People always want to prove that they are competent and skillful in some certain area. The ways to prove their competences are varied but the most direct and convenient method is to attend the certification exam and get some certificate. The NCLEX-RN exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our NCLEX-RN Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

NCLEX-RN exam consists of a series of multiple-choice questions that test an individual's knowledge and understanding of various nursing concepts and practices. These questions are designed to assess a nurse's ability to think critically and make informed decisions in real-life situations. NCLEX-RN exam also includes a number of alternate-format questions, such as fill-in-the-blank and select-all-that-apply questions, that require test-takers to think creatively and problem-solve in order to arrive at the correct answer.

NCLEX-RN exam is a computerized test that consists of multiple-choice questions and alternate item formats, such as fill-in-the-blank and drag-and-drop questions. NCLEX-RN Exam is designed to be adaptive, which means that the difficulty level of the questions will increase or decrease based on the candidate's performance. NCLEX-RN exam is also timed, with candidates being

given a maximum of six hours to complete the exam.

NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q821-Q826):

NEW QUESTION # 821

A 32-year-old female client is being treated for Guillain-Barre syndrome. She complains of gradually increasing muscle weakness over the past several days. She has noticed an increased difficulty in ambulating and fell yesterday. When conducting a nursing assessment, which finding would indicate a need for immediate further evaluation?

- **A. Complaints of shortness of breath**
- B. Complaints of a headache
- C. Loss of superficial and deep tendon reflexes
- D. Facial paralysis

Answer: A

Explanation:

Section: Questions Set D

Explanation:

(A) Headaches are not associated with Guillain-Barre syndrome. (B) Loss of superficial and deep tendon reflexes is expected with this diagnosis. (C) Complaints of shortness of breath must be further evaluated. Forty percent of all clients have some detectable respiratory weakness and should be prepared for a possible tracheostomy. Pneumonia is also a common complication of this syndrome. (D) Facial paralysis is expected and is not considered abnormal.

NEW QUESTION # 822

A family by court order undergoes treatment by a family therapist for child abuse. The nurse, who is the child's case manager knows that treatment has been effective when:

- **A. The child's parents can identify appropriate behaviors for children in his age group**
- B. The child's parents identify the ways in which he is different from the rest of the family
- C. The child's father is arrested for child abuse
- D. The child is removed from the home and placed in foster care

Answer: A

Explanation:

Section: Questions Set G

Explanation:

(A) Removing an abused child from the home and placement in a foster home are not the desired outcome of treatment. (B) Children who are perceived as "different" from the rest of the family are more likely to be abused. (C) Although legal action may be taken against abusive parents, it is not an indicator of an effective treatment program. (D) Identification of age-appropriate behaviors is essential to the role of parents, because misunderstanding children's normal developmental needs often contributes to abuse or neglect.

NEW QUESTION # 823

The most important goal in the care plan for a child who was hospitalized with an accidental overdose would be to:

- A. Determine child's activity pattern
- B. Reduce mother's sense of guilt
- C. Instruct parents in use of ipecac
- **D. Teach parents appropriate safety precautions**

Answer: D

Explanation:

(A) This goal is not the most important. (B) There is always some guilt when an accident occurs; however, the priority is to be sure future accidents are prevented. (C) Ipecac is not used for caustic alkali and acid ingestions. (D) Determining the parent's knowledge about safety hazards and teaching appropriate preventive measures are likely to prevent recurrence of accidents.

NEW QUESTION # 824

A 4-year-old child with a history of sickle cell anemia is admitted to the nursing unit with dizziness, shortness of breath, and pallor. Nursing assessment findings reveal tenderness in the abdomen. The child is most likely experiencing a/an:

- A. Vaso-occlusive crisis
- B. Aplastic crisis
- C. Dactylitis crisis
- D. Sequestration crisis

Answer: D

Explanation:

Explanation

(A) Aplastic anemia is characterized by a lack of reticulocytes in the blood. Platelet and white blood cell counts are usually not depressed. It is usually self-limiting, lasting 5-10 days. (B) Vaso-occlusive crisis is the most common type of crisis in sickle cell anemia. Sickled cells become clogged, leading to distal tissue hypoxia and infarction. Joints and extremities are the most commonly affected areas. (C) Dactylitis crisis, or "hand-foot syndrome," causes symmetrical infarction of the bones in the hands and feet, resulting in painful swelling in the soft tissues of the hands and feet. (D) Sequestration crisis occurs as enormous volumes of blood pool within the spleen. The spleen enlarges, causing tenderness. Signs of shock including pallor, tachypnea, and faintness result, related to the deficient intravascular volume. This type of crisis is potentially fatal.

NEW QUESTION # 825

A 25-year-old lawyer who is married with three young children works long hours in an effort to become a partner in the law firm. Following a recent hospitalization for a bleeding ulcer, he was referred for therapy to treat this psychophysiological disorder. On meeting with the therapist, he informed him or her that he was a busy man and did not have much time for this "psych stuff." When guiding the client to ventilate his feelings, the therapist can expect him to express feelings of:

- A. Shame
- B. Despair
- C. Guilt
- D. Anger

Answer: D

Explanation:

Section: Questions Set D

Explanation:

(A) Guilt relates to depression. (B) Shame is not associated with psychophysiological disorders. (C) Despair relates to depression. (D) Repressed anger is associated with psychophysiological disorders.

NEW QUESTION # 826

.....
