### NEW QUESTION # 82

The analyzing step of the Portfolio Kanban system has a new Epic with a completed Lean business case. What best describes the next step for the Epic?

- A. It will be implemented once the Epic Owner approves the Lean business case
- B. It will be implemented if it has the highest weighted shortest job first (WSJF) ranking
- **C. It will be moved to the ready state in the Portfolio Kanban if it receives a 'go' decision from Lean Portfolio Management**
- D. It will remain in the analyzing step until one or more Agile Release Trains have the capacity to implement it

Answer: C

Explanation:

The next step for an epic with a completed Lean business case in the analyzing step of the Portfolio Kanban is to move it to the ready state if it receives a 'go' decision from Lean Portfolio Management. The analyzing step is where the epic hypothesis statement and the Lean business case are developed and validated. The Lean business case provides the economic justification, assumptions, risks, and potential benefits of the epic. The Lean Portfolio Management is the authority that reviews and approves the Lean business case and decides whether to fund and implement the epic or not. If the epic receives a 'go' decision, it moves to the ready state, where it waits for implementation capacity. If the epic receives a 'no go' decision, it is either deferred or cancelled.
