IT인증 시험은 국제적으로 인정받는 자격증을 취득하는 과정이라 난이도가 아주 높습니다. SAP인증 C\_BCSBS\_2502시험은 IT인증자격증을 취득하는 시험과목입니다. 어떻게 하면 난이도가 높아 도전할 자신이 없는 자격증을 한방에 취득할 수 있을까요? 그 답은 ExamPassdump에서 찾을 수 있습니다. ExamPassdump에서는 모든 IT 인증 시험에 대비한 고품질 시험공부 가이드를 제공해드립니다. ExamPassdump에서 연구제작한 SAP인증 C\_BCSBS\_2502덤프로 SAP인증 C\_BCSBS\_2502시험을 준비해보세요. 시험패스가 한결 편해집니다.

## SAP C\_BCSBS\_2502 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"><li>Positioning SAP Business Data Cloud: This section of the exam measures the skills of Enterprise Architects and covers the positioning and strategic use of SAP Business Data Cloud. It involves understanding how data from various sources is managed, governed, and accessed to support intelligent business operations. The section aims to equip professionals with the ability to explain data unification and connectivity through SAP's cloud-based data platform.</li></ul>
주제 2	<ul style="list-style-type: none"><li>Discovering SAP Business AI: This section of the exam measures the skills of Digital Transformation Specialists and focuses on exploring how SAP Business AI enables smarter decision-making. It includes identifying AI-driven features embedded within SAP solutions and how they contribute to automation, predictions, and enhanced business outcomes. Professionals are expected to understand how to promote AI adoption in business processes using SAP's intelligent technologies.</li></ul>
주제 3	<ul style="list-style-type: none"><li>Positioning SAP Business Suite: This section of the exam measures the skills of Solution Consultants and covers how to effectively position the SAP Business Suite within various business scenarios. It includes understanding the core value, capabilities, and strategic advantages of SAP's integrated business applications. The focus is on enabling consultants to align SAP Business Suite offerings with customer needs to support end-to-end processes.</li></ul>

ExamPassdump에는 SAP C\_BCSBS\_2502인증 시험의 특별한 합습가이드가 있습니다. 여러분은 많은 시간과 돈을 들이지 않으셔도 많은 IT관련지식을 배우실 수 있습니다. 그리고 빠른 시일 내에 여러분의 IT지식을 인증 받으실 수 있습니다. ExamPassdump인증자료들은 우리의 전문가들이 자기만의 지식과 몇 년간의 경험으로 준비중인 분들을 위하

여 만들었습니다.

## 최신 SAP Certified Associate C\_BCSBS\_2502 무료샘플문제 (Q26-Q31):

### 질문 # 26

Which SAP Business Suite components are critical for enterprise-wide integration? There are 3 correct answers to this question.

- A. SAP Ariba
- B. SAP S/4HANA
- C. SAP Business Network
- D. SAP ERP
- E. SAP Predictive Maintenance

정답: B,C,D

### 질문 # 27

How does SAP Business Suite support enterprise resource planning (ERP) processes? Please choose the correct answer.

- A. By offering social media engagement tools
- B. By focusing only on customer relationship management
- C. By eliminating the need for business process automation
- D. By providing an integrated platform for finance, HR, supply chain, and procurement

정답: D

### 질문 # 28

Which SAP module is specifically designed for supplier management and procurement processes? Please choose the correct answer.

- A. SAP SuccessFactors
- B. SAP Transportation Management
- C. SAP Business Network
- D. SAP Ariba

정답: D

### 질문 # 29

Which of the following are RISE with SAP journeys? Note: There are 2 correct answers to this question.

- A. Greenfield ERP implementation on Public Cloud
- B. An ERP transformation to private cloud
- C. A hybrid two-tier approach
- D. New customers move to the public cloud

정답: B,C

#### 설명:

RISE with SAP is a guided transformation journey designed for existing SAP ERP customers to modernize their business processes and transition to a cloud ERP landscape, primarily focusing on SAP S/4HANA Cloud Private Edition. It is tailored for organizations with complex, customized on-premises systems, allowing them to move to the cloud at their own pace while preserving existing investments. The question asks which options represent RISE with SAP journeys, with two correct answers. Below, each option is evaluated based on official SAP documentation from sources such as SAP Learning, SAP.com, and related materials.

\* Option A: Greenfield ERP implementation on Public Cloud A greenfield ERP implementation involves a new, clean implementation of an ERP system without carrying over existing customizations or data.

While SAP S/4HANA Cloud Public Edition supports greenfield implementations, these are primarily associated with the GROW with SAP journey, which targets new SAP customers or midsize companies adopting standardized, best-practice processes for rapid deployment. RISE with SAP, however, is designed for existing SAP ERP customers transitioning from on-premises systems,

often involving complex landscapes and customizations. The public cloud (SAP S/4HANA Cloud Public Edition) is not the primary focus of RISE with SAP, which emphasizes the private cloud (SAP S/4HANA Cloud Private Edition) for such customers. Therefore, a greenfield implementation on the public cloud aligns more with GROW with SAP, not RISE with SAP. Extract: "For new customers, the GROW with SAP journey accelerates and streamlines the cloud transformation with a customized methodology to quickly implement and benefit from cloud ERP. ... SAP S/4HANA Cloud Public Edition is always implemented in a greenfield (new implementation) scenario." [learning.sap.com](https://learning.sap.com) Extract: "RISE with SAP is tailored to enable an easy transition to cloud ERP at a pace comfortable for the customer. Existing customers often require a higher degree of customization in their processes, prefer to innovate at their own pace, and need more control over their solution. These characteristics align with SAP S/4HANA Cloud Private Edition." [learning.sap.com](https://learning.sap.com) This option is incorrect.

\* Option B: An ERP transformation to private cloud RISE with SAP is explicitly designed to support ERP transformations from on-premises SAP ERP systems (e.g., SAP ECC or on-premises SAP S/4HANA) to SAP S/4HANA Cloud Private Edition, which operates in a private cloud environment. This journey accommodates both greenfield (new implementation) and brownfield (system conversion) scenarios, allowing customers to maintain existing customizations and business processes while leveraging cloud benefits like scalability, AI, and continuous innovation. The private cloud focus is a hallmark of RISE with SAP, making this option a core component of its transformation journeys. Extract: "RISE with SAP is a comprehensive offering that helps companies run their business in the cloud. At the heart of this comprehensive offering is SAP S/4HANA Cloud Private Edition, an intelligent cloud ERP solution powered by AI designed for customers currently running SAP ERP and/or on-premise SAP S/4HANA." [blog.sap-press.com](https://blog.sap-press.com) Extract: "A private cloud deployment is recommended if a customer has plans for a long-term evolutionary journey to the cloud with high landscape complexity including mostly fragmented, highly customized systems. ... The private cloud deployment can be a new implementation, but also supports system conversion from an existing SAP ERP on-premise system." [learning.sap.com](https://learning.sap.com) This option is correct.

\* Option C: New customers move to the public cloud. New customers moving to the public cloud typically align with the GROW with SAP journey, which is designed for organizations (often midsize or new to SAP) seeking a rapid, standardized implementation of SAP S/4HANA Cloud Public Edition. GROW with SAP emphasizes quick time-to-value with preconfigured best practices and minimal customization, targeting customers without prior SAP investments. In contrast, RISE with SAP targets existing SAP customers with on-premises ERP systems, focusing on complex transformations to the private cloud. While RISE with SAP could theoretically include public cloud components in specific scenarios, its primary focus is not new customers or the public cloud. Extract: "GROW with SAP is a SAP software solution initiative designed exclusively for mid-size companies and initial SAP customers. SAP S/4HANA Cloud + Public Edition - built on top of SAP's own HANA Cloud infrastructure, optimized for fast roll-out and quick time-to-value." [unecops.com](https://unecops.com) Extract: "RISE with SAP is an ERP adoption solution that helps current SAP ecosystem users transition traditional ERP information and processes to a cloud system without compromising or putting your data at risk." [blog.sap.com](https://blog.sap.com) This option is incorrect.

\* Option D: A hybrid two-tier approach. A hybrid two-tier ERP approach involves using a combination of SAP S/4HANA Cloud Public Edition and Private Edition, often across different parts of an organization (e.g., headquarters vs. subsidiaries). RISE with SAP supports such configurations, particularly for existing SAP customers with complex landscapes who may implement a private cloud solution (via SAP S/4HANA Cloud Private Edition) for core operations while using the public cloud for standardized processes in specific areas. This approach allows flexibility and scalability, aligning with RISE with SAP's tailored transformation framework. The documentation explicitly mentions support for two-tier ERP scenarios under RISE with SAP, making this a valid journey. Extract: "It's also common for customers to implement both SAP S/4HANA Cloud Public and Private Edition in a two-tier ERP scenario." [learning.sap.com](https://learning.sap.com) Extract: "RISE with SAP is tailored to a customer's existing landscape and business requirements, and umfasst ein standardisiertes Framework, integrierte Tools und fachkundige Beratung bei jedem Schritt - nach einer bewährten Methodik, die sowohl die Transformation als auch die Wertschöpfung beschleunigt." (Translated: "RISE with SAP is tailored to a customer's existing landscape and business requirements, and includes a standardized framework, integrated tools, and expert guidance at every step - following a proven methodology that accelerates both transformation and value creation.") [sap.com](https://sap.com) This option is correct.

#### Summary of Correct Answers:

- \* B: RISE with SAP supports ERP transformations to the private cloud, primarily through SAP S/4HANA Cloud Private Edition, accommodating both greenfield and brownfield scenarios for existing SAP customers.
- \* D: RISE with SAP enables a hybrid two-tier approach, combining private and public cloud editions to meet diverse organizational needs, as part of its flexible transformation framework.

### 질문 # 30

What is a key advantage of SAP Business Data Cloud Intelligent Applications?

- A. They provide pre-configured dashboards with AI-driven insights for faster decision-making.
- B. They remove the requirement for formal data governance and compliance policies.
- C. They primarily focus on raw data collection with minimal integrated analysis capabilities.

정답: A

설명:

The question asks for a key advantage of SAP Business Data Cloud Intelligent Applications, which are prebuilt, AI-powered applications within SAP Business Data Cloud designed to deliver actionable insights and automate business processes. According to official SAP documentation and the provided search results, the primary advantage is that these applications provide pre-configured dashboards with AI-driven insights for faster decision-making, enabling business users to access ready-to-use analytics with minimal setup. This makes Option A the correct answer.

Explanation of Correct answer:

Option A: They provide pre-configured dashboards with AI-driven insights for faster decision-making.

This is correct because SAP Business Data Cloud Intelligent Applications are designed to deliver pre-configured, SAP-managed dashboards and analytics that leverage AI to provide actionable insights, significantly reducing the time-to-value for business users. These applications combine data from SAP DataSphere and visualization capabilities from SAP Analytics Cloud, infused with AI-driven features like predictive analytics and simulations, to enable agile and informed decision-making. The Describing the Key Capabilities and Benefits of SAP Business Data Cloud lesson on [learning.sap.com](https://learning.sap.com) states:

"New to SAP Business Data Cloud (SAP BDC) are context-aware SAP Business Data Cloud Intelligent Applications. These pre-configured dashboards provide ready-to-run insights by combining planning and analysis, all infused with trusted Artificial Intelligence (AI) to drive smarter, faster decisions. The intelligent applications enable agile decision-making, predictive analysis, and simulations, leading to better business outcomes." [learning.sap.com](https://learning.sap.com) Additionally, the Intelligent Applications in Business Data Cloud page on [www.sap.com](https://www.sap.com) elaborates:

"Surface actionable insights and recommendations for analytics and planning with intelligent applications connected directly to your business data. ... These intelligent applications are adaptive, AI-powered applications that learn from your data, understand business context, and act on your behalf to transform business outcomes." [sap.com](https://sap.com) For example, applications like Working Capital Insights or People Intelligence provide prebuilt dashboards that integrate operational and financial data, offering AI-driven recommendations for areas like cash flow optimization or workforce planning. The installation of these applications automates the creation of underlying data models, replication flows, and SAP Analytics Cloud stories, requiring only a few clicks to deploy, as noted in the Managing and Leveraging SAP Business Data Cloud Intelligent Applications lesson:

"From a business user perspective, the result of an installed Intelligent Application is a ready-to-use dashboard. The Intelligent Application is presented to the business user as an SAP Analytics Cloud story which is connected to one or more underlying SAP DataSphere models. The story and all of these connected models are automatically created during the installation of an Intelligent Application." [learning.sap.com](https://learning.sap.com) This pre-configured, AI-driven approach ensures faster decision-making by eliminating the need for extensive manual configuration, making Option A the key advantage.

Explanation of Incorrect Answers:

Option B: They remove the requirement for formal data governance and compliance policies.

This is incorrect because SAP Business Data Cloud Intelligent Applications do not eliminate the need for formal data governance and compliance policies. In fact, these applications rely on robust governance to ensure data quality, security, and compliance, which are critical for trusted AI and analytics outcomes. The SAP Business Data Cloud overview on [www.sap.com](https://www.sap.com) emphasizes:

"SAP Business Data Cloud delivers fully managed capabilities for business data fabric, ... ensuring data across applications and operations has a foundation for generative AI that is reliable, responsible, and relevant." [sap.com](https://sap.com) Furthermore, data products within SAP Business Data Cloud include metadata and governance policies to maintain trust and compliance:

"In SAP BDC, data products are curated, reusable, and business-ready data assets designed to deliver immediate value. They encapsulate not just raw data, but also metadata, business context, and governance policies, making them trusted, actionable tools for analysis, planning, and decision-making." [learning.sap.com](https://learning.sap.com) This indicates that governance and compliance are integral to the platform, not removed, making Option B incorrect.

Option C: They primarily focus on raw data collection with minimal integrated analysis capabilities.

This is incorrect because SAP Business Data Cloud Intelligent Applications are designed to provide advanced analytics and AI-driven insights, not just raw data collection. They integrate data from SAP and non-SAP sources, enrich it with business semantics, and deliver sophisticated analysis through prebuilt dashboards and AI capabilities, as opposed to focusing on raw data. The SAP Business Data Cloud features page on [www.sap.com](https://www.sap.com) states:

"Deliver transformational insights for advanced analytics and planning with prebuilt applications and data products across all lines of business. ... Make faster, smarter decisions with prebuilt analytical apps across your enterprise for Core Enterprise Analytics, People Analytics, and more." [sap.com](https://sap.com) The SAP Sapphire Innovation Guide 2025 further highlights:

"Intelligent applications within SAP Business Data Cloud deliver transformational insights across the entire SAP Business Suite,

integrating analytics, AI, and simulations into transactional workflows." sap.com This focus on integrated analytics and AI-driven insights directly contradicts Option C, which misrepresents the applications as having minimal analysis capabilities.

## Summary:

The key advantage of SAP Business Data Cloud Intelligent Applications is that they provide pre-configured dashboards with AI-driven insights for faster decision-making, as stated in Option A. These applications leverage SAP Analytics Cloud and SAP DataSphere to deliver ready-to-use, context-aware analytics, enabling rapid deployment and agile decision-making. Option B is incorrect because governance and compliance remain essential, and Option C is incorrect because the applications prioritize advanced analytics over raw data collection. This aligns with SAP's strategy to streamline data-to-decision processes within SAP Business Suite, as supported by the provided search results and official documentation.
