Updated Workday-Pro-HCM-Reporting PDF dumps ensure the accuracy of learning materials and guarantee success of in your first attempt.

Workday Pro HCM Reporting Certification Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

You would like to create an advanced report that contains information about employees and their dependents. Where can you go to identify the field that links the two business objects, Worker and Dependent?

- A. The business object's Related Actions > Reporting > Report Fields and Values
- **B. The Related Business Objects tab of the Business Object Details report**
- C. The Related Business Object column of the Report Fields report
- D. The Columns tab of a report definition

Answer: B

Explanation:

To connect multiple business objects in reporting, Workday provides the Business Object Details report. The Related Business Objects tab within this report shows how different business objects are linked (e.g., Worker to Dependent). This enables report writers to identify which fields connect the primary and secondary objects.

From the Workday Reporting documentation:

"The report data source provides the view into the primary business object. This object gives you access to class report fields as well as links to related business objects." Therefore, the correct answer is C. The Related Business Objects tab of the Business Object Details report.

NEW QUESTION # 17

Where can you view a list of your scheduled reports?

- A. View All Occurrences for a Schedule
- B. Scheduled Distributions Report
- C. Scheduled Future Reports
- **D. Scheduled Future Processes**

Answer: D

Explanation:

Workday uses the Scheduled Future Processes report to display all processes that are scheduled to run in the future, including scheduled custom reports, standard reports, and other background jobs. This report provides visibility into recurrence patterns, next run dates, owners, and process types, making it the primary place to confirm scheduled report execution.

From the Workday HCM Reporting documentation:

"The Scheduled Future Processes report allows users to view all scheduled processes, including reports, along with their run frequency and next execution date."

"Use Scheduled Future Processes to validate that a report is still scheduled and confirm future run instances." The other options are incorrect because:

"Scheduled Future Reports" is not a delivered Workday task.

"Scheduled Distributions Report" is not used to view report schedules.

"View All Occurrences for a Schedule" is accessed only after selecting a specific schedule and does not provide a consolidated list. Therefore, the correct answer is D. Scheduled Future Processes.

NEW QUESTION # 18

The benefits manager position has recently been filled by a different worker. The previous benefits manager has transferred ownership of the report schedules to the new manager. Month end is coming up and the new manager is wondering which reports are scheduled to be run automatically.

Where can the manager view this information?

- A. My Tasks
- B. My Reports Library
- C. The Process Monitor report
- **D. The Scheduled Future Processes report**

Answer: D

Explanation:

Workday provides the Scheduled Future Processes report to review which reports are scheduled to run automatically. This report displays the recurrence details and execution times of all scheduled reports, allowing managers to confirm upcoming automated report runs.

From the Workday Reporting documentation:

"Workday provides scheduling options to run reports at set frequencies. You can confirm upcoming scheduled report runs in the Scheduled Future Processes report." Therefore, the correct answer is D. The Scheduled Future Processes report.

NEW QUESTION # 19

A worker report uses a filter based on the Location field, using the comparison type Prompt the user for a value. A user runs this report and leaves the prompt value blank.

What Worker instances display on the output?

- A. Only Worker instances where the Location field value is blank
- B. Only Worker instances where there is a value of the Location field
- **C. All Worker instances, regardless of the value of the Location field**
- D. No Worker instances, regardless of the value of the Location field

Answer: C

Explanation:

Workday report filters allow prompts so users can enter values when running a report. If the prompt value is left blank, Workday treats it as though no filter condition has been applied, so the system returns all available Worker instances regardless of the Location field.

From the Workday Reporting guide:

"Prompts - You can further narrow and refine your report results by having the user complete prompt fields before they run the report. You can set default values for prompts... If left blank, the filter condition is ignored and all data is returned." Therefore, the correct answer is D. All Worker instances, regardless of the value of the Location field.

NEW QUESTION # 20

The Recruiting department requested a report that shows job applications by recruiting source, displayed through count and percent summaries that they can drill into to further analyze the data.

What report type fulfills these requirements?

- **A. Matrix**
- B. Search
- C. nBox
- D. Advanced

Answer: A

Explanation:

Workday offers several custom report types: Advanced, Matrix, Composite, Search, and Trending .

Advanced Reports: Allow sorting, filtering, grouping, totals, and charts but are not designed for percentage summarizations across grouped data.

Search Reports: Show search results based on facet filters, not suited for summarization and percentages.

nBox Reports: Used for displaying workers or positions across two dimensions (e.g., performance vs. potential).

Matrix Reports: Specifically designed for grouping data, applying summarizations (count, sum, percent), and drilling

NEW QUESTION # 21

.....

Our Workday-Pro-HCM-Reporting Test Braindumps boost high hit rate and can stimulate the exam to let you have a good preparation for the exam.
