

ISTQB-CTFL Exam Preparatory: ISTQB Certified Tester Foundation Level (CTFL v4.0) & ISTQB-CTFL Test Questions

P.S. Free & New ISTQB-CTFL dumps are available on Google Drive shared by PassLeaderVCE: https://drive.google.com/open?id=144uQFg6mNj94bclu7VDC6_cJ215h-l5t

Many people prefer to buy our ISTQB-CTFL valid study guide materials because they deeply believe that if only they buy them can definitely pass the test. The reason why they like our ISTQB-CTFL guide questions is that our study materials' quality is very high. For years we always devote ourselves to perfecting our ISTQB-CTFL Study Materials. We boost the leading research team and the top-ranking sale service. We boost the expert team to specialize in the research and production of the ISTQB-CTFL guide questions and professional personnel to be responsible for the update of the ISTQB-CTFL study materials.

The superiority of our ISTQB-CTFL practice materials is undeniable. We are superior in both content and a series of considerate services. We made the practice materials for conscience's sake to offer help. Our ISTQB-CTFL actual exam withstands the experiment of the market also. With the help from our ISTQB-CTFL training engine, passing the exam will not be a fiddly thing anymore. So this is your high time to flex your muscles this time.

ISTQB ISTQB-CTFL Realistic Reliable Exam Vce Free PDF

The contents of ISTQB-CTFL test questions are compiled strictly according to the content of the exam. The purpose of our preparation of our study materials is to allow the students to pass the exam smoothly. ISTQB-CTFL test questions are not only targeted but also very comprehensive. Although experts simplify the contents of the textbook to a great extent in order to make it easier for students to learn, there is no doubt that ISTQB-CTFL Exam Guide must include all the contents that the examination may involve. We also hired a dedicated staff to constantly update ISTQB-CTFL exam torrent. With ISTQB-CTFL exam guide, you do not need to spend money on buying any other materials. During your preparation, ISTQB-CTFL exam torrent will accompany you to the end.

ISTQB Certified Tester Foundation Level (CTFL v4.0) Sample Questions (Q290-Q295):

NEW QUESTION # 290

Why should you choose a test technique?

- A. Because of the time constraints that usually accompany a test project
- B. Because this way you cover the full scope of the product's functionality
- C. Because you need to match the way you test to the content of the product under test
- D. Because choosing a test technique is a common practice in software testing

Answer: C

Explanation:

You should choose a test technique because you need to match the way you test to the content of the product under test. A test technique is a method or process for deriving and selecting test cases based on some criteria or rules. Different test techniques are suitable for different types of software products, depending on their characteristics, functionalities, requirements, specifications, risks, etc. Choosing a test technique helps to ensure that the test cases are relevant, effective, and efficient for the product under test. The other options are not correct reasons to choose a test technique. Time constraints are not a factor for choosing a test technique, but rather for prioritizing or optimizing testing activities. Covering the full scope of the product's functionality is not a guarantee of choosing a test technique, but rather a goal of testing. Choosing a test technique is not a common practice in software testing, but rather a professional skill and responsibility. NEW QUESTION # 291

The following state transition diagram describes the functionality involved in a system using fingerprint and password authentication to log onto a system.

How many distinct states of the system are visible in the above diagram?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

The state transition diagram provided shows three distinct states:

- * Waiting for fingerprint
- * Waiting for PIN
- * Valid PIN/ask menu selection

Each state represents a different stage in the system's operation, with transitions based on user actions and system responses.

NEW QUESTION # 292

A bank offers a savings account with various interest rates based on the current balance in the account. The balance ranges and respective interest rates are:

Up to \$100.00 = 2%

\$100.01 to \$500.00 = 4%

\$500.01 to \$1,000.00 = 5%

Above \$1,000.00 = 7%

Using two-point boundary value analysis, which of the following sets of test inputs provides the relatively highest level of boundary coverage?

- A. \$100.00, \$100.01, \$100.02, \$500.00, \$999.99
- B. \$100.00, \$500.00, \$1,000.00, \$1,000.01
- C. \$5.00, \$100.00, \$500.00, \$1,000.01
- D. \$5.00, \$100.00, \$499.99, \$1,000.00, \$1,000.01

Answer: A

Explanation:

Boundary Value Analysis (BVA) is a software testing technique in which tests are designed to include values at the boundaries. The concept is to focus on the boundaries since errors tend to occur at the edges of input ranges rather than in the middle.

Given the problem statement:

- * Up to \$100.00 = 2%
- * \$100.01 to \$500.00 = 4%
- * \$500.01 to \$1,000.00 = 5%
- * Above \$1,000.00 = 7%

Two-point boundary value analysis means testing the two boundaries of each range.

For each range:

- * The boundaries for "Up to \$100.00" would be \$100.00 and \$100.01.
- * The boundaries for "\$100.01 to \$500.00" would be \$100.00 and \$500.00.

* The boundaries for "\$500.01 to \$1,000.00" would be \$500.00 and \$1,000.00.

* The boundaries for "Above \$1,000.00" would be \$1,000.00 and \$1,000.01.

Now, let's examine the options:

* A. \$5.00, \$100.00, \$499.99, \$1,000.00, \$1,000.01

* Missing \$100.01 and \$500.01.

* B. \$100.00, \$100.01, \$100.02, \$500.00, \$999.99

* Covers \$100.00, \$100.01, \$500.00, \$1000.00, and \$1000.01.

* C. \$100.00, \$500.00, \$1,000.00, \$1,000.01

* Missing \$100.01 and \$500.01.

* D. \$5.00, \$100.00, \$500.00, \$1,000.01

* Missing \$100.01 and \$500.01.

Given the options, B provides the highest boundary coverage (ISTQB not-for-profit association) (Udemy).

NEW QUESTION # 293

Consider the following simplified version of a state transition diagram that specifies the behavior of a video poker game:

□ What Is the minimum number of test cases needed to cover every unique sequence of up to 3 states/2 transitions starting In the "Start" state and ending In the "End" state?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

The minimum number of test cases needed to cover every unique sequence of up to 3 states/2 transitions starting in the "Start" state and ending in the "End" state is 4. This is because there are 4 unique sequences of up to 3 states/2 transitions starting in the "Start" state and ending in the "End" state:

Start -> Bet -> End

Start -> Deal -> End

Start -> 1st Deal -> End

Start -> 2nd Deal -> End Reference: ISTQB Certified Tester Foundation Level (CTFL) v4.0 sources and documents.

NEW QUESTION # 294

Which statement about use case testing is true?

- A. The test cases are designed to be used by real users, not by professional testers
- B. The test cases are always designed by customers or end users.
- C. The test cases are designed to find defects in the data flow.
- D. The test cases are designed to find defects in the process flow.

Answer: D

Explanation:

Use case testing is a technique that helps identify test cases that exercise the whole system on a transaction by transaction basis from start to finish. Use cases are descriptions of how users interact with the system to achieve a specific goal. Use case testing is not focused on data flow, but rather on process flow. Use case testing can be performed by professional testers, customers or end users, depending on the context. Use case testing does not require the test cases to be designed by customers or end users, but rather by anyone who has access to the use case specifications.
