CRT-211 Testking Exam Questions & CRT-211 Reliable Test Forum

These Salesforce CRT-211 exam questions have a high chance of coming in the actual Certification Preparation for Advanced Administrator CRT-211 test. You have to memorize these Salesforce CRT-211 questions and you will pass the Salesforce CRT-211 test with brilliant results. The price of Salesforce CRT-211 updated exam dumps is affordable. You can try the free demo version of any Certification Preparation for Advanced Administrator CRT-211 exam dumps format before buying.

Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q178-Q183):

NEW QUESTION # 178

The recruiting manager at universal containers has requested a new picklist value in the type field on the position object by the end of the week.

If the administrator is unable to complete this request in the desired timeline, what type of access will allow the recruiting manager to make the changes in salesforce?

- A. Delegated administration over the position object.
- B. Delegated administration to manage recruiting users.
- C. Modify all and view all access to the position object.
- D. Create, Read, Edit and Delete access to the position object.

Answer: A

NEW QUESTION # 179

An administrator has initiated the process of deploying changes from a sandbox to the production environment using the Force.com IDE. Which three pieces of information must be supplied to the IDE during this process? Choose three

- A. The data of the fields which are being deployed.
- B. The related change set connection information.
- C. The metadata components that need to be deployed.
- D. The environment into which the changes will be deployed.
- E. The user name and password of the destination environment

Answer: C,D,E

NEW QUESTION # 180

AW Computing (AVVC) has customers in multiple countries. AWC would like to set up advanced currency management for its system.

Which two considerations should AWC be aware of prior to implementing this change to the existing system?
Choose 2 answers

- A. Historical trend reports will only use the last dated exchange rate.
- B. Opportunities will only display sales in the customer's localized currency.
- C. Once enabled, advanced currency management cannot be disabled.
- D. When a currency is added to an organization's List of supported currencies, it cannot be deleted.

Answer: C,D

Explanation:

When a currency is added to an organization's list of supported currencies, it cannot be deleted and once enabled, advanced currency management cannot be disabled are two considerations that AW Computing should be aware of prior to implementing this change to the existing system. Adding a currency to an organization's list of supported currencies is an irreversible action that allows users to enter and view amounts in that currency for standard and custom objects that have currency fields. Enabling advanced currency management is also an irreversible action that allows administrators to define dated exchange rates for opportunities and opportunity products based on close dates or product dates instead of using static conversion rates

NEW QUESTION # 181

Cloud Kicks (CK) has a backup team of employees that helps short-staffed departments. These users could be working with sales one day and service the next. CK is implementing new Lightning record pages for each department so that they view records in a way that makes sense for each department.

How should the administrator ensure this is configured correctly?

- A. Adjust the profile of the backup users each day to align with the proper access they require.
- B. Allow the backup team users to update their own profile with Delegated Administration.
- C. Create permission sets for each department and assign them to the backup team users.
- D. Configure one app per department and activate record pages for each app.

Answer: D

Explanation:

Configure one app per department and activate record pages for each app is how the administrator should ensure this is configured correctly. An app is a collection of items that work together to serve a particular function for a group of users. An app can include items such as tabs, objects, reports, dashboards, and record pages. A record page is a type of Lightning page that displays details about a specific record. A record page can be customized using Lightning App Builder and activated for different apps, profiles, or record types. By configuring one app per department and activating record pages for each app, the administrator can ensure that the backup team users can view records in a way that makes sense for each department depending on which app they are using.

NEW QUESTION # 182

Who can collaborate about your business with Salesforce Communities? Select 3

- A. Suppliers
- B. Customers
- C. Partners
- D. Employees
- E. Competitors

Answer: B,C,D

NEW QUESTION # 183

.....
