300-610 Valid Test Papers, 300-610 Dump Torrent

We keep raising the bar of our 300-610 real exam for we hold the tenet of clientele orientation. According to former exam candidates, more than 98 percent of customers culminate in success by their personal effort as well as our 300-610 study materials. So indiscriminate choice may lead you suffer from failure. As a representative of clientele orientation, we promise if you fail the practice exam after buying our 300-610 training quiz, we will give your compensatory money full back.

Cisco 300-610 Exam, also known as Designing Cisco Data Center Infrastructure (DCID), is designed to test the knowledge and expertise of professionals in the field of data center infrastructure design. It is an important certification exam for individuals who are interested in advancing their careers in data center networking, data management, virtualization, and cloud computing.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q67-Q72):

NEW QUESTION # 67

A cloud service provider is managing day-2 operations of over 200 blade servers installed in the Cisco UCS environment. This pool of network resources is providing virtual networks to their customers. To successfully operate this environment, frequent changes to vNICs and other operational policies are required across multiple UCS domains. The operations team must streamline these repetitive tasks. Which orchestration tool must be used to meet this requirement?

- A. Cisco ACI Multisite Orchestrator
- B. Cisco DAN Center
- C. Cisco UCS Manager
- **D. Cisco UCS Director**

Answer: D

NEW QUESTION # 68

An engineer is experiencing performance issues on a cisco UCS blade server. The B-series blade server contains four CPUs, most of which are idle. The engineer notices that the CPU is suffering from too many requests sent by the NIC. Additionally, the number of queues appears to be insufficient and only a single CPU is processing the network traffic. Which policy must be used to alleviate these issues?

- A. LAN connectivity
- B. vNIC placement
- C. Ethernet adapter
- D. Dynamic vNIC connection

Answer: C

Explanation:

Reference:

Ethernet adapter policy is the only policy that is having configuration that is related to CPU.

NEW QUESTION # 69

A customer attaches an additional storage appliance to an existing Cisco UCS domain, which contains 50 virtualization hosts that require fabric failover connectivity on fabric interconnect B.

The interfaces are bound to a separate pin group to segregate traffic with a CoS value of 0 Which Cisco UCS Manager feature meets these requirements?

- A. storage policy
- B. vNIC Template
- C. vHBA Templates
- D. SAN connectivity policy

Answer: C

NEW QUESTION # 70

A Cisco UCS instance has four interfaces on a UCS VIC. Where on the fabric interconnect does each interface terminate?

- A. port channel
- B. virtual interface
- C. vPC
- D. physical port

Answer: B

NEW QUESTION # 71

An engineer must configure a new maintenance policy that will apply to multiple Cisco UCS domains The policy must be available for use by service profiles and service profile templates created and managed in either Cisco UCS Manager or Cisco UCS Central Changes to this policy must be allowed only in Cisco UCS Central Which policy type must the engineer select to accomplish these goals?

- A. global policy
- B. hybrid policy
- C. central policy
- D. local policy

Answer: A
