## Reliable 350-601 Study Materials, 350-601 VCE Exam Simulator

Nowadays, everyone lives so busy every day, and we believe that you are no exception. If you want to save your time, it will be the best choice for you to buy our 350-601 study torrent. Because the greatest advantage of our study materials is the high effectiveness. As a powerful tool for a lot of workers to walk forward a higher self-improvement, DumpStillValid continue to pursue our passion for advanced performance and human-centric technology. We aimed to help some candidates who have trouble in pass their 350-601 Exam and only need few hours can grasp all content of the exam. In recent years, our test torrent has been well received and have reached 99% pass rate with all our dedication.

## Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q172-Q177):

### NEW QUESTION # 172

The EPLD update of the supervisor module has been scheduled for several cisco MDS 9000 switches. What will be the impact of the update?

- A. The redundant supervisor takes while the EPLD update is in progress and the switch is rebooted after the upgrade is completed.
- B. The redundant supervisor takes over while the EPLD update is in progress and there is no service disruption.
- C. All traffic is stopped for the duration of the EPLD update and the switch is rebooted after the upgrade is completed.
- D. All control plane traffic is stopped for the duration of the EPLD update and the switch remain operational for the duration

of the upgrade.

**Answer: C**

### NEW QUESTION # 173

Refer to the exhibit.

An engineer is implementing zoning on two Cisco MDS switches. After the implementation is finished, E Ports that connect the two Cisco MDS switches becomes isolated. What is wrong with the implementation?

- **A. Zones must have the same name on both MDS switches for the E ports to function.**
- B. Different zone set names must be configured on both MDS switches.
- C. Zones are local to the MDS switch and name service must be used to activate the connection between E ports.
- D. E Ports on both MDS switches must be configured as F ports for the zoning to function.

**Answer: A**

### NEW QUESTION # 174

A company is investigating different options for IT automation tools. The IT team has experience with Python programming language and scripting using a declarative language. The proposed tool should be easy to set up and should not require installing an agent on target devices. The team will also need to build custom modules based on the Python programming language to extend the tool's functionality. Which automation tool should be used to meet these requirements?

- A. Chef
- B. Puppet
- C. NX-API
- **D. Ansible**

**Answer: D**

Explanation:

Ansible is an agentless automation that automates deployment, configuration management (maintain infrastructure consistency) and orchestration (execution of multiple applications in order). Ansible gains its popularity due to its simplicity for being agentless, efficient, requires no additional software installed on target machine, use the simple YAML and complete with reporting.

### NEW QUESTION # 175

After a Cisco Nexus 7000 Series Switch chassis replacement, the administrator discovers that all vPC-enabled LACP port channels are reinitialized. The administrator wants to prevent this issue the next time the chassis is replaced. Which two actions must be taken to meet this requirement before the isolated device is reloaded? (Choose two)

- **A. Configure auto-recovery to the disable state on both peers**
- B. Set the vPC MAC address to a lower value than the peer
- C. Set the vPC MAC address to a higher value than the peer
- **D. Change the vPC system-priority of the replacement chassis to a higher value than the peer if**
- E. Change the vPC system-priority of the replacement chassis to a lower value than the peer.

**Answer: A,D**
