P.S. Free & New ANVE dumps are available on Google Drive shared by Exams-boost: <https://drive.google.com/open?id=1aQQ1k61r94qz9KaxfnE6M7Vnwdoki4-s>

Failure in the Axis Network Video Exam (ANVE) exam dumps wastes the money and time of applicants. If you are also planning to take the ANVE practice test and don't know where to get real ANVE exam questions, then you are at the right place. Exams-boost is offering the actual ANVE Questions that can help you get ready for the examination in a short time. These Axis ANVE Practice Tests are collected by our team of experts. It has ensured that our questions are genuine and updated. We guarantee that you will be satisfied with the quality of our ANVE practice questions.

To earn the ANVE certification, candidates must pass a rigorous exam that tests their knowledge of network video technology, network design, analytics, and cyber-security. ANVE exam is a comprehensive test that evaluates candidates' understanding of surveillance concepts and system design. Axis Network Video Exam certification exam is proctored, and candidates have 120 minutes to complete it. Axis Network Video Exam certification is valid for three years, and candidates are required to recertify to keep their certification up-to-date.

Axis ANVE (Axis Network Video) Exam is a certification that is designed for professionals who want to demonstrate their knowledge and expertise in network video technology. Axis is a leading provider of network video solutions that help to enhance security, safety, and efficiency in various industries. The ANVE certification is recognized worldwide and is a valuable addition to the resume of professionals who work in the field of network video.

Updated Axis ANVE Test Cram | ANVE Valid Exam Preparation

With our ANVE exam braindump, your success is 100% guaranteed. Not only our ANVE study material can provide you with the most accurate ANVE exam questions, but also offer with three different versions: PDF, Soft and APP versions. Their prolific practice materials can cater for the different needs of our customers, and all these ANVE simulating practice includes the new information that you need to know to pass the test. So you can choose them according to your personal preference.

Axis ANVE (Axis Network Video) Exam is a certification program designed to validate the skills and knowledge of professionals involved in designing, implementing, and managing video surveillance systems. ANVE exam covers a wide range of topics, including network video technologies, camera selection and placement, video management software, and system integration. It is intended for security professionals, system integrators, and network administrators who want to demonstrate their expertise in the field of network video surveillance.

Axis Network Video Exam Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which setting would best adjust a hard yellow tint as shown in the pictures below?

- A. White balance
- B. Image contrast
- C. Image brightness
- D. Color saturation

Answer: A

Explanation:

The setting that would best adjust a hard yellow tint in the images is the white balance. Adjusting the white balance corrects color casts by accounting for the color temperature of the light source, thereby producing more natural colors in the image. In the example images, modifying the white balance would neutralize the yellow tint and restore accurate colors. Axis cameras have white balance settings that can be adjusted manually or set to automatic for optimal color representation. Further details can be found in Axis Communications' camera setup and image optimization documentation.

NEW QUESTION # 75

What is the recommended method of assigning addresses to cameras in a video surveillance system with a VMS?

- A. Using dynamic MAC addresses
- B. Using public IP addresses
- C. Using APIPA IP addresses
- D. Using static IP addresses

Answer: D

Explanation:

"For stable operation in a VMS environment, it is recommended to assign static IP addresses to cameras to prevent changes that could disrupt video recording and management."

- Axis Communications Academy, Network Video Fundamentals, 2022

"Static IP addressing ensures cameras are always reachable at the same address by the VMS."

- Axis Installation Guide

References:

Axis Communications Academy, Network Video Fundamentals, 2022 (p. 54)

Axis Technical Note: IP Addressing

NEW QUESTION # 76

Where is the best place to mount a camera with a fixed iris?

- A. Outside, on a pole
- B. Inside, in a room with large windows
- **C. Outside, in a shadowed position**
- D. Inside, in a room with very strong light sources

Answer: C

Explanation:

A camera with a fixed iris is best mounted outside in a shadowed position. Fixed iris lenses do not adjust to changes in light levels, making them less suitable for environments with varying lighting conditions. By placing the camera in a shadowed position, you minimize the impact of direct sunlight and glare, which can cause overexposure and poor image quality. Therefore, the correct answer is C. For more detailed information, refer to Axis Communications' documentation on camera installation and fixed iris lenses.

NEW QUESTION # 77

In a network surveillance installation, the purpose of a router is to

- A. Separate audio and video traffic to reduce audio latency.
- B. Separate the video stream from the camera control signaling.
- C. Forward the video stream to the correct receiver within a network.
- **D. Forward the video stream between networks.**

Answer: D

NEW QUESTION # 78

Axis cameras support the ONVIF and VAPIX APIs. Which of the following is true?

- A. The VAPIX API is used to manage video configuration, while ONVIF is used for audio setup
- B. The ONVIF API is used to manage video configuration, while VAPIX used for audio setup
- **C. The VAPIX API is Axis' own API which supports the latest Axis camera capabilities**
- D. The ONVIF API is Axis' own API which supports the latest Axis camera capabilities

Answer: C
