

Latest CDCP Study Guide & New CDCP Real Exam

2026 Latest DumpTorrent CDCP PDF Dumps and CDCP Exam Engine Free Share: https://drive.google.com/open?id=1xYY_yRHTWxKaMcyMYC2PsfA_go7l96bC

The latest CDCP dumps collection covers everything you need to overcome the difficulty of real questions and certification exam. Accurate CDCP test answers are tested and verified by our professional experts with the high technical knowledge and rich experience. You may get answers from other vendors, but our CDCP briandumps pdf are the most reliable training materials for your exam preparation.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Water Supply: This topic is all about water supply techniques and application areas.
Topic 2	<ul style="list-style-type: none">• Cooling Infrastructure: The topic focuses on liquid immersion cooling, supplemental cooling options, sensible and latent heat definitions, and temperature and humidity recommendations.
Topic 3	<ul style="list-style-type: none">• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 4	<ul style="list-style-type: none">• Equipment Racks: It discusses power rail• strip options, security considerations, and rack standards, properties and selection criteria.
Topic 5	<ul style="list-style-type: none">• Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.
Topic 6	<ul style="list-style-type: none">• Raised Floor• Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.

Topic 7	<ul style="list-style-type: none"> • Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 8	<ul style="list-style-type: none"> • Designing a Scalable Network Infrastructure: It covers ANSI • TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.
Topic 9	<ul style="list-style-type: none"> • Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 10	<ul style="list-style-type: none"> • Fire Safety • Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 11	<ul style="list-style-type: none"> • Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.

New CDCP Real Exam, CDCP Test Result

Do not ask me why you should purchase Certified Data Centre Professional (CDCP) CDCP valid exam prep, of course it is because of its passing rate. As every one knows certification is difficult to pass, its passing rate is low, if you want to save exam cost and money, choosing a CDCP Valid Exam Prep will be a nice option.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q89-Q94):

NEW QUESTION # 89

Cost of Downtime can be classified as.

- A. Up and Down
- B. Classified and Declassified
- C. Direct and Indirect
- D. Mean and Median

Answer: C

Explanation:

Cost of downtime is the total amount of money lost due to a data centre outage or disruption. It can be classified into two categories: direct and indirect. Direct costs are the immediate and measurable expenses incurred during or after an outage, such as lost revenue, lost productivity, recovery costs, compensation costs, penalties, etc. Indirect costs are the long-term and intangible impacts of an outage, such as reputation damage, customer dissatisfaction, loss of market share, legal liabilities, etc. Both direct and indirect costs can vary depending on the type, duration, and severity of the outage, as well as the industry, size, and location of the data centre.

NEW QUESTION # 90

Which Class of Fires involves energized electrical equipment?

- A. Class A
- B. Class K
- C. Class B

- D. Class C

Answer: D

Explanation:

Class C fires involve energized electrical equipment, such as computers, servers, switches, cables, and wiring.

These fires require the use of non-conductive extinguishing agents, such as carbon dioxide, dry chemical, or clean agent, to prevent electrical shock and damage to the equipment. Water-based extinguishers, such as Class A or K, are not suitable for Class C fires, as water can conduct electricity and cause electrocution or short circuits.

NEW QUESTION # 91

Does shielded twisted pair network cabling provide protection against EMF from power cables?

- A. No, the shielding is designed for alien cross-talk between network cables, it provides no or little protection against low frequency EMF.
- B. Yes, but only if the power cable is placed in a tre-foil cable arrangement.
- C. Yes, as the shielding for twisted pair network cabling is specifically design for low frequency EMF protection.
- D. No, the shielding for twisted pair network cabling is for physical protection against vandalism and accidental cutting of the cable.

Answer: A

Explanation:

Shielded twisted pair cables (STP) are Ethernet cables that feature additional protection against electromagnetic interference from external sources, such as radio waves, microwaves, or other network cables.

This is achieved by wrapping each pair of wires with a conductive shield, usually made of foil or braided wire, and then enclosing the entire cable with another shield layer. However, this shielding is not effective against low frequency electromagnetic fields (EMF) from power cables, which can induce currents and voltages in the network cables and cause signal distortion or data loss. Low frequency EMF can only be reduced by increasing the distance between the power and network cables, or by using a tre-foil cable arrangement, which is a special configuration of three power cables twisted together to cancel out the magnetic fields they generate.

NEW QUESTION # 92

The three elements of the fire triangle are, and. (Choose three.)

- A. Water
- B. Oxygen
- C. Heat
- D. Earth
- E. Fuel

Answer: B,C,E

Explanation:

The fire triangle is a simple model that illustrates the three elements that a fire needs to ignite and sustain:

oxygen, heat, and fuel. Oxygen is the oxidizing agent that enables the combustion reaction, heat is the energy source that raises the temperature of the fuel to its ignition point, and fuel is the material that reacts with oxygen and releases heat and light. Removing any one of these elements can extinguish a fire. For example, water can reduce the heat and the oxygen, sand or soil can smother the fuel and the oxygen, and fire extinguishers can displace the oxygen or lower the temperature.

NEW QUESTION # 93

Which formula can provide a simple 'cost of downtime per hour' without taking seasonality and other factors into account?

- A. Revenue/52

- B. Revenue/1024
- **C. Revenue/8760**
- D. Revenue/365

Answer: C

Explanation:

8760 is the number of hours in a year (24 hours × 365 days). Dividing annual revenue by 8760 gives a basic average revenue per hour, commonly used in downtime cost calculations.

NEW QUESTION # 94

.....

As the old saying goes people change with the times. People must constantly update their stocks of knowledge and improve their practical ability. Passing the test CDCP certification can help you achieve that and buying our CDCP test practice dump can help you pass the test smoothly. Our CDCP study question is superior to other same kinds of study materials in many aspects. Our products' test bank covers the entire syllabus of the test and all the possible questions which may appear in the test. Each question and answer has been verified by the industry experts. The research and production of our CDCP Exam Questions are undertaken by our first-tier expert team.
