sponsored hackers

答案：A

解題說明：
Daniel's activities align with those typically associated with organized hackers. Organized hackers or cybercriminals work in groups with the primary goal of financial gain through illegal activities such as stealing and selling data. These groups often target large amounts of data, including personal and financial information, which they can monetize by selling on the black market or dark web. Unlike industrial spies who focuson corporate espionage or state-sponsored hackers who are backed by nation-states for political or military objectives, organized hackers are motivated by profit. Insider threats, on the other hand, come from within the organization and might not always be motivated by financial gain. The actions described in the scenario-targeting personal and financial information for sale-best fit the modus operandi of organized cybercriminal groups.References:
* ENISA (European Union Agency for Cybersecurity) Threat Landscape Report
* Verizon Data Breach Investigations Report

問題 #61
Which of the following characteristics of APT refers to numerous attempts done by the attacker to gain entry to the target's network?

- A. Timeliness
- B. Multiphased
- C. Attack origination points
- D. Risk tolerance

答案：B

解題說明：
Advanced Persistent Threats (APTs) are characterized by their 'Multiphased' nature, referring to the various stages or phases the attacker undertakes to breach a network, remain undetected, and achieve their objectives.
This characteristic includes numerous attempts to gain entry to the target's network, often starting with reconnaissance, followed by initial compromise, and progressing through stages such as establishment of a backdoor, expansion, data exfiltration, and maintaining persistence. This multiphased approach allows attackers to adapt and pursue their objectives despite potential disruptions or initial failures in their campaign.References:
* "Understanding Advanced Persistent Threats and Complex Malware," by FireEye
* MITRE ATT&CK Framework, detailing the multiphased nature of adversary tactics and techniques

問題 #62
A threat analyst obtains an intelligence related to a threat, where the data is sent in the form of a connection request from a remote host to the server. From this data, he obtains only the IP address of the source and destination but no contextual information. While processing this data, he obtains contextual information stating that multiple connection requests from different geo-locations are received by the server within a short time span, and as a result, the server is stressed and gradually its performance has reduced. He further performed analysis on the information based on the past and present experience and concludes the attack experienced by the client organization.
Which of the following attacks is performed on the client organization?

- A. DHCP attacks
- B. Bandwidth attack
- C. MAC spoofing attack
- D. Distributed Denial-of-Service (DDoS) attack

答案：D

問題 #63
John, a professional hacker, is trying to perform APT attack on the target organization network. He gains access to a single system of a target organization and tries to obtain administrative login credentials to gain further access to the systems in the network using various techniques.
What phase of the advanced persistent threat lifecycle is John currently in?

- A. Expansion
- B. Initial intrusion
- C. Persistence
- D. Search and exfiltration

答案：A

解題說明：
The phase described where John, after gaining initial access, is attempting to obtain administrative credentials to further access systems within the network, is known as the 'Expansion' phase of an Advanced Persistent Threat (APT) lifecycle. This phase involves the attacker expanding their foothold within the target's environment, often by escalating privileges, compromising additional systems, and moving laterally through the network. The goal is to increase control over the network and maintain persistence for ongoing access.
This phase follows the initial intrusion and sets the stage for establishing long-term presence and eventual data exfiltration or other malicious objectives.References:
* MITRE ATT&CK Framework, specifically the tactics related to Credential Access and Lateral Movement
* "APT Lifecycle: Detecting the Undetected," a whitepaper by CyberArk
