ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q82-Q87):

NEW QUESTION # 82

A Discovery Behavior determines what probes Shazzam launches and from which MID Servers these probes are launched.
Response:

- A. True
- B. False

Answer: A

NEW QUESTION # 83

What role is required for a midserver user to communicate with ServiceNow.
Response:

- A. soap
- B. rest
- C. mid server

Answer: C

NEW QUESTION # 84

Hardware Models can have a one-to-many relationship with the following:
(Choose three.)

- A. Model Categories
- B. Manufacturer
- C. Product owner
- D. Assets
- E. Configuration Items

Answer: A,D,E

Explanation:

Hardware Models are templates that define the attributes and default values for a specific type of hardware configuration item (CI). Hardware Models can have a one-to-many relationship with the following entities:

* Assets: An asset is a tangible or intangible resource that is tracked and managed by the organization, such as a laptop, a license, or a contract. A Hardware Model can be associated with multiple assets that share the same characteristics and specifications.

* Configuration Items: A CI is any component that needs to be managed in order to deliver an IT service, such as a server, an application, or a user. A Hardware Model can be associated with multiple CIs that share the same characteristics and specifications.

* Model Categories: A model category is a classification of Hardware Models based on their function, such as network, storage, or server. A Hardware Model can belong to one or more model categories that define its scope and usage.

References:

* Hardware Model

* Asset

* Configuration Item (CI)

* [Model Category]

NEW QUESTION # 85

Which of the following MID Server Parameters cannot be modified through the platform UI?

- A. mid.windows.management_protocol
- B. mid.ssh.session_timeout
- C. url
- D. name

Answer: D

Explanation:

The MID Server parameters like 'mid.ssh.session_timeout', 'url', and 'mid.windows.management_protocol' can be modified through

the ServiceNow platform UI under the MID Server configuration settings. These parameters control various aspects of the MID Server's operation, such as timeout settings for SSH sessions, the URL for the MID Server to communicate with the ServiceNow instance, and the management protocol to use for Windows servers, respectively. The 'name' of the MID Server, however, is not typically a parameter that can be changed through the UI as it is a unique identifier for the MID Server within the ServiceNow instance. Once a MID Server is registered with a name, that name is usually persistent and not intended to be modified through configuration settings.

NEW QUESTION # 86

In a horizontal discovery pattern, which variable syntax should be used to populate the custom column `u_custom_col` on table `cmdb_ci_linux_server` when using the Set Parameter Value operation?

Response:

- A. `$cmdb_ci_linux_server[*].u_custom_col`
- B. `$u_custom_col[1].cmdb_ci_linux_server`
- C. `@custom_col.cmdb_ci_linux_server`
- D. `$cmdb_ci_linux_server.u_custom_col.INSERT`

Answer: A
