NEW QUESTION # 58

Which type of ETF is also referred to as smart beta ETF?

- A. Index-based
- B. Synthetic
- C. Standard
- **D. Rules-based**

Answer: D

Explanation:

Rules-based ETFs, also known as smart beta ETFs, use predetermined rules or algorithms to select and weight securities in their portfolios. These ETFs aim to outperform traditional market-capitalization-weighted ETFs by targeting specific factors such as value, momentum, quality, or volatility.

* Strategic Factor Weighting: Securities are weighted based on fundamental or quantitative factors, not just market capitalization.

* Higher Returns Potential: These ETFs are designed to capture excess returns (alpha) relative to a benchmark.

* Lower Costs: Smart beta strategies often combine active and passive management elements at a lower cost than traditional active funds.

* A. Rules-based: Correct answer. Smart beta ETFs are built on rule-based frameworks designed to achieve specific investment objectives.

* B. Standard: Refers to traditional, market-cap-weighted ETFs, not smart beta.

* C. Synthetic: Refers to ETFs that use derivatives to replicate returns of an underlying index, unrelated to smart beta.

* D. Index-based: Includes standard ETFs tracking an index but does not apply specifically to smart beta.

NEW QUESTION # 59

What information must be disclosed in ETF Facts documents that may be excluded from Fund Facts documents?

- A. The investment exposure.
- **B. The market price and bid-ask spread.**
- C. The management fee
- D. The total value of all units within the fund

Answer: B

Explanation:

ETF Facts documents are required to disclose specific details related to the trading characteristics of ETFs that may not be present in Fund Facts documents. These include the market price and bid-ask spread, which provide transparency about the costs associated with buying and selling ETFs.

Key Elements in ETF Facts Documents:

* Market Price and Bid-Ask Spread

* Unlike mutual funds, ETFs trade on stock exchanges. The ETF Facts document must disclose the average bid-ask spread, reflecting the cost of trading and the liquidity of the ETF. This is vital for investors assessing transaction costs.

* Investment Exposure

* While investment exposure may also appear in mutual funds, ETFs provide unique insights into their holdings and methodology due to their structure.

* Management Fee

* Management fees are included in both ETF Facts and Fund Facts documents, providing details on operational costs.

* Total Value of Units

* This may also be found in mutual fund documents, not exclusively in ETF Facts.

The inclusion of trading-specific metrics like the bid-ask spread in ETF Facts ensures investors are fully aware of trading costs, aiding informed decision-making.

References from CSC Study Documents:

* Mutual Funds vs. ETFs, Chapter 19, Volume 2: Compares disclosure requirements for ETFs and mutual funds, emphasizing details unique to ETFs.

* General disclosure requirements outlined in Section 19, including bid-ask spreads and market prices.
