As for the result, please come home and wait. Our ACD201 training prep will not disappoint you.

Appian Senior Developer Sample Questions (Q40-Q45):

NEW QUESTION # 40

After reviewing the latest Expression performance logs, you notice you have several expressions contributing to slow interface or process performance.

Which two conditions will lead to a higher risk associated with slow-performing expressions? (Choose two.)

- A. When the expression is used in a local variable.
- **B. When the expression is a custom function plug-in.**
- C. When the expression is evaluated on a mobile device.
- **D. When the expression is used frequently or by many concurrent users.**

Answer: B,D

Explanation:

When the expression is used frequently or by many concurrent users.

A slow-running rule that executes a large number of times - or is triggered by many users at once - multiplies its performance impact, raising the overall risk flagged in the expression-performance logs.

When the expression is a custom function plug-in.

Custom Java plug-ins can introduce additional processing overhead (or poorly optimized code). If such functions are slow, they typically appear near the top of performance logs and carry a higher risk score.

NEW QUESTION # 41

You're reviewing the process model built by your team member.

Which two design decisions might cause performance issues? (Choose two.)

- **A. No target process for the Send Message event**
- **B. Too many nodes**
- C. Asynchronous subprocess
- D. Data types passed by reference

Answer: A,B

Explanation:

Having no target process for the Send Message event can cause unnecessary processing and delays.

Too many nodes in a process model increase complexity and processing overhead, leading to potential performance issues.

NEW QUESTION # 42

You're creating an application which has integrations with multiple systems using different protocols.

Match each process model component or node to the appropriate protocol.

Note: Each protocol will be used once. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

☐

Answer:

Explanation:

☐

NEW QUESTION # 43

You're building an application with a review workflow.

Each submission must be approved by three users who can each approve or reject their request, and leave a comment. This action changes the status of the submission to 'Approved' or 'Rejected' correspondingly, and pushes the review to the previous or next assignee.

Which data model captures the workflow requirements appropriately?

- A. Two tables:
Review with columns id, statusId, comment, user
RefStatus with columns id, value
- **B. Three tables:**

Review to store id, statusId, comment
RefStatus with columns id, value
Review User with columns id, reviewId, user

- C. Two tables:
Review with columns id, statusId, comment, user1, user2, user3
RefStatus with columns id, value

Answer: B

Explanation:

Using three tables - Review, RefStatus, and Review User - enables you to track each user's approval or rejection, comments, and status changes for each review, supporting a flexible, normalized workflow for multiple reviewers.

NEW QUESTION # 44

You need to write an expression to retrieve a list of all account managers who don't currently have an active customer account. Which code snippet should you use?

- A. ☐
- B. ☒
- C. ☐

Answer: B

Explanation:

Chosen snippet uses the difference() function to efficiently get all account managers who are not currently managers of any customer account. It directly compares local!accountManagers to local!customers.manager, resulting in a concise and optimal solution for retrieving account managers without an active customer account.

NEW QUESTION # 45

.....

Attending training institution or having Appian online training classes may be a good choice for candidates. But for people who have no time and energy to prepare for ACD201 practice exam, training class will make them tired and exhausted. The most effective way for them to pass ACD201 Actual Test is choosing best study materials that you will find in DumpsQuestion.
