CLF-C02 Pass Test, CLF-C02 Latest Test Report

For the CLF-C02 learning materials of our company, with the skilled experts to put the latest information of the exam together, the test dumps is of high quality. We have the reliable channels to ensure that the CLF-C02 Learning Materials you receive are the latest on. We also have the professionals to make sure the answers and questions are right. Therefore just using the CLF-C02 at ease, you won't regret for this.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q764-Q769):

NEW QUESTION # 764

Which AWS service is always free of charge for users?

- A. Amazon EC2
- B. Amazon S3
- **C. AWS Identity and Access Management (IAM)**
- D. Amazon Aurora

Answer: C

Explanation:

AWS Identity and Access Management (IAM) is a service that allows users to manage access to AWS resources and services. It enables users to create and manage users, groups, roles, and policies that control who can do what in AWS. IAM is always free of charge for users, as there is no additional cost for using IAM with any AWS service¹. Amazon S3 is a storage service that provides scalable, durable, and secure object storage. Amazon S3 has a free tier that offers 5 GB of storage, 20,000 GET requests, and 2,000 PUT requests per month for one year. However, users are charged for any additional usage beyond the free tier limits². Amazon Aurora is a relational database service that is compatible with MySQL and PostgreSQL. Amazon Aurora has a free tier that offers 750 hours of Aurora Single-AZ db.t2.small database usage and 20 GB of storage per month for one year. However, users are charged for any additional usage beyond the free tier limits³. Amazon EC2 is a compute service that provides resizable virtual servers. Amazon EC2 has a free tier that offers 750 hours of Linux and Windows t2.micro instances per month for one year. However, users are charged for any additional usage beyond the free tier limits⁴.

NEW QUESTION # 765

A company wants to migrate a virtual server that runs Windows Server from an on-premises data center to AWS. The company wants to automatically convert the existing server to run natively on AWS infrastructure.

Which AWS service will meet this requirement?

- A. AWS DataSync
- B. AWS Application Migration Service
- C. AWS Config
- **D. AWS Application Discovery Service**

Answer: D

NEW QUESTION # 766

A company is looking for a managed machine learning (ML) service that can recommend products based on a customer's previous behaviors.

Which AWS service meets this requirement?

- A. Amazon Pinpoint
- B. Amazon SageMaker
- **C. Amazon Personalize**
- D. Amazon Comprehend

Answer: C

Explanation:

Explanation

The AWS service that meets the requirement of providing a managed machine learning (ML) service that can recommend products based on a customer's previous behaviors is Amazon Personalize. Amazon Personalize is a fully managed service that enables developers to create personalized recommendations for customers using their own data. Amazon Personalize can automatically process and examine the data, identify what is meaningful, select the right algorithms, and train and optimize a personalized recommendation model².

Amazon SageMaker, Amazon Pinpoint, and Amazon Comprehend are other AWS services related to machine learning, but they do not provide the specific functionality of product recommendation.

NEW QUESTION # 767

Which AWS benefit is demonstrated by on-demand technology services that enable companies to replace upfront fixed expenses

with variable expenses?

- A. High availability
- B. Pay-as-you-go pricing
- **C. Economies of scale**
- D. Global reach

Answer: C

Explanation:

Pay-as-you-go pricing is an AWS benefit that demonstrates the ability of users to replace upfront fixed expenses with variable expenses. With pay-as-you-go pricing, users only pay for the resources they consume, without any long-term contracts or commitments. This can lower the total cost of ownership and increase the return on investment. Pay-as-you-go pricing also provides flexibility and scalability, as users can adjust their resource usage according to their changing needs and demands. NEW QUESTION # 768

A developer needs to use a standardized template to create copies of a company's AWS architecture for development test, and production environments. Which AWS service should the developer use to meet this requirement?

- A. AWS CloudTrail
- B. AWS Cloud Map
- **C. AWS Cloud Formation**
- D. Amazon CloudFront

Answer: C

Explanation:

AWS CloudFormation allows developers to create, manage, and deploy AWS resources using templates, ensuring a standardized and repeatable infrastructure setup. It's ideal for setting up development, test, and production environments consistently. AWS Cloud Map, CloudFront, and CloudTrail do not provide templated infrastructure management capabilities.

NEW QUESTION # 769
